REVIEW OF ECONOMIC AND FINANCIAL DEVELOPMENTS

DOMESTIC ECONOMIC DEVELOPMENTS

Indications are that the Bahamian economy continued to expand at a modest pace during the first quarter of 2012, benefitting from sustained recovery in tourism's high-value-added stopover business, and ongoing foreign and public sector investment projects. However, employment conditions remained constrained, and consumer price inflation firmed, amid the continued strengthening in international oil prices and the corresponding adverse impact on domestic fuel related costs.

On the fiscal side, Government's budgetary operations reversed to a deficit in the third quarter of FY2011/12 from a surplus a year earlier, as revenues returned to trend levels after extraordinary stamp tax-led gains, and coincided with increases in both current and capital outlays. Budgetary financing was secured mainly from domestic sources, including short-term advances from the domestic banking system and a Treasury bill issue.

Monetary developments featured a sharp slowdown in accretions to both liquidity and external reserves, after one-off public sector related foreign inflows led to robust gains a year ago. In the context of moderate domestic demand, private sector borrowings remained relatively anemic, while a combination of seasonal factors and debt restructuring measures resulted in an improved outcome for banks' asset quality indicators. However, consistent with their ongoing cautious stance, banks continued to augment loan loss provisions.

In the external sector, the estimated current account deficit widened slightly, as the increase in the merchandise trade deficit, associated with a combination of higher oil and construction-related payments, outpaced the tourism-led growth in the services account surplus. On the capital account, higher private sector loan financing inflows, combined with reduced net investment remittances by domestic banks, supported an expansion in the surplus relative to the year-earlier position.

FISCAL OPERATIONS

OVERVIEW

Government's budgetary operations recorded a deficit of \$74.7 million, compared with a \$23.9 million surplus in the third quarter of FY2010/11. This reflected a 19.0% (\$85.3 million) reduction in revenues to trend levels, following an extraordinary tax receipt led increase a year earlier, alongside a 3.1% (\$13.3 million) hike in total spending.

REVENUE

Tax receipts—which accounted for the bulk (90.5%) of total collections—declined by 22.3% (\$94.7 million) to \$329.7 million. The intake from non-trade stamp taxes, which were boosted by \$141.0 million last year, on account of one-off revenue inflows relating to the sale of an oil company, was more than halved to \$39.0 million. Selective taxes on services also fell by 36.9% (\$8.1 million) to \$13.8 million, as gaming taxes returned to typical collection levels of \$4.0 million, after the receipt of substantial arrears payments in 2011. Other miscellaneous taxes declined by \$8.6 million to \$3.5 million, and departure tax receipts were 7.2% (\$2.2 million) lower at \$27.7 million. Reflecting the modest gains in domestic demand, tax revenue from international trade & transactions—at 48.8% of the total—expanded by 18.4% (\$24.9 million) to \$160.8 million, explained by a 32.3% (\$16.2 million) rise in excise taxes and a 9.1% (\$7.2 million) increase in import taxes. More modest hikes were recorded for business and professional fees and motor vehicle taxes, of 7.3% (\$3.8 million) and 6.0% (\$0.5 million), to \$55.2 million and \$8.6 million, respectively.

Non-tax collections—at 9.5% of total revenue—grew by 37.4% (\$9.4 million) to \$34.5 million, primarily explained by a timing-related increase in dividend payments, which boosted income from “other” sources almost six-fold to \$11.4 million. Proceeds from the sale of Government property were up slightly by \$0.2 million to

\$0.5 million, while collections of fines, forfeits & administration fees steadied at \$22.3 million.

EXPENDITURE

Current spending, which accounted for 85.4% of total outlays, grew by 2.9% (\$10.7 million) to \$375.0 million, and capital expenditures rose by 14.6% (\$6.8 million) to \$53.5 million. However, net lending to public corporations declined by 28.4% (\$4.2 million) to \$10.5 million.

An analysis of current outlays by economic classification showed growth being driven by a 6.5% (\$14.3 million) hike in consumption related spending, to \$233.3 million, occasioned by gains in both purchases of goods & services (12.1% or \$10.1 million) and personal emoluments (3.1% or \$4.3 million). In contrast, transfer payments declined by 2.5% (\$3.7 million) to \$141.6 million, as the June 2011 interest rate reduction contributed to the 12.0% (\$5.7 million) decrease in interest payments to \$41.6 million. However, subsidies & other transfers advanced by 2.0% (\$2.0 million) to \$100.0 million, as increased transfers to public corporations (\$6.2 million) and subsidies (\$2.2 million) outstripped contractions in assistance to households (\$3.6 million) and non-profit institutions (\$2.7 million).

On a functional basis, the rise in current outlays reflected higher tourism and transportation-led expenditures for economic services, of 22.4% (\$9.0 million) to \$48.9 million. Similarly, spending on healthcare firmed by 4.6% (\$2.9 million) to \$65.7 million and for general public services, by 1.4% (\$1.5 million) to \$106.1 million. More muted increases were registered for education (\$1.3 million), social benefits & services (\$1.0 million), defense (\$0.5 million), other community & social services (\$0.2 million), while housing outlays were unchanged.

Capital expenditure gains were fuelled mainly by the Government's ongoing infrastructure development programme, which resulted in an 11.9% (\$5.0 million) rise in capital formation to \$47.0 million. Similarly, outlays for asset acquisitions were higher by 33.5% (\$1.3 million) to \$5.2 million, as land and other "miscellaneous" asset purchases firmed by \$2.0 million to \$3.6 million, while outlays for equity investments fell by \$0.7 million to \$1.6 million. Capital transfers to nonfinancial public enterprises increased more than three-fold, to \$0.7 million, and

those allocated to public corporations steadied at \$0.6 million.

FINANCING AND THE NATIONAL DEBT

Budgetary financing for the third quarter of FY2011/12 was primarily obtained from domestic sources, comprising increments in advances from commercial banks (\$43.6 million), a new issue of Treasury bills (\$20 million) and advances from the Central Bank (\$20.0 million). An additional \$16.4 million was secured by way of drawings on existing project-related external loans, against debt repayments of \$2.0 million.

As a consequence of these developments, the Direct Charge on the Government was higher by 1.4% (\$54.3 million) over the quarter and by 3.2% (\$119.7 million) year-on-year, to \$3,860.5 million at end-March, 2012. The bulk (78.9%) of the Direct Charge was denominated in Bahamian dollars, being held primarily by commercial banks (37.3%), private investors (29.5%) and public corporations (22.5%), and with smaller shares for the Central Bank (10.4%) and Other Local Financial Institu-

tions (0.3%). By type of instrument, Government securities constituted the largest component of local currency debt (85.1%) and carried an average maturity of approximately 11.4 years, followed by Treasury bills (10.6%) and loans & advances (4.3%).

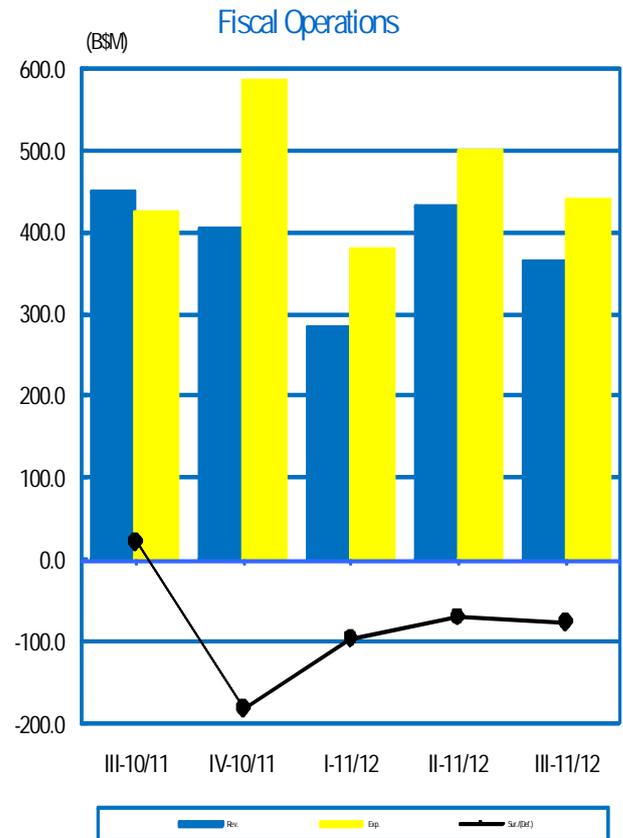

The Government's contingent liabilities were higher by 0.8% (\$4.5 million) at \$555.2 million, owing to an \$8.2 million rise in the guaranteed debt of the Bahamas Mortgage Corporation. As a result of increases in both the Direct Change and contingent liabilities, the National Debt grew by 1.4% (\$58.9 million) on a quarterly basis, and by 2.4% (\$104.4 million) on an annual basis, to \$4,415.8 million at end-March, 2012.

