## REVIEW OF ECONOMIC AND FINANCIAL DEVELOPMENTS

## Domestic Economic Developments

Indications are that the Bahamian economy continued to strengthen during the second quarter of 2004, led by more firmly established tourism expenditure growth. In particular, the improving US economy continued to provide healthy stimulus for stopover visitor gains, while cruise line business rose substantially. Construction output, while poised for a significant pickup in activity during the remainder of 2004, remained sluggish during the second quarter; albeit, with initial signs of increased expenditures on major resort developments planned for New Providence. On the fiscal side, provisional estimates foreshadowed some consolidation in the budget deficit during both the second quarter and the entire Fiscal Year, based on modest revenue growth and curtailment in public sector investments. In the financial sector, stronger net foreign currency inflows supported a rebound in the monetary aggregates which coincided, however, with an upturn in domestic credit. As a result, bank liquidity was marginally reduced but financial institutions' net foreign liabilities decreased and average interest rates softened on both loans and deposits. Despite increased energy costs, average inflation eased during the second quarter as internal cost pressures abated. On the external account, gains in net travel receipts contributed to a reduction in the current account deficit, while a decrease in net private loan and real estate inflows narrowed the estimated surplus on the capital and financial account.

The economic expansion is expected to continue at a healthy pace in the medium term, owing to the upbeat outlook for the United States' economy, the primary market for tourism, and a steady pick up of construction activity connected with major hotel and industrial sector developments. However, damage caused by Hurricane Frances during September 2nd - 4th could disrupt tourism inflows over portions of the third and fourth quarters, particularly in Grand Bahama and the Family Islands. As the impact will be felt during the slowest months of the tourist season, the industry is still expected to experience cumulative growth in 2004 and to resume its robust
uptrend in 2005. The economy should experience some offsetting upsurge in construction expenditures on rebuilding activities, with the corresponding balance of payments impact tempered by re-insurance inflows.

During the second quarter, intensified local currency lending curtailed further build-up in bank liquidity, as net free cash balances decreased marginally by $0.5 \%$ to $\$ 189.6$ million and surplus liquid assets by $4.6 \%$ to $\$ 226.8$ million. However, excess balances constituted a larger $4.7 \%$ share of Bahamian dollar deposit liabilities compared to $3.4 \%$ last year, and liquid assets exceeded the statutory minimum by a greater $34.5 \%$ as compared to $24.7 \%$ in 2003. Buoyancy in liquidity supported some narrowing in the average interest rate spread on banks' loans and deposits, by 16 basis points to 7.39\%; the softening in the weighted average loan rate, by 34 basis points to $11.23 \%$, outpaced the counterpart 18 basis points decrease in the average deposit rate to $3.84 \%$. The average 90-day Treasury bill rate also fell by 23 basis points to $0.71 \%$, while base rates-commercial banks' Prime and the Central Bank Discount Rate-were unchanged at $6.00 \%$ and $5.75 \%$, respectively.

During the quarter, the money supply (M3) expanded by $4.1 \%$ to $\$ 4,355.7$ million, reversing the yearearlier contraction of $0.1 \%$. More sizeable gains in business and private individuals' holdings resulted in respective rebounds in demand and fixed deposits of $11.3 \%$ and $1.3 \%$, from reductions of $1.1 \%$ and $0.3 \%$ last year. Also, savings deposit growth firmed to $4.3 \%$ from $3.6 \%$, and resident's foreign currency deposits recovered by $5.7 \%$, while growth in currency in active circulation firmed to 4.8\%.

Domestic credit also rebounded, on a comparative basis, by $2.0 \%$ to $\$ 5,144.6$ million, following the 2003 decline of $1.4 \%$. After a net repayment of $1.0 \%$ in 2003, claims on the private sector rose by $2.0 \%$, with a $1.7 \%$ upturn in consumer lending, while improved credit conditions for businesses and productive ventures bolstered the slowed increase in residential mortgages of 3.3\%. In the public sector, a revival in net Bahamian dollar borrowing raised the banking sector's net claims on Government
by $6.3 \%$, reversing a $3.6 \%$ decline in 2003. However, public corporations claims were further reduced by $5.1 \%$.

Signs of some stabilization emerged on the fiscal front, with the comparative deficit for the first eleven months of FY2003/04 slightly narrowed, by $0.8 \%$ to $\$ 85.6$ million. Partly underpinned by improved economic conditions, revenue collections rose by $5.4 \%$ to $\$ 867.6$ million, maintaining pace with growth in total expenditures of 4.8\% to $\$ 953.2$ million. Revenue gains were largely impacted by $\$ 15.0$ million in capital receipts, following the sale of Government equity investments in the capital markets, while the increase in tax receipts narrowed to $2.5 \%$ from $4.9 \%$ last year. On the spending side, current outlays rose by $7.1 \%$ to $\$ 867.6$ million, exceeding both the $14.6 \%$ reduction in investments and the $14.2 \%$ decrease in net lending to the public corporations. Budgetary financing for the eleven months through May 2004 included net borrowings of $\$ 20.3$ million in Bahamian dollars and $\$ 68.7$ million in foreign currency. Taking account of June's transactions, the Direct Charge on Government rose by $\$ 2.0$ million ( $0.1 \%$ ) during the quarter, culminating in a narrowed $\$ 88.9$ million (4.7\%) advance to $\$ 1,943.4$ million during FY2003/04. Government guaranteed debt decreased by $\$ 21.0$ million (4.9\%) during the quarter, while increasing by $\$ 22.9$ million (6.0\%) to $\$ 408.1$ million for the Fiscal Year. As a result, the National Debt was reduced by $\$ 19.0$ million ( $0.8 \%$ ) to $\$ 2,350.3$ million during the quarter, and registered a tapered rise of $\$ 111.8$ million (5.0\%) for the Fiscal Year vis-à-vis $\$ 154.2$ million (7.4\%) in the comparative period a year ago.

Rising hotel occupancy levels and a strong upsurge in cruise activity sustained robust tourism expenditure growth during the second quarter. Visitor growth quickened to $18.7 \%$ from $5.5 \%$ last year, for 1.4 million arrivals. Gains in both air and sea traffic exceeded yearearlier advances, at $9.8 \%$ and $23.2 \%$ from $2.3 \%$ and $7.2 \%$, respectively. Broad-base improvement included the cruise-led 21.5\% surge in visitors to New Providence, a $26.0 \%$ recovery in arrivals to Grand Bahama and a steady $10.0 \%$ uptrend in the Family Islands. On the expenditure side, double digit growth in the cruise sector was accompanied by healthy stopover inflows, mainly boosted by increased hotel occupancy. Quarterly data for New Providence revealed a 4.9\% rise in estimated room expenditures, attributed to a similar hike in occupied
room nights, while in the first two months of the quarter, Grand Bahama recorded a strong revenue improvement of $37.1 \%$ for similar reasons. In the Family Islands, room revenue gains of $6.6 \%$ during April and May were mainly supported by the $11.9 \%$ appreciation in the average nightly room rate, which countered some softening in total room night sales.

Although construction expenditures remained subdued during the second quarter of 2004, the reduced mortgage financing of local housing developments was offset by a pickup in commercial outlays, including the start of work on the Atlantis Phase III expansion on Paradise Island. Mortgage data from banks, insurance companies, and the Bahamas Mortgage Corporation indicate that, compared to last year, the estimated value of commitments for new construction and building repairs decreased by $12.8 \%$ to $\$ 19.5$ million. A more than twothirds falloff in commercial commitments outweighed a $2.4 \%$ rise in residential loan approvals, which still represented the bulk of the total (92.1\%). Although only partially indicative of actual construction activity, also containing equity-based drawdown for other purposes, mortgage disbursements rose by $5.6 \%$ to $\$ 75.7$ million, with higher outlays against commercial loans exceeding the reduction in residential advances. Meanwhile, average interest rates were incrementally more favourable on both residential and commercial borrowing, at $8.8 \%$ and 9.4\% compared to $8.9 \%$ and $9.6 \%$ respectively, during the second quarter of 2003.

Inflation, as measured by the quarterly change in the average Retail Price Index, eased to $0.2 \%$ during the second quarter from $0.4 \%$ in 2003, mainly influenced by stable housing costs, a smaller rise in transportation \& communications costs and a marginal decrease in average education costs. On a 12 -month basis, inflation moderated to $1.8 \%$ through June from $2.8 \%$ in 2003. Significantly slowed average price gains for recreation \& entertainment services, furniture \& household operations, education and "other" unclassified goods \& services, countered the sharp run-up in average costs for medical care \& health services (10.6\%) and the fuel-related rise in transportation \& communications costs.

In the external sector, the quarter's current account deficit narrowed to an estimated $\$ 68.7$ million from $\$ 83.3$ million in 2003. Stronger import demand exceeded the improvement in export receipts, broadening the trade
deficit by $8.6 \%$ to an estimated $\$ 334.5$ million. This was more than offset by the $14.4 \%$ widening in the services surplus, led by a $15.3 \%$ upswing in tourism-related net travel inflows. Also, reduced profit repatriations lowered net income remittances by $15.8 \%$ to $\$ 33.7$ million, outweighing the increase in net transfer payments of $7.4 \%$ to $\$ 19.5$ million.

The capital and financial surplus narrowed to $\$ 4.1$ million from $\$ 41.8$ million in 2003, with net private foreign investment inflows approximately halved to $\$ 57.5$ million. Although net direct equity inflows strengthened to $\$ 56.1$ million from $\$ 11.5$ million, net real estate sales softened to $\$ 2.1$ million from $\$ 30.8$ million and a net private loan financing repayment of $\$ 0.8$ million was recorded, contrasting with net financing of $\$ 69.6$ million last year. The financial outcome also included a reduction in the public sector's net external debt repayment to $\$ 3.7$ million from $\$ 3.9$ million and a decrease in net short-term outflows through the banking system to $\$ 40.8$ million from $\$ 58.8$ million.

## FISCAL OPERATIONS

Provisional estimates for the first eleven months of FY2003/04 indicated a cumulative budget deficit of $\$ 85.6$ million-a nearly similar outturn registered in the comparative period a year ago. Strengthened revenue growth of $5.4 \%$ to $\$ 867.6$ million, slightly exceeded the 4.8\% increase in total expenditures to $\$ 953.2$ million. Compared to the budget for FY2003/04, the 11 months revenue and expenditure estimates represented a respective $87.5 \%$ and $85.5 \%$ of the estimates. Indications are that the final results for FY2003/04 will reveal some consolidation from the previous year's fiscal deficit of $\$ 187.7$ million, based on the slower advance in the Direct Charge.

## Revenue

Revenue collections during the first 11 months strengthened by $\$ 44.1$ million (5.4\%), following a $4.1 \%$ advance the previous year. Despite an abated $\$ 19.2$ million (2.5\%) increase in tax collections to $\$ 776.7$ million, non-tax receipts recovered by $\$ 9.9$ million (15.0\%) to $\$ 75.9$ million and the Government realized capital revenue of $\$ 15.0$ million from the sale of equity investments in
the Bank of The Bahamas and Cable Bahamas. On a proportional basis, tax receipts comprised $89.5 \%$ of revenue, followed by non-tax flows at $8.8 \%$ and capital revenue, the remaining $1.7 \%$.

Noteworthy developments under tax revenue included a $\$ 9.0$ million (19.1\%) upturn in departure taxes to $\$ 56.0$ million and improved property tax collections of $0.7 \%$ to $\$ 36.0$ million. Taxes on international trade and transactions (mainly import duties) decreased by $\$ 12.1$ million (2.8\%) to $\$ 419.9$ million, constituting $48.4 \%$ of the total and although visitor volumes improved, recorded taxes on selected tourism services decreased by $\$ 1.9$ million (6.5\%) to $\$ 27.5$ million, with declines in both gaming (11.6\%) and hotel occupancy taxes (3.1\%). However, these were mitigated by the $\$ 21.6$ million ( $26.3 \%$ ) rise in "other" unclassified proceeds to $\$ 104.0$ million, which include revenues yet to be distributed to their respective categories. Among other tax categories, collections from motor vehicle inspection and licensing decreased by $\$ 2.0$ million ( $16.0 \%$ ) to $\$ 10.7$ million; whereas stamp taxes on financial and other transactions rose by $7.4 \%$ to $\$ 77.9$ million and the $19.1 \%$ hike in departure taxes to $\$ 56.0$ million, was more in line with increased visitor volumes.

The rebound in non-tax flows, which accounted for $8.8 \%$ of total revenue, was due to a $\$ 6.7$ million (15.0\%) upturn in collections of fines, forfeitures and administration fees to $\$ 51.6$ million and a $\$ 5.9$ million (36.6\%) boost in income from other sources to $\$ 21.9$ million. These exceeded the $\$ 2.2$ million (52.1\%) falloff in income from public enterprises to $\$ 2.0$ million and a halving in revenue from the sale of Government property to $\$ 0.5$ million.