PUBLIC SECTOR FOREIGN CURRENCY DEBT

Public sector foreign currency debt rose by 3.6% (\$50.7 million) to \$1,455.4 million during the first quarter of 2012, as new drawings of \$58.9 million outpaced amortization payments of \$8.2 million. Comprising 56.0% of the total, the Government's foreign currency debt expanded by 1.8% (\$14.3 million) to \$814.4 million, compared with a 6.0% (\$36.3 million) hike in the public corporations' component to \$641.0 million.

Relative to the same period a year ago, total debt service payments declined marginally by \$0.6 million to \$15.8 million. Public corporations' payments fell by \$1.2 million to \$12.8 million, eclipsing the \$0.6 million gain in the Government's component to \$3.0 million. Consequently, the debt service ratio was reduced by 0.2 of a percentage point to 1.8%, while debt service as a proportion of total Government revenue increased by 0.3 of a percentage point to 0.8%.

Disaggregated by creditor profile, private capital markets accounted for the largest proportion of foreign currency debt (41.2%), followed by commercial banks (25.0%), other "miscellaneous" firms (16.7%) and multilateral institutions (13.4%), respectively, while bilateral organisations held the remaining 3.7%. At end-March 2012, the stock of outstanding debt carried an average maturity of 14.4 years, with US dollars accounting for the majority (97.6%), followed by Chinese Yuan (2.1%) and euros (0.3%).

REAL SECTOR

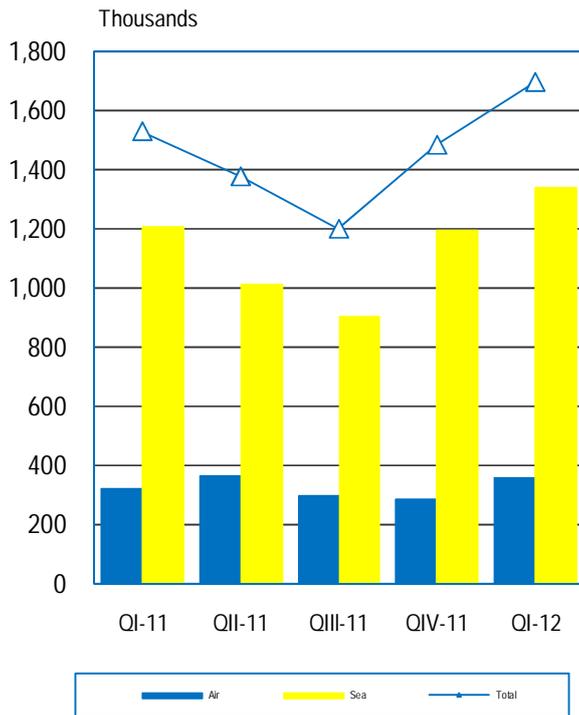

TOURISM

Supported by a combination of expanded airlift, ongoing travel incentive programs and continued recovery in the key group business, output in the tourism sector improved during the first quarter of 2012. Overall tourist arrivals were up by 10.8% to approximately 1.7 million, in line with the year-earlier comparative 10.4% gain. Air arrivals, which declined by 7.0% last year, recovered strongly by 11.2% to 0.4 million, while the increase in the sea component moderated to 10.7%, for 1.3 million visitors, from last year's 16.2% hike.

Segmented by major ports of entry, visitors to New Providence—which accounted for 53.7% of the total—increased by 11.7% to 0.9 million, benefitting from double digit improvements in both the air (11.6%) and sea (11.8%) components. Arrivals to the Family Islands firmed by 12.4% to 0.6 million, led by a 13.4% hike in sea

traffic and supported by a 3.3% gain in air visitors. Despite a 21.9% surge in air traffic, due to increased airlift, growth in tourist arrivals to Grand Bahama was limited to 3.6% for 0.2 million visitors, given the modest 1.0% rise in the dominant sea segment.

Visitor Arrivals

Survey data obtained from the Bahamas Hotel Association covering first quarter performance of fourteen (14) large hotels in New Providence and Paradise Island, indicated that gains in air arrivals translated into improved hotel earnings. Total room revenue was higher by 9.1%, reflecting a 4.6 percentage point rise in the average occupancy rate to 71.2% and a more muted 0.8 percentage point gain in the average daily room rate (ADR) to \$254.77.

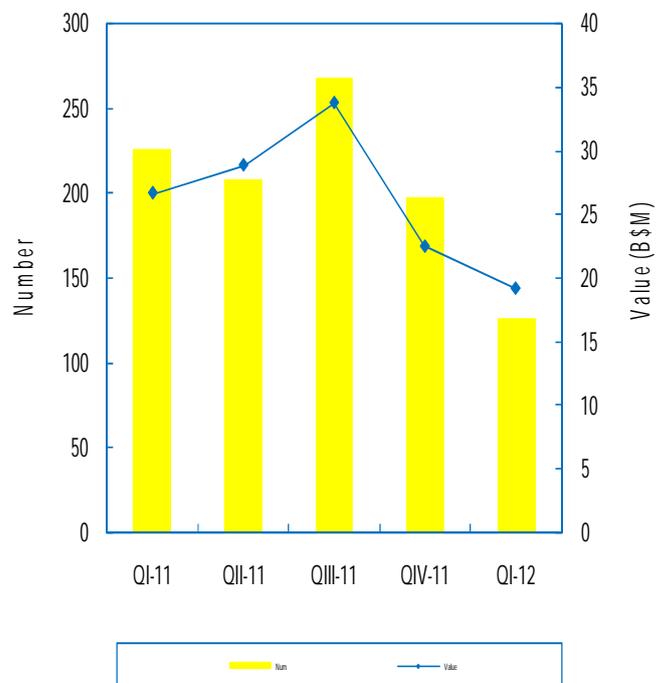

CONSTRUCTION

First quarter 2012 construction sector activity continued to be shaped by large-scale foreign investments in the hotel sector and, to a lesser extent, public sector infrastructural projects, whereas domestic private sector construction activity remained comparatively lackluster.

Mortgage disbursements for new construction and repairs, as reported by domestic banks, insurance companies and the Bahamas Mortgage Corporation, were lower by 32.4% at \$27.5 million, extending the prior year's 15.4% fall-off. In particular, residential activity contracted by 33.4% to \$26.7 million, relative to last year's 2.8% decrease, while there was a marginal expansion in the commercial segment of \$0.2 million to \$0.8 million, to reverse the year-earlier \$6.2 million decline.

Data on mortgage commitments for new buildings and repairs—a forward looking indicator—suggest that the weakness in the sector is likely to persist over the near-term. Total commitments declined by 44.2% in number to 126 projects, valued 28.1% lower at \$19.1 million. Reflecting these developments, the residential component—at approximately 99% of the aggregate—fell by 43.6% in number to 124 and by 25.8% in value to \$19.0 million. Similarly, commercial loan commitments fell in number from 6 to 2 and in value, by \$0.9 million to \$0.2 million.

Mortgage Commitments: New Construction and Repairs

On balance, lending conditions were more favourable for the sector, with the average residential loan rate lower by 30 basis points from the previous year at 8.1%, due in part to the 75 basis point reduction in the Prime Rate in June, 2011. The average rate on commercial loans, however, moved upwards on a quarterly basis, by 10 basis points to 8.8%.

PRICES

Buoyed by continued increases in international oil and commodity costs, average consumer prices firmed by 2.53% over the first quarter, in line with the previous year's expansion. Average price gains accelerated for food & non-alcoholic beverages, by 1.38 percentage points to 2.58% and for miscellaneous goods & services, by 1.30 percentage points to 1.40%; and was reversed from a 0.88% contraction to a 1.31% upturn for clothing & footwear. In addition, inflation rates firmed by 0.39 of a percentage point for housing, water, gas, electricity and other fuels, communication and alcohol, tobacco & narcotics, to 3.35%, 0.58% and 2.06%, respectively. Some offset was provided by slackened average cost increases for transportation (from 6.87% to 4.00%), furnishing, household equipment & maintenance (to 2.15% from 3.36%) and healthcare (to 1.31% from 2.30%). The rate of average cost gains for education and restaurant & hotel services costs also slowed, by 0.76 and 0.13 of a percentage point, to 2.53% and 2.17%, respectively, whereas average costs for recreation & culture decreased by 0.80%, a reversal from last year's 2.62% gain.

Higher international oil prices also resulted in gains in domestic energy costs. The average price of gasoline and diesel rose by 4.4% to \$5.33 per gallon and by 2.8% to \$5.22 per gallon over the three-months ended March, with sharper annualized increases of 11.4% and 18.8%, respectively. Similarly, the Bahamas Electricity Corporation's fuel charge advanced over the quarter, by 3.7% to 26.00 cents per kilowatt hour (kWh), and surged by 30.1% year-on-year.