## Expenditure

Higher recurrent spending of $\$ 57.9$ million (7.1\%) to $\$ 867.6$ million, contributed to nearly doubled expenditure growth of $4.8 \%$, compared to $2.7 \%$ over the same period the year before. This contrasted with a $\$ 9.6$ million (14.6\%) reduction in capital outlays to $\$ 55.9$ million and a $\$ 4.9$ million (14.2\%) decrease in net lending to public corporations to $\$ 29.7$ million. On a proportional basis, recurrent expenditures accounted for $91.0 \%$ of overall spending; capital outlays, $5.9 \%$ and net-lending, $3.1 \%$.

| Government Revenue By SourceYTD - May |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | FY 02/03p |  | FY 03/04p |  |
|  | BSM | BSM | B\$M | \% |

| Less: Refunds | 4.6 | 0.6 | 6.0 | 0.7 |
| Total | 823.5 | 100.0 | 867.6 | 100.0 |

Analysis of current spending by economic classification indicated a $6.3 \%$ increase in Government consumption to $\$ 553.2$ million, with a further $\$ 25.8$ million ( $7.2 \%$ ) hike in the wage bill and a $\$ 7.0$ million (4.4\%) rise in purchases of goods and services. Transfer payments rose by $8.7 \%$, led by a $\$ 13.1$ million (14.2\%) increase in interest payments to $\$ 105.5$ million, triggered by the start of servicing on the US $\$ 200$ million bond issued in July 2003. Additionally, subsidies and other transfers grew by $\$ 11.9$ million (6.1\%) to $\$ 209.0$ million. In this regard, subsidies paid to quasi-autonomous agencies rose by 4.6\%; transfers to non-financial public enterprises, by $25.3 \%$ and payments to non-profit institutions, by $16.4 \%$. However, transfers to households decreased slightly (1.8\%), corresponding to reduced gratuity payments for new civil service retirees.

On the functional side, expenditures on general public services rose by $6.1 \%$ to $\$ 239.5$ million, constituting the largest share of the recurrent total (27.6\%). Esti-
mated spending also increased for housing, by $39.5 \%$ to $\$ 3.6$ million; other community and social services, by $19.4 \%$ to $\$ 6.9$ million; education, by $7.9 \%$ to $\$ 171.4$ million; economic services, by $7.4 \%$ to $\$ 116.0$ million; defense, by $5.9 \%$ to $\$ 25.1$ million; health, by $3.6 \%$ to $\$ 145.3$ million and social benefits and services, by $3.5 \%$ to $\$ 54.4$ million.

The reduction in capital expenditure, to a level which represented only $46.7 \%$ of the approved allocation for the year, was led by a $\$ 14.1$ million (39.1\%) decrease in investments in public works and water supply projects to $\$ 22.0$ million. Outlays were also significantly scaled back for education, by $17.2 \%$ to $\$ 9.7$ million and defense, by 23.3\% to $\$ 1.1$ million. However, important increases were recorded for health, $34.3 \%$ to $\$ 8.3$ million; general public service, $24.9 \%$ to $\$ 7.4$ million and transportation, 83.1\% to $\$ 3.4$ million.

## Financing and National Debt

Budgetary financing during the first 11 months of the fiscal year consisted of net borrowing in Bahamian dollars and foreign currency of $\$ 20.3$ million and $\$ 68.7$ million,
respectively. Bahamian dollar financing included new bond issues of $\$ 98.3$ million, with maturities ranging from 11 to 20 years and interest rate margins above Bahamas Prime, ranging from $0.0938 \%$ to $0.375 \%$. Among the foreign currency transactions was the refinancing of the US $\$ 125.0$ million loan obtained from domestic banks in July 2002, utilizing most of the proceeds from the US $\$ 200.0$ million 30-year international bond issue.

The Direct Charge on Government grew by $\$ 2.0$ million ( $0.1 \%$ ) to $\$ 1,943.4$ million during April to June, markedly below the $\$ 61.3$ million (3.4\%) increase registered over the same period in 2003. This reduction mainly reflected repayments of foreign currency obligations, as the Bahamian dollar component, which represented $84.9 \%$ of the total, was unchanged at $\$ 1,650.9$ million. The latter was comprised mostly of bonds ( $\$ 1,390.2$ million), with holdings distributed among public corporations (37.7\%)-mainly the National Insurance Boarddomestic banks ( $28.1 \%$ ), private and institutional investors, including pension funds and insurance companies (26.9\%) and the Central Bank (7.1\%).

Given these developments, and a $\$ 21.0$ million (4.9\%) reduction in Government guaranteed debt of public corporations to $\$ 408.1$ million, the National Debt fell by $\$ 19.0$ million ( $0.8 \%$ ) to $\$ 2,350.3$ million at endJune 2004, relative to $\$ 2,238.5$ million at the same point last year. Indicating some reduction in the overall deficit in the 12 months through June, growth in the Direct Charge decreased to $\$ 88.9$ million (4.8\%) as compared to $\$ 178.1$ million ( $10.6 \%$ ) in FY2002/03. This outweighed the $\$ 22.9$ million ( $6.0 \%$ ) upturn in contingent liabilities and consequently, the increase in National Debt also narrowed to $\$ 111.8$ million ( $5.0 \%$ ) from $\$ 151.6$ million ( $7.3 \%$ ) during FY2002/03.

## Public Sector Foreign Currency Debt

During the second quarter, public sector foreign currency debt fell by $\$ 12.8$ million (2.2\%) to $\$ 558.5$ million. The Government's debt operations comprised new drawings of $\$ 2.5$ million versus amortization payments of $\$ 0.5$ million, while the net repayment by public corporations featured borrowing of $\$ 2.5$ million less principal repayments of $\$ 17.3$ million. The Government's obligations at end-June 2004 of $\$ 292.6$ million accounted for $52.4 \%$ of the overall stock, and the public corporations' balance, at $\$ 266.0$ million, the remaining $47.6 \%$.

By creditor profile, the largest share of foreign currency debt was held by commercial banks (41.2\%), followed by private and institutional investors (40.3\%) and multilateral institutions (18.5\%). Nearly all of the outstanding debt was denominated in United States dollars, and the average term to maturity was approximately 16 years.

Compared to the previous year, debt servicing for the quarter rose by $\$ 10.6$ million ( $60.3 \%$ ) to $\$ 28.2$ million. Amortization payments were two-thirds higher at $\$ 17.7$ million, while interest expenses increased by $\$ 3.3$ million ( $47.1 \%$ ) to $\$ 10.4$ million. As a result, estimated debt service as a proportion of exports of goods and nonfactor services rose to $4.3 \%$ from $2.9 \%$ in 2003 . However, the ratio of Government's foreign currency debt service to total revenue is expected to have decreased marginally from the $1.3 \%$ estimated in 2003.

## 2004/2005 Budget Highlights

The Government's Budget for FY2004/05 was presented to Parliament on May 26, 2004 and approved in June. In line with priorities to reduce the fiscal deficit over the medium term, the authorities established a target for the debt-to-GDP ratio of $30 \%$, despite having increased net financing requirements in the short-term-partly to support infrastructure developments and unplanned recurrent commitments taken on midway through FY2003/04. The Government expects to achieve improvements in revenue collections based on strengthened administration and enforcement of existing tax measures, and modest gains from robust expansion in the tax base, linked to growth in the economy.

The Budget projects an overall deficit of $\$ 163.4$ million for FY2004/05, equivalent to an estimated $2.9 \%$ of GDP, and up by $\$ 40.4$ million ( $32.9 \%$ ) from the FY2003/04 projection, which corresponded to $2.2 \%$ of GDP. While modest relative to the previous year's forecast, the projected $\$ 60.1$ million ( $6.1 \%$ ) increase in revenue collections to $\$ 1,051.6$ million, suggest expectations of a more significant improvement over the likely final outcome for FY2003/04, which noted some underperformance in collections. For outlays, the Budget contained an additional $\$ 100.6$ million (9.0\%) in approved expenditures to $\$ 1,215.0$ million.

In support of its commitment to modernize and strengthen revenue administration, the Government foreshadowed measures to revamp the existing stamp duty collection system and the introduction of a Trade Information Management System, to improve the custom duty collection process. Combined, these adjustments are expected to generate some $\$ 27.3$ million in additional receipts, roughly half of the projected $\$ 53.4$ million (6.0\%) increase in tax collections. Although these changes, alongside increased economic activity, are only expected to boost taxes on international trade and transactions above last year's projections by $0.5 \%$ to $\$ 579.5$ million, the yields reflect stronger optimism relative to the actual outcome for FY2003/04, in which collections were below expectations. Relative to last year's forecast, import taxes are only expected to rise by $\$ 13.4$ million (3.0\%), but to reflect more substantial gains against the revised results for FY2003/04. Scaled-back expectations from previous year forecast also explain the anticipated $\$ 11.2$ million (10.1\%) decrease in stamp taxes on imports.

More in line with the realized outcome for FY2003/04, departure taxes are projected to rise by $\$ 3.9$ million (5.9\%) to $\$ 69.8$ million, while taxes on selected tourism services are expected to fall by $\$ 1.3$ million ( $2.8 \%$ ) to $\$ 44.5$ million, correcting for some underperformance relative to the 2003/04 projections. Conversely, stepped up enforcement is expected to boost property tax yields by $\$ 17.8$ million (39.5\%) to $\$ 62.8$ million. Also, motor vehicle taxes are projected to increase by $\$ 1.3$ million (6.2\%) to $\$ 22.0$ million, and stamp taxes on financial and other transactions, by $\$ 14.4$ million (20.9\%) in anticipation of a firming in the domestic activity. With higher international business companies registration and an increased fee structure for banks and trust companies, business and professional license fees are pegged to rise by $\$ 14.6$ million ( $26.7 \%$ ) to $\$ 69.5$ million.

Revenue from non-tax collections is projected to strengthen by $\$ 13.8$ million ( $16.5 \%$ ) to $\$ 97.6$ million, with an $\$ 11.2$ million (54.5\%) gain in income from other sources, which includes dividend payments from public corporations. Receipts from fines, forfeitures \& administrative fees are expected to improve by $\$ 3.2$ million ( $5.2 \%$ ) to $\$ 65.0$ million. The Budget also forecasts new capital revenue of $\$ 11.0$ million, mainly from the anticipated sale of a Government owned hotels.

On the expenditure side, budgetary allocations reflect a combination of adjustments undertaken during the course of FY2003/04, amid less robust revenue results, attempts to restore curtailed capital outlays, and the impact of the unbudgeted salary increase provided during FY2003/04. Current outlays, which represent $87.8 \%$ of the allocations, rose by $\$ 98.3$ million ( $10.1 \%$ ) to $\$ 1,067.3$ million and provisions for net lending to public corporations were raised by $\$ 4.6$ million (18.0\%) to $\$ 30.5$ million. Despite a $\$ 2.4$ million (2.0\%) reduction in the capital budget, the $\$ 117.3$ million provisioned contained significant commitments carried over from FY2003/04 and therefore a higher targeted level of investments than actually occurred during the last fiscal year.

By economic classification, budgeted Government consumption rose by $10.4 \%$, with a provisioned increase for personal emoluments of $\$ 43.6$ million (10.2\%) to $\$ 469.4$ million, partly driven by the continuing impact of the $\$ 24$ million salary increase provided in December 2003. Higher allotments were also made for purchases of goods and services, of $\$ 21.9$ million (10.7\%) to $\$ 226.6$ million.

Parliament approved a 9.7\% hike in allocations for transfer payments, which comprised an $\$ 11.1$ million (9.9\%) projected increase in interest payments on Government debt to $\$ 123.3$ million and a $\$ 21.7$ million ( $9.6 \%$ ) boost in subsidies and other transfers to $\$ 247.9$ million. The subsidies budget featured increased provisions for quasi-autonomous agencies (7.9\%), non-profit organizations ( $16.8 \%$ ) and a nearly three-fold rise in transfers for non-financial public enterprises. However, transfer provisions for households decreased by $2.1 \%$, in anticipation of reduced gratuity payments for new civil service retirees.

Under the functional breakdown of the recurrent expenditure, the budget for general public services increased by $10.7 \%$ to $\$ 307.0$ million ( $28.8 \%$ of the total); education, by $10.3 \%$ to $\$ 208.1$ million (19.5\%); health, by $8.9 \%$ to $\$ 174.9$ million (16.4\%); economic services, by $12.8 \%$ to $\$ 139.4$ million (13.1\%); other community \& social services by $52.6 \%$ to $\$ 10.3$ million (1.0\%); defense, by $12.6 \%$ to $\$ 33.1$ million (3.1\%); and housing by $20.4 \%$ to $\$ 5.5$ million. Conversely, provisions for social benefits \& services were slightly reduced ( $0.3 \%$ ) to $\$ 65.7$ million (6.2\%).

With total capital spending approximating only $46.7 \%$ of budgeted outlays during the first 11 months of FY2003/04, the reduced 2004/05 provisions still represented a significant hike in planned investments. Relative to last year's budget, allocations for public works \& water supply decreased by $3.2 \%$ to $\$ 51.7$ million; transportation, by $21.4 \%$ to $\$ 4.3$ million and education, by $13.2 \%$ to $\$ 17.5$ million. Conversely, investments earmarked for general public services increased by $17.7 \%$ to $\$ 17.9$ million.