MONEY, CREDIT AND INTEREST RATES

OVERVIEW

Monetary developments featured a significant moderation in accretions to both bank liquidity and external reserves during the first quarter of 2012, occasioned by a return to trend following last year's extraordinary foreign currency inflows. Banks' credit quality indicators improved modestly over the three-month period, reflecting to some extent seasonal factors, as well as increased write-offs and debt restructuring. The most recent bank performance indicators for the fourth quarter of 2011, showed a contraction in overall bank profitability, due to a significant reduction in interest income, while the weighted average interest rate spread narrowed during the review quarter, on account of an increase in the deposit rate and a contraction in the lending rate.

LIQUIDITY

Banks' net free cash reserves were higher by \$6.2 million (1.7%) at \$376.8 million, markedly below the \$114.0 million expansion posted in 2011. At end-March 2012, the ratio of free cash reserves to deposit liabilities fell to 6.1% from 7.4% a year earlier. Similarly, the broader surplus liquid assets increased by \$34.9 million (3.9%) to \$931.3 million, representing a slowdown from 2011's \$91.5 million upturn, although a more elevated 95.2% above the statutory minimum, vis-a-vis 93.8% last year.

DEPOSITS & MONEY

The overall money supply (M3) expanded by \$119.4 million (1.9%) to \$6,429.8 million, up from a \$37.1 million (0.6%) gain a year earlier. In particular, narrow money (M1) advanced by \$51.9 million (3.6%), relative to 2011's \$5.0 million (0.4%) increase, owing to a \$45.3 million (3.7%) rise in demand deposits and a more muted expansion in currency in circulation of \$6.5 million (3.3%). Broad money's (M2) expansion, at \$63.8 million (1.0%),

was slightly above 2011's \$60.9 million (1.0%) increase, with a private sector-led \$21.1 million gain in savings deposits eclipsing a \$9.2 million reduction in fixed balances. Following a 10.6% (\$23.8 million) contraction a year earlier, foreign currency deposits firmed by 27.0% (\$55.6 million), reflecting gains in both public and private sector placements.

As a proportion of the overall money stock, fixed deposits comprised the largest share, at 55.9%, followed by demand balances (19.9%) and savings deposits (16.9%). Foreign currency deposits and currency in active circulation represented much smaller shares of 4.1% and 3.2%, respectively.

DOMESTIC CREDIT

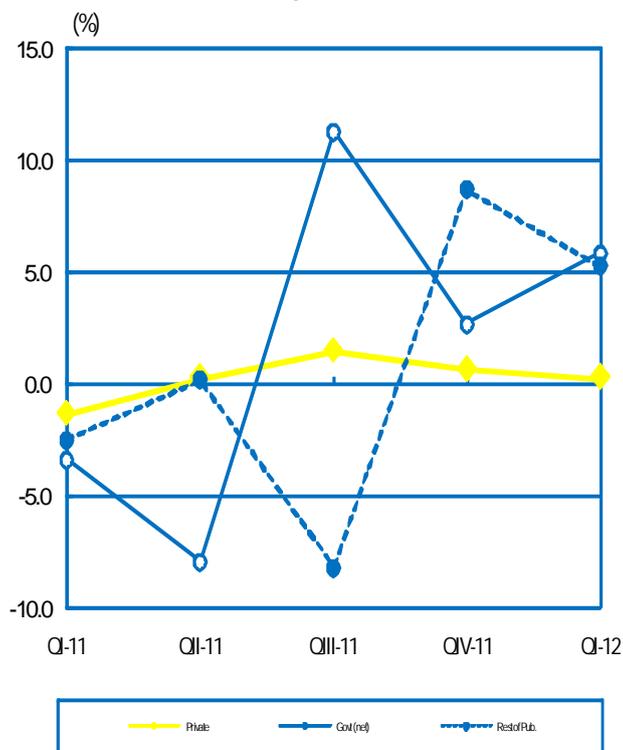

During the quarter, total domestic credit expanded by \$129.6 million (1.5%), in contrast to a \$146.2 million (1.7%) contraction in 2011. Bahamian dollar claims—which comprised the majority (91.5%) of the total—grew by \$101.0 million (1.3%), following last year's \$59.0 million (0.8%) reduction. The foreign currency component also rebounded by \$28.6 million (4.0%), from a comparative \$87.2 million (10.8%) decrease in 2011.

Growth in domestic credit was largely dominated by increased claims on the public sector, led by a turnaround in the Government's position, to a 5.9% (\$85.6 million) net increase in claims from a 3.3% (\$47.0 million) reduction in 2011. Credit to the rest of the public sector also firmed by 5.4% (\$23.8 million), to reverse last year's 2.5% (\$11.6 million) falloff.

Banks provided additional net credit of \$20.2 million (0.3%) to the private sector, in contrast to an \$87.6 million contraction in 2011, when a local tourism entity repaid an outstanding foreign currency loan. The expansion was solely in the foreign currency component, which grew by 7.2% (\$26.4 million) to outpace the 0.1% (\$6.3 million) reduction in domestic currency claims. Growth in personal loans—at 72.1% of the total—declined by \$4.2 million (0.1%), following a \$7.6 million (0.2%) rise in 2011. This outturn was explained by a \$9.4 million (0.4%) decrease in consumer loans, which eclipsed more moderate gains in residential mortgages and overdrafts, of \$5.0 million (0.2%) and \$3.0 million (3.2%), respectively.

A breakdown of consumer credit showed decreases for credit card (\$9.6 million), land purchases (\$5.0 million), debt consolidation (\$4.5 million), home improvement (\$3.7 million), private car (\$1.8 million), education (\$1.5 million) and travel (\$1.4 million) loans, with smaller contractions of less than \$1.0 million registered for furnishings & domestic appliances, medical and commercial vehicle categories. Reflecting the continuation of debt consolidation activities, "miscellaneous" loans grew strongly by \$19.4 million, while lending for taxis & rented cars was relatively flat.

Changes in Credit

Among the remaining private sector loan categories, decreases were registered for private financial institutions (\$6.7 million), tourism (\$4.3 million), transport (\$2.4 million) and fisheries (\$1.9 million). In contrast, significant gains were noted for miscellaneous, professional & other services and construction lending, of \$16.9 million, \$11.4 million and \$8.4 million, respectively, with lesser increases for distribution (\$2.9 million), manufacturing (\$2.5 million) and agriculture (\$0.4 million) credits.

Distribution of Bank Credit By Sector

MORTGAGES

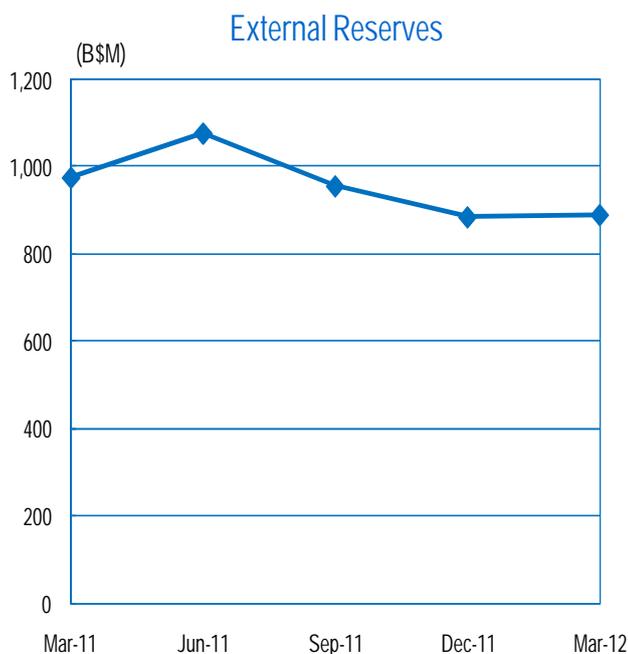

Consistent with the softness of the economic recovery, mortgage data provided by banks, insurance companies and the Bahamas Mortgage Corporation, showed marginal growth in the outstanding stock, of \$3.3 million (0.1%) to \$3,240.1 million, compared to a \$27.2 million (0.9%) accretion in the same period of 2011. Gains in both the residential (93.9% of the total) and commercial components slowed to \$0.6 million (0.02%) and \$2.7 million (1.4%), from \$20.9 million and \$6.3 million in 2011. At end-March, commercial banks held the bulk (88.9%) of outstanding mortgages, followed by insurance companies (6.0%) and the Bahamas Mortgage Corporation (5.1%).

THE CENTRAL BANK

Buoyed by higher advances, the Central Bank's net claim on the Government rose by \$15.7 million (5.4%) to \$304.8 million, in contrast with a \$16.8 million (6.4%) contraction a year ago. The Bank's net liabilities to the rest of the public sector also increased by \$7.6 million to \$8.8 million, reflecting a build-up in their deposit balances. Liabilities to commercial banks contracted by \$76.0 million, a turnaround from a \$100.9 million (16.1%)

surge last year, which was associated with a bank's capitalization of a new subsidiary.