On the financing side, Parliament authorized new borrowing of $\$ 260.3$ million vis-à-vis debt amortization of $\$ 94.4$ million, of which $10.4 \%$ is earmarked to repay foreign currency obligations. A netting of these provisions, suggest that the Direct Charge on Government is likely to rise by $\$ 165.9$ million to approximately $\$ 2,109.3$ million at end-June 2005. Accordingly, the National Debt could increase by at least this amount to more than $\$ 2.52$ billion.

## Real Sector

## TOURISM

Preliminary estimates indicate continued growth in tourism output during the second quarter of 2004, driven by increased occupancy levels in the hotel sector and robust cruise passenger traffic. Activity remained favoured by the deepening of the US economic expansion, with its consequent boost to consumer confidence and household spending.

Second quarter visitor arrivals advanced by $18.7 \%$ to 1.4 million solidifying the 2003 recovery of $5.5 \%$ which followed a contraction of $1.8 \%$ in 2002. Visitor growth was particularly strong in New Providence, while encompassing a healthy upturn in Grand Bahama and steady expansion in the Family Islands.

Sea arrivals, which constituted $69.1 \%$ of visitors, registered accelerated gains of $23.2 \%$ to 0.97 million, benefiting from significantly increased cruise line calls on the Islands. This exceeded the cumulative increase of the three previous years (2001-2003) and was the most significant gain since 2000 (31.3\%). In the context of a continued upswing in stopover visitors, air arrivals strengthened by $9.8 \%$ to 0.44 million, extending 2003's
marginal turnaround (2.3\%) and contrasting with 2002's sizeable falloff of $11.3 \%$.

Based on port of entry data, visitor arrivals for New Providence, including Paradise Island, rose by $21.5 \%$, cementing last year's 3.3\% turnaround. Approximately two-thirds arrived by sea, which featured strongly accelerated growth of $30.6 \%$ alongside a more than doubling in air arrivals gains to $6.8 \%$. Following three consecutive years of second quarter declines, the $26.0 \%$ recovery in arrivals to Grand Bahama was bolstered by $37.3 \%$ improvement in the sea component and a $12.3 \%$ upturn in air arrivals. Family Island arrivals rose further by $10.0 \%$, following growth of $16.1 \%$ in 2003, with sea visitors augmented by $8.0 \%$ and air traffic growth stable at 19.0\%.

Indications are that expenditure growth also strengthened relative to 2003, with a projected double digit increase in receipts from cruise passengers reinforcing healthy occupancy-based expansion in stopover spending. Second quarter data for New Providence evidenced a $4.9 \%$ rise in occupied hotel room nights
which, in the context of a stable average nightly room rate of $\$ 174.59$, boosted estimated expenditures by $4.9 \%$. Nevertheless, the average room occupancy rate, which consequently improved to $76 \%$ from 70\%, also contained a 3.9\% reduction in available rooms following the closure of a major property on Paradise Island for renovations. In Grand Bahama, data for the first two months of the quarter revealed a $37.1 \%$ boost in estimated room revenues, as occupied room nights rose by $38.1 \%$, offsetting a marginal decrease in the average nightly room rate to $\$ 91.30$. For the Family Islands, occupied room nights declined by 4.8\%; however, the average nightly rate rose by $11.9 \%$ to $\$ 180.87$, supporting estimated room revenue growth of $6.6 \%$ in April and May.

As to the outlook, tourism growth is expected to continue at a strong pace in the medium term, with the expanding US economy supporting rising travel demand. The stopover sector meanwhile, continues to benefit from an expansion in airline routes from the US and the UK, which are both expected to result in more competitive ticket pricing. Nevertheless, the September $2^{\text {nd }}-4^{\text {th }}$ damage caused by Hurricane Frances, particularly on Grand Bahama and the Family Islands, should disrupt output during September through November as repairs are made. The net impact on overall industry growth in 2004, however, will not be significant given the timing of the disruption during the slowest point in the tourist season.

## Construction

Despite more imminent signs of a pickup in commercial investments, including the startup of a major resort expansion in New Providence, construction expenditures were still subdued during the second quarter of 2004, and mortgage lending in support of local building activities slightly reduced. However, expenditures on rebuilding activities following Hurricane Frances, are expected to provide a strong boost to construction during the remainder of 2004, with a sizeable financing provided by re-insurance inflows.

According to second quarter data on mortgage lending by banks, insurance companies and the Bahamas Mortgage Corporation, ongoing weakness in commercial building financing outweighed the marginal firming in domestic residential investments. Indicative of this, the number of mortgage commitments for new construction
and repairs decreased by $2.5 \%$ to 196, with the corresponding value also lower by $12.8 \%$ at $\$ 19.5$ million. Residential commitments, comprising mainly new housing projects, accounted for 190 of the total, up from 185 in 2004, and valued $2.4 \%$ higher at $\$ 18.0$ million. On the commercial side, only 6 commitments, estimated at $\$ 1.5$ million were recorded, compared to 16 at $\$ 4.9$ million in the year-earlier period. With loan disbursements only partly indicative of actual construction activity, as they contain equity-based advances for other purposes, commercial drawdowns were more robust, at $\$ 13.7$ million compared to $\$ 2.8$ million in 2003, while residential mortgage payouts decreased by $10.0 \%$ to $\$ 62.0$ million.

More in line with the cumulative picture, residential mortgages outstanding at end-June 2004 rose vis-à-vis the previous year by $\$ 136.4$ million (9.3\%) to $\$ 1,596.3$, while commercial claims remained lower by $\$ 6.2$ million (3.7\%) at $\$ 161.4$ million. Relative to the total size of the mortgage market, banks accounted for the largest share of these loans (84.8\%), followed by insurance companies (10.3\%) and The Bahamas Mortgage Corporation (4.9\%). As regard average interest rates, softening was evident for both residential and commercial loans, to $8.8 \%$ and $9.4 \%$ from the respective $8.9 \%$ and $9.6 \%$ in the same period in 2003.

## PRICES

Based on quarterly variations in the average Retail Price Index, inflation moderated to $0.2 \%$ during the second quarter from $0.4 \%$ in the corresponding 2003 period. Major influences included the unchanged level of the housing index, the most heavily weighted component, the softened advance in transportation \& communications costs ( $0.5 \%$ ) and a marginal decrease in average education costs ( $0.1 \%$ ). These outweighed firmer average cost advances for food \& beverages ( $0.3 \%$ ) and medical care \& health (1.2\%); and the incremental upturn in the average price for recreation \& entertainment services. The rate of increase in the other items of the Index was approximately unchanged, on average, at less than $0.1 \%$.

| Average Retail Price Index <br> (Annual \% Change) <br> June |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 2003 |  | 2004 |  |
| Items | Weight | Index | \% | Index | \% |
| Food \& Beverages | 138.3 | 112.9 | 1.0 | 115.1 | 1.9 |
| Clothing \& Footwear | 58.9 | 107.5 | -0.1 | 107.8 | 0.3 |
| Housing | 328.2 | 103.2 | 0.3 | 103.8 | 0.6 |
| Furn. \& Household | 88.7 | 118.0 | 6.9 | 118.9 | 0.7 |
| Med. Care \& Health | 44.1 | 116.3 | 4.4 | 128.1 | 10.6 |
| Trans. \& Comm. | 148.4 | 104.8 | 0.6 | 107.0 | 2.1 |
| Rec., Enter. \& Svcs. | 48.7 | 122.7 | 8.5 | 123.6 | 0.1 |
| Education | 53.1 | 161.2 | 4.4 | 164.1 | 1.8 |
| Other Goods \& Svcs. | 91.6 | 117.6 | 8.8 | 122.3 | 4.0 |
| ALL ITEMS | 1000 | 112.3 | 2.8 | 114.2 | 1.8 |

In the twelve months through June, average consumer price inflation abated to to $1.8 \%$ from $2.8 \%$ in the comparative 2003 period. Of particular note was the slowed rise in the average cost of recreation \& entertainment services, to $0.7 \%$ from $8.5 \%$; furniture \& household operations, to $0.7 \%$ from $6.9 \%$ and education, to $1.8 \%$ from $4.4 \%$. Average price gains for "other" unclassified goods \& services also slackened to $4.0 \%$ from $8.8 \%$ last year. These trends were partly countered by the sharp run-up in average costs for medical care \& health services (10.6\%), fuel-related firming in transportation \& communications costs (2.1\%), larger increases for food \& beverage items (1.9\%) and housing (0.6\%), and the
marginal upturn in the average index for clothing \& footwear.

## Money, Credit and Interest Rates

## Overview

Growth in the monetary aggregates was buoyed by comparatively stronger foreign currency inflows from tourism during the second quarter, and was closely matched by a revival in domestic credit, which otherwise remained constrained by the Central Bank's lending restrictions. Conditions supported a reduction in the banking system reduced its net foreign liabilities, and a softening in the average interest rates on both deposit and loans with a consequent narrowing in the loan-todeposit rate spread. Meanwhile, the expansion in domestic credit was led by the accelerated advance in private sector Bahamian borrowing and increased net claims on the Government.

As regards profit and balance sheet developments of domestic banks, data for the first quarter of 2004 suggested some upturn in earnings indicators, owing both to efficiency gains and increased net interest flows. The previous quarter's improvement in asset quality indicators was preserved during the second quarter as the proportion of loan arrears in banks' portfolio decreased slightly.

## LIQUIDITY

In the context of intensified credit expansion, banks directed less additional resources to liquid assets during the second quarter. Net free cash reserves fell marginally by $\$ 0.9$ million ( $0.5 \%$ ) to $\$ 189.6$ million, relative to a $\$ 1.9$ million decline ( $1.5 \%$ ) to $\$ 127.1$ million in the comparative quarter in 2003. However, this represented a larger $4.8 \%$ share of Bahamian dollar deposit liabilities, compared to the respective $3.4 \%$ in 2003. Surplus liquid assets, which exceeded the required minimum by $34.5 \%$, vis-à-vis $24.7 \%$ at the end of June 2003, also declined by $4.6 \%$ to $\$ 226.8$ million.

## Deposits and Money

Amid stronger accumulation of deposits held by private individuals and businesses, overall money supply (M3) recovered by $4.1 \%$ during the second quarter,
following a marginal contraction of $0.1 \%$ in 2003. Narrow money (M1) rebounded by 10.3\% from the year-earlier decline of $0.2 \%$, with placements of businesses and private individuals supporting a $11.3 \%$ upturn in demand deposits, after a decrease of $1.1 \%$ last year. Growth in currency held by the public was also slightly higher at 4.8\% from 4.6\%.

Broad money (M2) expansion firmed significantly, to 4.0\% from 0.4\% last year. Of note, fixed deposits recovered by $1.3 \%$ from a $0.3 \%$ reduction in 2003, as larger business and individual holdings outweighed reduced public corporation balances. In addition, accretions to savings balances, mainly personal account holders, strengthened to $4.3 \%$ from $3.6 \%$ last year.

With the $5.7 \%$ upturn in residents' foreign currency deposits vis-à-vis last year's $17.4 \%$ contraction, overall money (M3) expanded by $\$ 170.1$ million (4.1\%) to $\$ 4,355.7$ million. Bahamian dollar fixed deposits comprised the largest share of the overall stock (55.0\%), followed by demand (21.8\%) and savings (17.0\%) deposits, currency (3.7\%) and foreign currency deposits (2.5\%).

Meanwhile, the Central Bank's liabilities to the public and private sectors represented $6.7 \%$ of the money stock as compared to a $93.3 \%$ share for banks.

## Domestic Credit

A Domestic credit also rebounded by $\$ 99.8$ million (2.0\%) during the quarter, relative to the previous year's contraction of $\$ 69.2$ million (1.4\%), and more closely resembled the 2002 uptrend of $\$ 83.8$ million (1.8\%). The increase was concentrated primarily in recovered private sector credit claims of $2.0 \%$ from a $1.0 \%$ net repayment in 2004. A key component was the accelerated rise in Bahamian dollar claims of $\$ 93.0$ million (2.5\%) as compared to $\$ 37.8$ million (1.1\%) in 2003, alongside a smaller reduction in private foreign currency credit of $\$ 8.9$ million (2.1\%) relative to the $\$ 79.4$ million (17.2\%) in 2003 which was linked to industrial sector repayments.

Private sector credit expansion was led by accelerated growth in personal lending to $2.6 \%$ from $2.0 \%$ last year, representing approximately $70.2 \%$ of outstanding private claims. Although the advance in residential
mortgages slackened to $\$ 45.2$ million (3.3\%) from $\$ 71.4$ million (6.0\%), consumer credit rebounded by $\$ 24.4$ million (1.7\%) from a $\$ 8.0$ million ( $0.6 \%$ ) net repayment in 2003 and overdraft balances were extended by $\$ 7.0$ million (11.9\%) following the $\$ 8.6$ million (17.9\%) pay down last year.