External reserves rose modestly by \$5.2 million (0.6%) to \$890.0 million, significantly below the previous year's \$114.7 million expansion, which featured several one-off public sector related foreign currency inflows. Following a \$105.9 million net purchase in 2011, the Bank's foreign exchange transactions reversed to a net outflow of \$0.6 million, with the net sale to public corporations—principally for fuel payments—firming by \$14.9 million to \$103.9 million. In addition, the Bank's net purchase from the Government was significantly lower at \$4.8 million from \$96.8 million a year earlier, while net receipts from commercial banks—linked mainly to real sector activities—rose slightly by \$0.4 million to \$98.5 million.

At end-March 2012, the stock of external reserves represented 18.3 weeks of non-oil merchandise imports, compared to 24 weeks in the same period of 2011. After adjusting for the 50% statutory requirement on the Bank's Bahamian dollar liabilities, "useable" reserves declined by \$68.7 million to \$430.8 million.

DOMESTIC BANKS

Credit to the private sector rose by \$20.2 million (0.3%), in contrast to an \$87.6 million (1.3%) contraction

in 2011. Net claims on the Government and credit to public corporations also advanced, by \$69.9 million (6.1%) and \$23.8 million (5.4%), a turnaround from respective declines of \$30.1 million and \$11.6 million a year ago. The reduction in commercial banks' net foreign liabilities was lower at \$22.9 million (3.8%), from \$43.0 million (6.2%) a year earlier.

Banks' deposit liabilities at end-March—inclusive of Government balances—rose by 1.7% to \$6,331.3 million, of which 95.8% represented local currency deposits. By holder, the largest share of Bahamian dollar balances was due to private individuals (57.3%), followed by business firms (26.5%), public corporations (6.0%), private financial institutions (3.8%), other "miscellaneous" entities (3.6%), Government (2.0%) and public financial institutions (0.8%).

In terms of the broad classifications, fixed deposit balances comprised the bulk (60.1%) of banks' deposit liabilities, followed by demand (22.0%) and savings (17.9%). Analyzed by range of value and number of accounts, the majority of Bahamian dollar balances (89.4%) was below \$10,000 and constituted 6.2% of the total value. Accounts ranging between \$10,000 and \$50,000 comprised 7.0% of the number and 10.9% of the total value of balances. However, accounts of over \$50,000 represented 3.6% of total deposits, but the bulk (82.9%) of aggregate value.

CREDIT QUALITY

Banks' credit quality indicators were slightly improved during the first quarter, influenced by a combination of seasonal factors and debt restructuring activities. Total private sector loan arrears declined, on both a quarterly and annual basis, by \$15.7 million (1.3%) and \$70.9 million (6.3%), to \$1,192.4 million—which was in line with the \$17.5 million (1.5%) contraction registered in 2011. The corresponding ratio of arrears to private sector loans narrowed by 30 basis points over the three-month period and by 69 basis points year-on-year, to 19.0%.

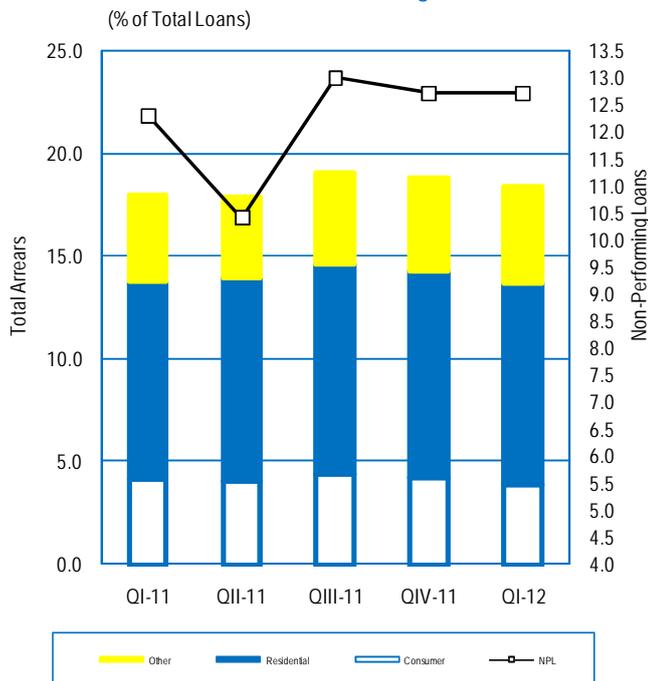

In terms of the major categories, the reduction in total arrears was primarily attributed to the \$17.4 million (6.4%) falloff in consumer delinquencies to \$254.0 million, reducing the attendant ratio over the quarter and year, by 0.73 and 0.22 percentage points, respectively, to 12.1%.

Mortgage arrears, which formed the bulk (53.4%) of the total, fell by \$13.8 million (2.1%) to \$636.3 million, and the corresponding ratio to total loans decreased over the quarter, by 47 basis points but rose on an annual basis, by 74 basis points to 20.7%. In contrast, commercial loan delinquencies deteriorated by \$15.5 million (5.4%) to \$302.2 million, and firmed by 0.7 of a percentage point to 27.3% during the three month period, and by 1.7 percentage points on a yearly basis, to 27.3% of total loans.

contrasted with a 17.9% expansion in the commercial segment.

Despite the improvement in arrears, commercial banks maintained their conservative posture, expanding provisions for bad debts by \$27.7 million (9.2%) to \$328.2 million over the three-month period. This incremented the ratio of provisions to total loans by 39 basis points to 5.1%. As a proportion of arrears and non-performing loans, total provisions firmed by 2.7 and 3.1 percentage points, to 27.5% and 40.0%, respectively.

Loan Arrears & Non-Performing Balances

BANK PROFITABILITY

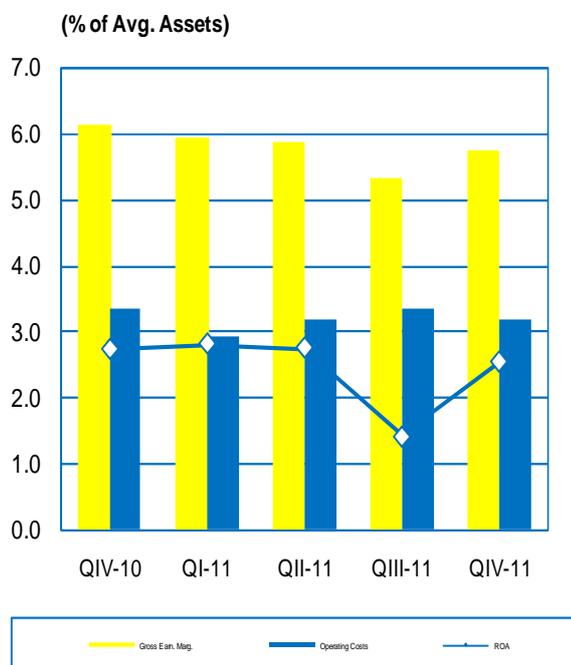

Reflecting the reduction in lending rates, bank's net income contracted during the fourth quarter of 2011, by \$4.2 million (6.5%) to \$60.1 million, in contrast to a 24.1% gain in 2010. Banks' net interest earnings fell by 6.3% (\$8.7 million) to \$129.3 million, as lower rates contributed to a 12.3% (\$23.7 million) reduction in interest income, which outpaced a 27.4% (\$15.0 million) decrease in interest expense. Some offset was provided by a rise in commission & foreign exchange fee income, by 4.6% (\$0.3 million) to \$6.1 million, moderating the decline in the gross earnings margin to 5.9% (\$8.5 million) for a total of \$135.4 million.

Total operating outlays fell by \$3.5 million (4.4%) to \$75.1 million, as a 15.6% reduction in "miscellaneous" operating expenses eclipsed gains in staffing and occupancy costs, by 1.7% and 12.9%, respectively. Losses on non-core operating activities moderated by \$0.8 million to \$0.1 million, attributed to reductions in depreciation expenses (\$1.6 million) and provisions for bad debts (\$0.7 million), which overshadowed a \$1.4 million (5.2%) contraction in other "miscellaneous" income.

By average age, non-performing loans—arrears in excess of 90 days and on which banks stopped accruing interest—rose modestly by \$5.4 million (0.7%) to \$821.5 million, increasing by 5 and 59 basis points over the quarter and year, respectively, to 13.1% of total loans. The rise in non-accrual loans was associated with an \$8.5 million (1.9%) growth in mortgage delinquencies, to \$458.6 million, which outpaced respective declines in both the consumer and commercial segments, of 1.7% and 0.1%. However, the short-term 31 – 90 days category contracted by \$21.1 million (5.4%) to \$370.9 million, owing to reductions in both consumer and mortgage delinquencies, of 13.9% and 11.1%, respectively, which

As a result of these developments, the majority of banks' profitability ratios—as measured against average assets—declined in comparison to 2010. The interest margin narrowed by 40 basis points to 5.47%, while the commission & foreign income ratio grew slightly to 0.26%, for a 39 basis points decrease in the gross earnings margin to 5.72%. With the operating cost ratio declining by 16 basis points to 3.18%, the net earnings margin ratio was lower by 22 basis points at 2.55%. After accounting for depreciation and bad debt provisions, the net income ratio was reduced by 19 basis points to 2.54%.