Noteworthy trends in consumer credit included larger net lending for miscellaneous purposes ( $\$ 13.1$ million), land purchases ( $\$ 6.1$ million) and credit cards (\$1.9 million); and rebounded net flows for travel (\$1.4 million), private cars ( $\$ 1.8$ million) and furnishing and domestic appliances ( $\$ 0.4$ million). The only sizeable net repayment was for home improvement loans (\$1.6 million).

| Distribution of Bank Credit By Sector End-June |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 2003 |  | 2004 |  |
|  | B\$M | \% | B\$M | \% |
| Agriculture | 7.1 | 0.2 | 9.5 | 0.2 |
| Fisheries | 5.5 | 0.1 | 10.2 | 0.2 |
| Mining \& Quarry | 19.2 | 0.4 | 19.4 | 0.4 |
| Manufacturing | 62.2 | 1.4 | 75.9 | 1.6 |
| Distribution | 218.4 | 5.0 | 208.2 | 4.5 |
| Tourism | 222.5 | 5.0 | 172.4 | 3.7 |
| Enter. \& Catering | 33.3 | 0.8 | 33.4 | 0.7 |
| Transport | 48.0 | 1.1 | 45.8 | 1.0 |
| Public Corps. | 206.2 | 4.7 | 317.9 | 6.9 |
| Construction | 261.5 | 5.9 | 245.6 | 5.3 |
| Government | 214.1 | 4.9 | 111.2 | 2.4 |
| Private Financial | 34.1 | 0.8 | 29.3 | 0.6 |
| Prof. \& Other Ser. | 128.5 | 2.9 | 123.2 | 2.7 |
| Personal | 2752.4 | 62.5 | 2949.9 | 63.7 |
| Miscellaneous | 187.8 | 4.3 | 280.6 | 6.1 |
| TOTAL | 4400.8 | 100.0 | 4632.5 | 100.0 |

Outside of the personal sector, private sector credit trends also featured a larger increase in bank claims for miscellaneous purposes ( $\$ 24.3$ million) and marginal net financing flows for most business and productive activities. These included reversals from net repayments to increases for entertainment \& catering ( $\$ 5.7$ million), construction ( $\$ 9.5$ million), professional \& other services (3.0 million), transportation ( $\$ 1.8$ million) and private financial institutions ( $\$ 2.0$ million). Most remaining sec-
tors recorded net repayments, inclusive of fisheries, (\$1.4 million), distribution (\$0.1 million) and tourism (\$34.2 million).

The banking sector's net claim on the public sector rose by $1.7 \%$, after declining by $3.0 \%$ over the comparative 2003 period. Net lending to Government resumed by $\$ 34.3$ million ( $6.3 \%$ ), following a $\$ 25.2$ million decrease (3.6\%) last year, and outweighed the reduction in claims on the rest of the public sector, which was extended to $\$ 18.6$ million (5.1\%) from $\$ 2.4$ million (1.1\%) in 2003.

## The Central Bank

For the June quarter, Central Bank's net claims on Government fell by $\$ 12.0$ million ( $10.2 \%$ ), which was considerably below the year-earlier contraction of \$49.1 million (30.9\%). This included a $\$ 5.5$ million decrease in the Bank's holdings of Government bonds and a more than doubling in Government deposits by $\$ 6.5$ million. Net deposit liabilities to the public sector almost doubled to $\$ 121.7$ million. This build-up, alongside expanded currency and other deposit liabilities-mainly to domestic banks-was correlated with more robust external reserves growth of $\$ 59.3$ million (10.0\%) to $\$ 652.5$ million
as compared to a $\$ 28.0$ million (6.3\%) gain to $\$ 472.5$ million last year.

External balances approximated 23.5 weeks of nonoil merchandise imports for the 12 months ending June 2004 as compared to 19.1 weeks for the previous year. When adjusted for the $50 \%$ statutory backing for the Bank's Bahamian dollar liabilities, the resulting useable reserves, or Central Bank liquidity, stood at $\$ 308.8$ million compared to $\$ 218.2$ million in 2003.

Underpinning the reserves growth was an expanded net foreign currency purchase of $\$ 54.6$ million, up from $\$ 23.7$ million last year. The net intake from commercial banks rose by $\$ 20.6$ million ( $35.0 \%$ ) to $\$ 79.5$ million, while net outflows via the public sector narrowed to $\$ 24.9$ million from $\$ 35.2$ million last year. Reflecting the continued rebound in tourism, total purchases advanced by $\$ 24.7$ million (14.4\%) to $\$ 195.6$ million as compared to a $\$ 6.2$ million (4.2\%) falloff in total sales, to $\$ 141.1$ million.

## Domestic Banks

During the review quarter, growth in domestic banks' deposit liabilities to the private sector accelerated to $\$ 136.8$ million (3.7\%) from $\$ 28.4$ million ( $0.8 \%$ ) in 2003, more than sustaining the upswing in credit to the sector. This also accommodated the $\$ 46.3$ million (11.0\%) rebound in net claims on Government, and the gap between the further $\$ 18.6$ million ( $5.2 \%$ ) reduction in claims on public corporations relative to a larger $\$ 29.0$ million (7.2\%) falloff in corresponding deposits. Alongside a $\$ 34.0$ million (4.0\%) rise in capital and surplus, these developments allowed banks to reduce their net foreign liabilities by $\$ 40.1$ million (6.4\%).

Relative to the total portfolio, lending to the public sector was proportionately higher in foreign currency at $36.4 \%$, as total net credit to the public sector-held mainly in government bonds-comprised $16.1 \%$ of banks' total claims on the domestic economy.

The June quarter recorded a stronger accumulation of banking sector deposits, inclusive of gross liabilities to the public sector, of $\$ 107.7$ million (2. 7\%) to $\$ 4,163.1$ million, as compared to a $\$ 10.1$ million (0.3\%) accretion in 2003. Holders of Bahamian dollar deposits, at $\$ 4,053.5$ million, included private individuals (55.7\%), business firms (26.4\%), the public sector (9.0\%) and
private financial institutions and others (8.9\%), mainly insurance companies and private pension funds.

An analysis of contractual obligations indicated that fixed deposits remained the largest share (59.3\%) of the total, followed by demand (22.8\%) and savings (17.9\%) deposits. The breakdown by range and value revealed that approximately $90.2 \%$ of Bahamian dollar accounts held balances of less than $\$ 10,000$ but represented a disproportionately lower $8.7 \%$ of the total value. Conversely, $2.9 \%$ of accounts comprised balances over $\$ 50,000$, which accounted for $77.3 \%$ of the value. The remaining accounts with balances between $\$ 10,000$ and $\$ 50,000$ constituted $6.8 \%$ of the total accounts and a less disparate $14.0 \%$ of the aggregate value.