Domestic Banks' Profitability

INTEREST RATES

During the March quarter, commercial banks' weighted average interest rate spread narrowed by 43 basis points to 8.02 percentage points. The average lending rate decreased by 39 basis points to 10.25%, while the average deposit rate rose by 4 basis points to 2.23%.

Among deposits, the average rate declined by 17 basis points to 0.69% for demand balances, but broadened for fixed maturities, to 1.71% - 2.96% from 1.89% - 2.75%. Rates on savings deposits rose on average, by 27 basis points to 1.88%.

Broad-based reductions were registered for average lending rates. Average consumer and overdraft loan rates moved lower by 50 and 48 basis points, to 12.82% and 9.36%, respectively. Commercial mortgage rates fell marginally by 3 basis points to average 8.09%, while residential mortgage rates firmed on average, by 8 basis points to 7.58%.

The buoyancy levels in bank liquidity further depressed the average 90-day Treasury bill rate, by 61 basis points to 0.1%, while the Central Bank's Discount Rate and commercial banks' Prime Rate stabilized at 4.50% and 4.75%, respectively.

CAPITAL MARKETS DEVELOPMENTS

Conditions in the domestic equity markets resulted in a 4.1% reduction in the Bahamas International Securities Exchange's (BISX) All Share Index, to 1,308.9, extending the 1.7% contraction of 2011. The volume of shares traded was higher by \$0.5 million at \$0.9 million, although the corresponding value contracted by \$2.2 million to \$3.8 million. Market capitalization fell by approximately 6.9% to \$2,723.8 million, while the number of listed securities rose by 2 to 25.

INTERNATIONAL TRADE AND PAYMENTS

Provisional data for the first quarter of 2012 showed a widening in the estimated current account deficit, by \$70.7 million (25.0%) to \$354.1 million, in comparison to the corresponding quarter a year earlier. The outcome was attributed to an expansion in the merchandise trade deficit, linked to increases in both fuel and non-oil imports, which offset the tourism-led strengthening in the services account surplus. In a partial funding of the current account deficit by foreign investment inflows, the capital and financial account surplus firmed by \$13.5 million (3.8%) to \$366.2 million.

The merchandise trade deficit deteriorated by \$175.1 million (38.4%) to an estimated \$631.5 million. Increased imports related to foreign investment activity and domestic demand requirements elevated net non-oil imports by \$154.8 million (45.0%) to \$498.6 million, while higher international oil prices contributed to a \$24.0 million (12.3%) gain in net fuel purchases to \$219.1 million. Growth in oil imports was broadly based among the major components, with the highest increases being registered for jet fuel, aviation gas and motor gas, of 47.7% to \$139.08, 36.4% to \$171.87 and 14.8% to \$134.71 per barrel, respectively. The average cost of propane firmed more modestly by 2.6% to \$74.2, while the cost of bunker "C" gas was slightly lower by 0.2% to average \$87.21 per barrel.

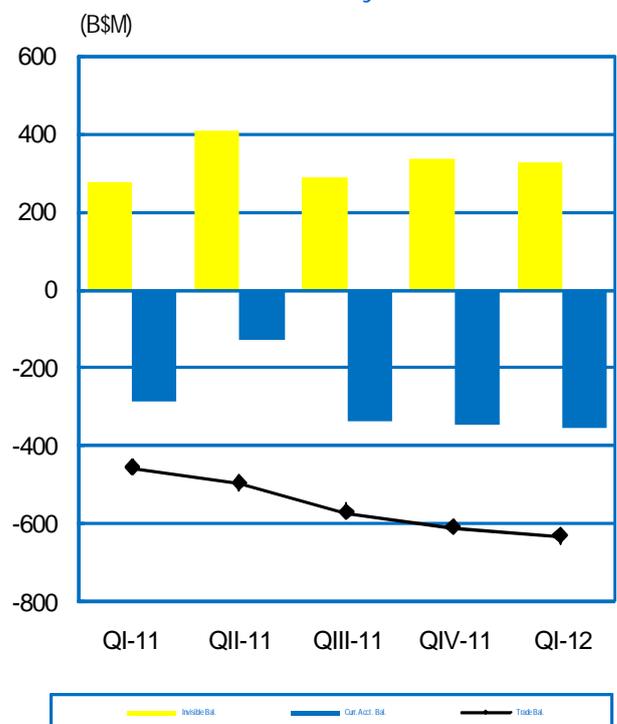

The estimated surplus on the services account was extended by \$50.1 million (18.1%) to \$327.2 million, owing mainly to a \$47.1 million (9.4%) improvement in net travel receipts to \$548.1 million. Government service transactions were reversed, to a net inflow of \$9.2 million from a \$4.7 million net outflow in 2011, while net receipts of offshore companies' local expenditures grew by \$2.9 million (7.6%) to \$40.9 million. Another positive factor in the overall outcome was the incidence of lower net outflows for insurance and other 'miscellaneous' services, down by \$22.8 million (35.2%) and \$16.4 million (18.2%) to \$41.9 million and \$73.6 million, respectively. Net payments for construction services, however, grew by \$24.8 million (37.9%) to \$90.3 million, linked to ongoing foreign investment projects, and higher import volumes and costs contributed to the upturn in net outflows for transportation services, by \$28.4 million (84.7%) to \$61.9

million. The net payment for royalty and licenses fees was relatively unchanged at \$3.3 million.

The income account deficit narrowed by an estimated \$3.8 million (6.1%) to \$59.1 million. There was a reduction in the net investment outflow by \$6.2 million to \$47.3 million, as net interest and dividend payments by private companies fell by \$5.5 million (9.9%) to \$50.4 million, and commercial banks' transactions were reversed to a net inflow of \$16.0 million from a marginal net payment of \$0.8 million. However, the net outflow by non-bank entities increased by \$11.3 million to \$66.5 million. In addition, net inflows from official transactions firmed marginally by \$0.6 million to \$3.1 million. Compensation payments to non-residents rose by \$2.3 million (24.2%) to \$11.8 million.

Net current transfer transactions were reversed to a \$9.4 million net inflow from a \$41.0 million net payment in 2011. This was explained by a decline in net "miscellaneous" outflows, by \$51.9 million to \$5.2 million, amid relatively stable worker remittances of \$17.4 million. In contrast, net receipts of the Government abated slightly by \$1.3 million (3.9%) to \$32.0 million.

Balance of Payments

The expansion in the capital and financial account surplus was solely attributed to a \$37.1 million (37.4%) advance in net “miscellaneous” investment inflows. Some \$17.8 million was attributed to increased external loan financing inflows, while the net repayment by domestic banks fell by \$19.4 million, and public sector capital transactions steadied at \$19.5 million. In a modest offset, net direct investment inflows, contracted by \$22.0 million (8.5%) to \$237.8 million, as the net receipt from equity investments and real estate sales declined by \$10.7 million and \$11.3 million, to \$235.2 million and \$2.6 million, respectively. In addition, capital transfers rose by \$1.0 million to \$1.6 million, and net outward portfolio investments, mainly under the Bahamian Dollar Depository Receipts programme, were higher by \$0.5 million.

After adjusting for net errors and omissions, the surplus on the overall balance, which corresponds to the change in the Central Bank’s external reserves, was significantly lower at \$4.6 million from the extraordinary transaction-led \$114.7 million in 2011.

INTERNATIONAL ECONOMIC DEVELOPMENTS

Sustained turbulence in the euro area, due to the continuing debt crisis, served to slow the pace of the global recovery during the first quarter of 2012. As a consequence, employment conditions remained challenging in several developed markets, while anaemic consumer demand contained inflationary pressures. Faced with weakening economic prospects, most major central banks either maintained or enhanced their accommodative monetary policy stance, boosting investor confidence and supporting broad-based gains in the major stock indices.

In the United States, real GDP growth slackened to 1.9% from 3.0% in the previous quarter, and was attributed to reductions in the build-up of private inventory and non-residential fixed investment. The United Kingdom’s economy slipped back into recession, as weak construction and production output occasioned a second consecutive quarterly decline in GDP of 0.3%. Despite steady improvements in Germany—the largest euro area economy—ongoing Government austerity programmes induced recessions in several southern states, leaving real GDP flat during the first quarter, following a 0.3% contrac-

tion in the previous three-month period. Economic conditions in Asia were mixed, with China’s year-on-year GDP growth maintained at a buoyant 8.1%, although slowing by 0.8 of a percentage point from the previous period’s expansion, due to decelerated growth of real estate developments and investments in fixed assets. Following a flat fourth quarter, Japan’s output advanced by 4.1%, benefitting from increased consumer and reconstruction spending, as the country continued to recover from the devastating events of 2011.

Reflecting the sluggish global recovery, employment conditions continued to show considerable slack within most of the major economies. In particular, the unemployment rate in the United States narrowed marginally by 0.4 of a percentage point to 8.3%, linked to gains in the manufacturing and food services sectors. United Kingdom’s jobless rate softened to 8.2% from 8.4% in the final quarter of 2011, as the number of unemployed persons declined by 45,000. With countries such as Spain and Greece recording double-digit unemployment rates of 23.8% and 21.6%, respectively, the jobless rate in the euro area firmed by 0.3 of a percentage point to 10.8% at end-March. More favourable growth dynamics within the major Asian economies held jobless rates in both Japan and China stable at 4.5% and 4.1%, respectively.

Inflationary pressures remained relatively subdued over the review quarter, amid weak consumer demand. Annual inflation slowed by 0.3 of a percentage point to 2.7% in the United States, as gains in food and energy prices abated. Higher costs for food, clothing and entertainment elevated average prices in the United Kingdom, by 3.5%, although subsiding from the 4.2% increase in the previous quarter. Euro area inflation steadied at 2.7%; however, increased costs for food and fuel resulted in a marginal 0.3% hike in Japan’s average consumer prices, relative to a contraction of the same magnitude in the previous quarter. In China, year-on-year inflation tapered by 0.5 of a percentage point to 3.6% at end-March.

Despite the increased global uncertainty, the US dollar recorded broad-based declines against most of the major currencies over the March quarter. In Europe, the dollar retreated against the euro, the Swiss Franc, and the British Pound, by 2.9% to €0.75, 3.8% to CHF0.90

and 2.9% to £0.62, respectively. The Canadian currency also appreciated against the dollar, by 2.2% to CDN\$1.00. In contrast, the outcome was mixed for Asian currencies, with the Chinese Renminbi down by 0.1% to CNY6.29, while the Japanese Yen strengthened by 7.2% relative to the dollar, to ¥82.87.

Buoyed by a series of monetary policy measures aimed at supporting economic growth, all of the major equity bourses rallied over the period. In Europe, Germany's DAX, France's CAC 40 and the United Kingdom's FTSE 100 advanced by 17.8%, 8.4%, and 3.5%, respectively. In the United States, the Dow Jones Industrial Average (DJIA) and the S&P 500 rose by 8.5% and 12.0%, respectively. Asian markets also rebounded, with Japan's Nikkei 225 surging by 19.3%, and China's SE Composite by a more subdued 2.9%.

Spurred by unfolding geopolitical tensions in the Middle East, alongside indications of improved economic conditions within the United States, oil prices grew by 14.9% to \$123.67 over the quarter. As investors increased their demand for relatively "safe assets", the average cost of silver and gold firmed, by 15.8% and 6.7%, to \$32.24 and \$1,668.15, respectively.

In a bid to support the fragile global recovery, most central banks within the major economies either sustained or enhanced their expansionary monetary policy measures over the quarter. The United States' Federal Reserve kept its key Fed Funds rate within the range of 0.00-0.25% and maintained the measures implemented in the third quarter of 2011, to lower long-term interest rates and support the economic recovery, by purchasing \$400 billion in Treasury bonds with 6-30 year maturities and selling the same value of bonds with maturities of 3 years or less. The Bank also reinvested principal payments from its holdings of agency debt and mortgage backed securities and rolled over maturing Treasury bills to bolster mortgage conditions. With inflation on a downward trajectory, the Bank of England held its policy rate at 0.5% and increased the size of its asset purchase programme, by £50.0 billion to £325.0 billion. Similarly, the European Central Bank kept its key interest rates unchanged and lent an additional €530.0 billion to euro area banks under its long-term refinancing facility, to ensure the stability of the financial sector. In China, the country's central bank left the main lending and deposit rates

unchanged but, in a bid to spur economic activity, reduced the banks' reserve requirement ratio by 50 basis points. The Bank of Japan sustained measures to support the country's economic recovery, by increasing the amount of credit available through its Growth-Supporting Funding Facility, from ¥3.5 trillion to ¥5.5 trillion, and expanding its Asset Purchase Programme by ¥10 trillion to ¥65 trillion. The Bank also left its uncollateralised overnight call rate between 0.0% - 0.1%.

External sector developments were mixed, as the weakness in Europe led to worsening terms of trade among its major trading partners during the first quarter, in comparison to the December period. In the United States, the trade deficit deteriorated by 6.2% to \$149.8 billion, as the 3.3% advance in imports outpaced the 2.6% improvement in exports. Similarly, the United Kingdom's trade deficit widened by 3.3% to £25.0 billion, due solely to a rise in imports by £0.8 billion, as exports were unchanged. In the euro area, a surge in net exports resulted in an €11.8 billion reduction in the trade surplus to €2.6 billion. The export driven Japanese economy recorded its fourth consecutive trade deficit, as reconstruction efforts supported a 1.1% gain in imports which, when combined with a similar contraction in exports, resulted in a ¥360.6 million expansion in the trade deficit to ¥1.5 billion. The Chinese trade situation deteriorated significantly during the review period, owing to a reduction in demand from Europe—the country's largest trading partner. As a consequence, exports plunged by 15.1% against a 6.5% hike in imports, to occasion a US\$47.6 billion reduction in the trade surplus to US\$0.67 billion.

*Debt servicing for 2009 includes the refinancing of \$297 million and \$235 million in Public Corporations' and Government's debt, respectively. Net of these transactions, the Government's debt service/revenue ratio was 2.7%.

** Outstanding debt at end-June 2011 excludes \$32.063 million in outstanding debt of The Bahamas Telecommunications Company, which was privatized in April 2011.

*** Outstanding debt at end-Dec 2011 includes \$50.0 million in outstanding debt of The Nassau Airport Development Company, previously held by the Government.

INTRODUCTION

The Central Bank's 2011 survey on the gross economic contribution of the financial sector—which constitutes an estimated 15% of the country's gross domestic product—captures the sector's ongoing importance to the domestic economy in terms of job opportunities and direct outlays. Generally, banks and trust companies' operations remained relatively stable during 2011, despite continuing challenges posed by mild domestic economic conditions for the commercial banks, and higher market volatility, compounded by an onerous global regulatory environment for international banking activities. The non-bank financial service providers, inclusive of insurance companies, credit unions, mutual fund administrators and financial and corporate service providers also registered stable outcomes during the year.

THE BANKING SECTOR

Banks and trust companies account for the largest segment of the financial sector's contribution to the domestic economy, in terms of employment, spending and the scale of their operations and assets.

During 2011, the total number of banks and trust companies licensed to operate in The Bahamas increased by a net of 2 to 278, following a gain of 4 in 2010. Growth was limited to the restricted trust and nominee trust licensees, which rose by 5 to 155, while public banks and trust licensees fell by 2 to 116 and non-active licensees decreased by 1 to 7. The public licensee group included 74 Bahamian incorporated entities, 24 euro-currency divisions of foreign banks and trust companies, and 18 domestic banks. Among the domestic banks, there were 10 authorized agents, largely providing trust and wealth management services and limited Bahamian dollar business, and 8 authorized dealers or commercial banks.

In 2011, the operational environment for the eight (8) domestic commercial banks was shaped by persistently high liquidity and anaemic private sector credit growth, amid very mild consumer demand. Total assets

of the domestic banking system expanded by 1.1% (\$106.4 million) to \$9.5 billion, supported by moderate gains in loans and holdings of Government securities.

As borrowers experienced persistent difficulty in meeting loan commitments, the level of domestic arrears and non-performing loans remained elevated, at 19.3% and 13.0% of total private sector loans, respectively. However, banks' average capital ratios rose by 1.6 percentage points to 27.6% of total risk weighted assets during the year, considerably in excess of the Central Bank's requirements. Overall, profitability levels were maintained during 2011, mainly as a result of lower provisions against loan losses, while the downward adjustment in interest rates, in June, had only a marginal effect on average rates on new loans.

On the international side, firms had to contend with, *inter alia*, renewed volatility and uncertainty in market conditions, weakened investment allocations and returns, and a stepped-up global regulatory agenda, which necessitated strategic reviews and adjustments to business models. Despite the challenges faced by the sector, total assets of the international banks and trust companies rose by 12.6% (\$65.7 billion) to \$588.3 billion.

EMPLOYMENT

Employment outcomes in the banking sector continued to reflect measures taken by firms to consolidate and rationalise operations, amid slowed growth opportunities. Preliminary data placed total employment in the banking sector lower by 2.3% (113) at 4,795 persons, compared to a slight 0.1% gain in 2010 and an annual average growth of 1.1% over the preceding five (5) years. Bahamian employees declined by 2.3% (108) to 4,500 and non-Bahamian employees, by 1.7% (5) to 295—leaving their respective proportions of total employment unchanged at 93.8% and 6.2%. Nearly 71% of Bahamians were engaged in local banking activities, and the remainder in offshore banking, trust administration and related wealth management services.

Banking Sector Employment

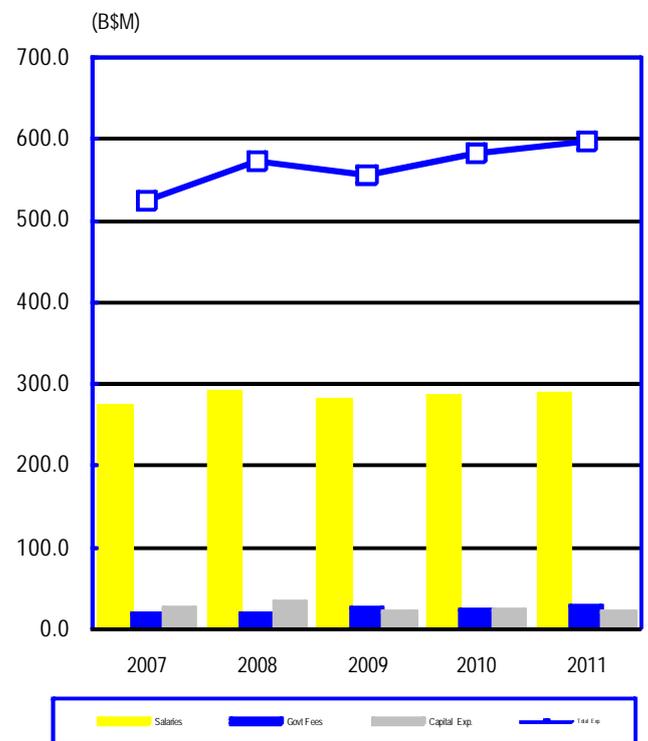

EXPENDITURES

Despite the moderation in employment levels, higher outlays for salary, administrative costs and Government fees led to total spending rising by an estimated \$13.6 million (2.3%) to \$595.2 million—following the \$27.8 million (5.0%) gain in 2010.

Operational costs, at some 96.2% of total expenditures, grew by 2.9% to \$572.8 million, a slowdown from the 4.5% expansion of the prior year and 5.7% average growth for the preceding five years. Salary payments accounted for more than half of these outlays, and were up by 0.6% (\$1.7 million) at \$288.2 million, compared with a 2.1% rise in 2010. Base salaries steadied at \$253.6 million, while bonuses rose by 5.5% (\$1.8 million) and staff training outlays were higher by 11.2% (\$0.2 million) compared to 13.4% for 2010.

Approximately 5.1% of outlays represented fees paid to Government, which grew by 15.1% (\$3.8 million) to \$28.9 million, in contrast to a 2.7% falloff in 2010. Reflecting recent hikes in fees payable by domestic banks, licensing costs increased by \$4.3 million, to negate a \$0.7 million decline in other “miscellaneous” fee payments. In addition, administrative expenses totalled \$253.3 million, inclusive of lease payments and

Banks' Local Expenditure

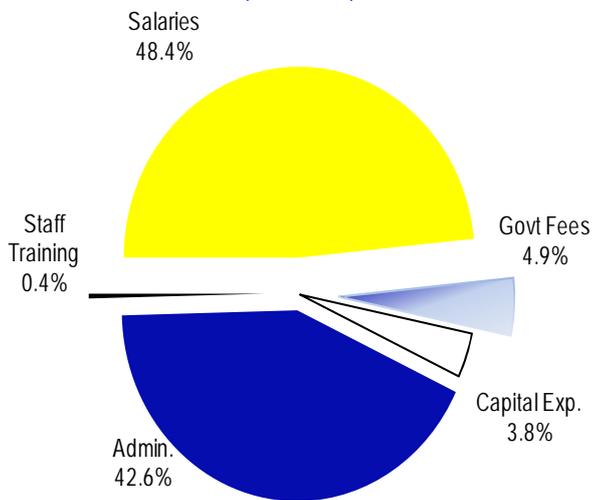

management fees for outsourced operations, and accounted for some 44.2% of the aggregate—up \$10.3 million (4.2%) from 2010. Utility payments grew by 1.9% to \$25.1 million, and contributions to charitable organisations firmed by 3.2% to \$2.1 million. Amid a sharp decline in expenditures for new premises, as banks focused their attention on renovating existing properties, capital spending fell by 9.7% to \$22.4 million, a turnaround from the 18.1% boost a year earlier.

DOMESTIC VERSUS INTERNATIONAL BANKING

A disaggregated analysis of domestic and international banking operations emphasizes the more retail oriented and staff intensive nature of the domestic banks. This compares with the specialized focus of the international banks in wealth management operations and other high value-added services, which tend to be more relationship focused and require a highly trained workforce.

Banks' Expenditure Components (% of Total)

(6 persons), following the prior year's 5.2% reduction. Correspondingly, the ratio of Bahamians to non-Bahamians fell to approximately 3:1 from 4:1.

During 2011, total expenditure of domestic firms increased by 4.0% (\$13.9 million) to \$363.6 million, or 61.1% of the banking sector's total spending, although moderating from the 6.2% (\$20.5 million) rise in 2010. Operational costs, at 95.7% of the total, were higher by 5.7% (\$18.9 million) at \$348.0 million, due mainly to growth in other administrative costs of 9.6% (\$13.6 million). Increased license fees led to higher payments to the Government, by 37.2% (\$5.4 million), a reversal from a 2.0% (\$0.3 million) decline in the prior period. Staff training outlays also advanced by 36.4% (\$0.4 million) to \$1.5 million, whereas reduced construction activity lowered capital expenditure by 24.3% (\$5.0 million) to \$15.6 million. In contrast, salary payments fell marginally by 0.3% (\$0.6 million) to \$171.2 million, as the gain in average salaries by 0.6% at \$42,024.00, was outpaced by the 6.3% decline in bonus payments to \$4,184.00.

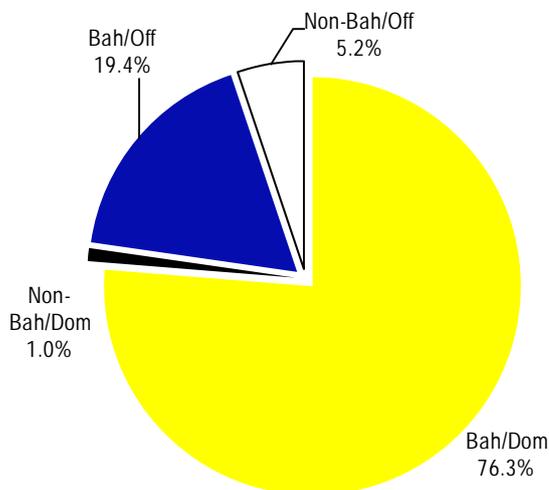

EMPLOYMENT

Employment in domestic banks declined by 0.3% (11 persons) to 3,705, relative to a 0.7% gain in 2010. For the international banking sector, the broad based contractions resulted in employment falling by 8.6% (102) to 1,090 persons, exceeding the 2.0% decline a year earlier. As a result, domestic banks' share of total sector employment firmed by 1.6 percentage points to 77.3%, while the international banks share declined by an equivalent percentage to 22.7%.

A further breakdown showed a reduction in the number of Bahamians employed by domestic banks, by approximately 12 persons (0.3%) to 3,657, vis-à-vis a 0.4% increment in 2010 and a more elevated average annual growth rate of 1.2% in the five years to 2010. The number of non-Bahamians was incremented by 1 to 48, after a net gain of 11 persons a year earlier; however, on average, non-Bahamians employed in the sector declined by 5.1% between 2006 and 2010. As a result, the ratio of Bahamians to non-Bahamians trended downwards, to 76:1 in 2011, from 78:1 in 2010.

In the international sector, the decline in Bahamian employees was higher at 10.2% (96 persons), to 843 persons, from a 1.1% (10 persons) contraction in 2010. Non-Bahamian workers also decreased by 2.4%

Employment: Domestic & Int'l Banks (2011)

In the international sector, total outlays declined marginally by 0.2% (\$0.4 million) to \$231.6 million. Operational expenditures fell by 1.3% (\$3.1 million) to \$224.7 million, with employee compensation up by 1.9% (\$2.2 million) to \$117.0 million, a reversal from a 1.8% (\$2.1 million) decline a year earlier. Reflecting the improvement in salaries, the average base wage grew

by 8.7% (\$7,183.00) to \$89,817.00 and bonus payments firmed by 28.1% (\$3,848.00) to \$17,523.00. However, Government-related fees fell by \$1.7 million (15.9%) to \$9.0 million and outlays for staff training decreased by \$0.2 million to \$0.9 million. Other administrative expenses were lower by 3.3% (\$3.3 million) at \$97.9 million, relative to the 10.7% rise in 2010. Capital spending grew by \$2.6 million (62.0%) to \$6.8 million in 2011, to reverse the year-earlier 8.7% contraction.

OTHER FINANCIAL SECTOR ACTIVITIES

INSURANCE SECTOR

Preliminary indications are that activity in the insurance sector continued to expand at a modest pace, despite some consolidation within the industry aimed at achieving greater cost efficiencies. Based on data from the Insurance Commission of The Bahamas, the number of licensed operations was lower by 51 at 127, partly due to declines in domestic agents & brokers, by 31 to 57, general (non-life), by 24 to 11 and life insurance companies, by 6 to 11.

Domestic insurers' performance indicators were mixed. The total value of assets held fell marginally by 0.3% (\$3.7 million) to \$1,323.9 million, as the decline in the assets of life insurance companies, by 1.5% (\$14.1 million), outpaced an increase in the non-life component of 2.9% (\$10.3 million).

Provisional statistics from the Central Bank's annual survey revealed that, despite the reduction in licensed operators and assets, employment in the sector grew by 4.5% (69 persons) to 1,608. Growth was solely in the Bahamian component, which accounted for 98.3% of the sector's employment, at 1,581, while the number of non-Bahamian employees steadied at 27. Salaries for the sector—excluding bonuses—were up by an estimated \$1.6 million to \$57.3 million; however, the average compensation for full-time employees contracted by 1.9% to \$43,828.00. Government fee payments increased by 20.2% (\$2.8 million) to \$16.6 million, while miscellaneous administrative costs were up by 3.3% to \$30.6 million. Capital outlays, public utility payments and staff training costs were relatively stable at \$11.3 million, \$9.8 million and \$2.5 million, respectively.

CREDIT UNIONS

Preliminary reports on the credit union sector showed steady gains in activity in comparison to 2010. Total assets of the ten (10) entities in the sector increased by an estimated \$25.7 million (10.3%) to \$274.3 million, following a 5.6% expansion in 2010. The outcome was buoyed by gains in loan portfolios, by 5.2% to \$178.6 million, and liquid investments by 53.0% to \$46.3 million. Estimated revenues for the sector expanded slightly by 1.7% (\$0.4 million) to \$25.0 million, while operational outlays rose by 9.4% (\$1.0 million) to \$11.8 million, occasioned mainly by higher salaries and occupancy costs, of 13.5% and 19.3%, respectively.

According to the Bank's survey of these institutions, at end-2011 credit unions employed 108 Bahamians—a net reduction of 4 from 2010.

INVESTMENT FUNDS INDUSTRY

Data compiled by the Securities Commission of The Bahamas showed a mixed outcome in terms of licensing activity. The number of approvals granted for Securities Investment Advisors increased to twenty-one (21), from seven (7) a year earlier, due in part to the advantages which companies obtain from utilising management representatives rather than establishing a physical presence. Significantly fewer licenses were granted for Broker Dealers Class I (3) & II (1) and Facilities (1), compared to 2010 when only two (2) licenses were issued for Broker Dealers Class II and none for the other categories. The number of individuals licensed rose by nineteen (19) to one hundred and six (106) and were broken down into Principals (48), securities investment advisers (33), associated persons (15) and brokers (10). In terms of investments, a total of 138 funds and 5 investment fund administrators were licensed in 2011, representing increases over the one hundred and twenty (120) and three (3) recorded in 2010. Further, the number of financial and corporate service providers' licenses fell by three (3) to thirty-three (33)—the bulk of which (22) comprised company registrations.

Active investment funds declined in number by 5.3% (40) to 713, exceeding the 4.4% contraction of 2010. This outturn, reflected significant reductions in the number of Recognized Foreign Funds and Standard Funds, by 54 to 104 and by 20 to 50, respectively, which

outpaced gains in SMART funds (by 23 to 305) and Professional Funds (by 11 to 254).

Indications are that employment within the sector stabilized, as the total number of investment fund administrators—the major source of employment—held steady at 65, with the unrestricted segment accounting for the bulk (52%) of the total. In addition, the number of active funds under management by administrators firmed by 1.6% (11) to 680.

INTERNATIONAL BUSINESS COMPANIES (IBCs)

Despite the challenges facing the international business sector, preliminary data showed a total of 2,438 new IBC registrations for 2011, bringing the total number to 163,231 at end-2011, slightly above 2010's 2,388 new registrants. However, fees paid to the Government, largely for annual renewals, declined by 3.8% to \$17.6 million, extending the 8.8% reduction for 2010.

OTHER FINANCIAL SECTOR DEVELOPMENTS

The Bahamas continued to progress initiatives aimed at enhancing the resiliency of the financial services sector, including its compliance with international regulatory standards and codes.

In the area of information exchange, The Bahamas executed an additional six (6) Tax Information Exchange Agreements (TIEAs) in 2011, having concluded agreements with Japan, India, the Republic of Korea, Guernsey, Aruba, and South Africa. This brings the number of TIEAs to twenty-eight (28)—including eleven (11) with members of the G20 group of countries.

On the regulatory and legislative front, there were a number of changes to enhance supervisory and oversight activities. For the Central Bank, progress was made towards the full implementation of the Risk Based Supervision Framework (RBSF), as a means of enhancing the Bank's understanding of firms' business strategies, risk management and internal control functions, and achieving more effective and efficient use of its supervisory resources. Work on the implementation of the Market Risk Amendment also progressed, and the stress-testing model was expanded to include liquidity and interest rate risks along with credit risks, and tests were conducted to estimate both the resilience of individual domestic banks' capital levels and the system as a whole, to a combination of extreme, yet plausible, stress scenarios.

In an effort to enhance the regulatory and legislative oversight framework for its licensees, in 2011, the Central Bank brought into force: The Banks and Trust Companies (Amendment to the Third Schedule) Regulations, 2011, the Banks and Trust Companies Regulations (Amendment) Act, 2011 and the Banks and Trust Companies (Large Exposure) (Amendment) Regulations. Further, the schedule to the Banks and Trust Companies (Money Transmission Business) Regulations, 2008 was modified to establish a new fee payable by money transmission service providers for each location where a money transmission agent operates on behalf of the service provider. Other new pieces of legislation implemented included the Banks and Trust Companies (Auditors) (Facts and Matters of Material Significance), 2011, and Banks and Trust Companies (Liquidity Risk Management) Regulations.

Another important sector development was the coming into force of the Securities Industry Act, 2011, on 30th December 2011, which included new standards and requirements for all participants in the securities and capital market, as well as non-participant entities. It strengthened, inter alia, provisions to enable the Securities Commission to act and respond to issues arising within domestic securities markets.

Among the initiatives aimed at streamlining the regulatory space regime was the commencement of the project to transition credit union supervision from the Department of Cooperatives to the Central Bank. The project commenced in September 2011, with the engagement of a Credit Union Technical Adviser, under a three-year technical assistance programme sponsored by the Commonwealth Secretariat. Since then, steady progress was made towards achieving the two overarching project objectives, the first of which is the institutional strengthening of credit unions' operations through a comprehensive assessment of their operations, and the delivery of appropriate training to ensure consistency and compliance with international standards. The second mutually reinforcing project objective focuses on strengthening the regulatory regime, which includes the formulation of the transition plan, reviewing and making changes to the existing regulatory framework and the provision of other capacity building opportunities for the regulator and the credit union boards and management.

During the year, regulators worked closely on preparations for the International Monetary Fund's Financial Sector Assessment Programme (FSAP) mission scheduled for July, 2012. The objectives of the FSAP are to identify financial system strengths, vulnerabilities and risks, and seek, inter alia, to transfer expertise and best practices, and to help the authorities design policy responses to improve the stability and resiliency of the financial system. One aspect of the FSAP is an assessment of The Bahamas' observance with international standards, codes and guidelines in the quality of supervision of the banking [the Basel Core Principles for Effective Banking Supervision (BCP)]; insurance [International Association of Insurance Supervisors' (IAIS) Insurance Core Principles] and securities [International Organization of Securities Commissions' (IOSCO) Objectives and Principles of Securities Regulation] sectors. Earlier self-assessments completed in 2009, and updated by the regulators, were used to identify gaps in their respective legal and regulatory frameworks and develop action plans for addressing such gaps. The FSAP exercise will also examine potential financial stability risks, using stress testing models. Among the documents to be produced at the end of the FSAP, is a Financial System Stability Assessment (FSSA) report, which will contain a summary of the financial sector risks and vulnerabilities, along with a summary of The Bahamas' observance of the various international standards and codes governing regulated activities.

CONCLUSION AND OUTLOOK

The Bahamian financial services industry continues to demonstrate resilience in the face of ongoing challenges brought on by the global crisis, which have heightened regulatory requirements and squeezed operating margins. Prospects for growing the sector remain favourable, as private/public initiatives focus on exploiting increasing wealth management business opportunities in the emerging markets. The Bahamas' commitment to maintaining a competitive enabling environment, in terms of quality services, a robust, yet adaptive, regulatory and legislative regime, and alignment with international best practices in the an area of transparency, should support this broadening growth objective.