Asset quality improvements noted during the first quarter of 2004 were preserved during the review period. The Central Bank's latest survey indicate that, the ratio of loan balances in arrears relative to total Bahamian dollar claims on the private sector stabilized at $8.7 \%$, after rising to as high as $10.1 \%$ at the end of both second and final quarters of 2003. The consumer credit portfolio maintained the most significant improvement, with an arrears rate of $7.9 \%$ compared to $8.4 \%$ at the end-macrh 2004 and $10.0 \%$ at end-April 2003. For the residential mortgages portfolio, where arrears were most recently as high as $11.5 \%$ in December, the rate at end-June remained close to the $9.8 \%$ recorded in March. Nevertheless, commercial facilities experienced some temporary set back, with an arrears rate of $9.3 \%$ compared to $8.6 \%$ in March, but still improved from 10.5\% at end-2003. Private loans on which banks have stopped accruing interest also decreased slightly to $4.8 \%$ of the estimated Bahamian dollar portfolio in June, partly reversing the increase incidences of non-accruals noted during the second half of 2003.

Banking sector provisioning and loan write offs against bad debt, indicate a slowdown in balance sheet discounting of risk. Realized bad debt expenses decreased incrementally during the second quarter, remaining significantly below average quarterly provisions taken during the first nine months of 2003. Banks also wrote off significantly less doubtful loans, after undertaking a very aggressive cleanup during the first quarter of 2004. Average provisioning levels for Bahamian dollar loans remained slightly lower at $2.0 \%$ of the estimated loan portfolio at end-June as compared to $2.1 \%$ at end-

December 2003. This decrease was mainly as a result of further consumer loan write-offs from specific bad debt provisions and an abatement in the rate of provisioning against new consumer credit.

A breakdown of total deposits by contractual categories revealed that fixed balances maintained the largest share (60.0\%), followed by demand (22.4\%) and savings deposits (17.6\%). Analyzed by number of accounts and range of values, the majority of Bahamian dollar funds $(77.0 \%)$ were concentrated in the fewest number of accounts (3.0\%) valued at $\$ 50,000$ and higher. The largest number of accounts (90.3\%) held balances under $\$ 10,000$, which corresponded to only $8.7 \%$ of the aggregate value, while some $6.7 \%$ of accounts, valued between $\$ 10,000$ to $\$ 50,000$, constituted $14.3 \%$ of total deposits.

| Banking Sector Interest Rates Period Average (\%) |  |  |  |
| :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & \text { Qtr. II } \\ & \underline{2003} \end{aligned}$ | $\begin{aligned} & \text { Qtr. I } \\ & 2004 \end{aligned}$ | $\begin{aligned} & \text { Qtr. II } \\ & \underline{2004} \end{aligned}$ |

| Up to 3 months | 3.76 | 3.80 | 3.73 |
| Up to 6 months | 4.19 | 4.74 | 4.97 |
| Up to 12 months | 4.39 | 4.44 | 4.13 |
| Over 12 months | 4.38 | 4.84 | 4.14 |
| Weighted Avg Deposit Rate | 3.91 | 4.02 | 3.84 |
| Lending Rates |  |  |  |
| Residential Mortgages | 9.01 | 8.91 | 8.84 |
| Commercial Mortgages | 10.04 | -- | 8.86 |
| Consumer Loans | 13.93 | 13.39 | 13.08 |
| Overdrafts | 11.13 | 11.78 | 11.40 |
| Weighted Avg Loan Rate | 12.13 | 11.57 | 11.23 |

Adjusted for goodwill, banks' Bahamian dollar capital and surplus position rose at a reduced quarterly pace of $1.0 \%$ to $\$ 854.8$ million during the quarter, relative to a $4.3 \%$ rise to $\$ 754.4$ million in 2003 when profitability conditions were more robust and financial institutions
retained a larger share of profits. In this regard, profit and retained earnings represented a lesser 43.9\% of capital and surplus relative to $51.8 \%$ last year, while general and specific reserves against loan loses were increased to $12.4 \%$ of the total from $11.6 \%$ the previous yearindicative of a more conservative risk treatment for loans exposures. Correspondingly, total reserves and provisions, as a percentage of the private sector loan portfolio, stood at 2.9\% at end-March compared to $2.5 \%$ in 2003.

As regard asset quality, which has had some influence on recent provisioning trends, indications are that outstanding private sector Bahamian dollar loans reported in arrears at end-March 2004 decreased to 8.7\% of the corresponding loan portfolio from $10.1 \%$ in the previous quarter. This suggests that the improving economic climate was enabling more borrowers to satisfy their servicing obligations. For arrears of 90 days or more, which account for the majority of the distressed facilities (55.3\%), these decreased as a share of total loans, to $4.8 \%$ from $5.1 \%$ in December 2003. In terms of value, the most sizeable exposure reduction occurred in more upfront arrears balances, less than 90 days in distress. Overall, the residential mortgages portfolio maintained the highest percentage of exposure to arrears (9.8\%) versus lesser shares for commercial (8.6\%) and consumer loans (8.4\%), where financial institutions follow a more aggressive write-off policy for non-performing loans, in view of the comparatively weaker quality of collaterals. Some balance sheet clean up was evident during the period as banks wrote off a larger amount of loans than in any of the previous six (6) quarters surveyed. The profit and loss impact, however, was nearly two-thirds less, since some of these losses were already provisioned.

## Interest Rates

During the second quarter, an 18 basis point reduction in the average deposit rate to $3.84 \%$, as opposed to the 34 basis point drop in the counterpart loan rate, narrowed domestic banks' average loan-to-deposit spread by 16 basis points to $7.39 \%$.

Compared to the previous quarter, the average range on fixed deposits widened to $3.73 \%-4.97 \%$ from $3.80 \%-4.84 \%$, while the average savings rate softened by 22 basis points to $2.55 \%$. Average lending rates eased for overdraft facilities, by 38 basis points to
11.40\%; consumer loans, by 31 basis points to $13.08 \%$ and residential mortgages, by 7 basis points to $8.84 \%$. Conversely, average interest rates on other local loans firmed by 5 basis points to $8.57 \%$, while rates on resumed commercial mortgage lending averaged $8.86 \%$.

Similar to deposit rate trends, the average threemonth Treasury bill rate softened by 23 basis points to 0.71\%. However, benchmark interest rates--commercial banks' Prime and the Central Bank Discount Rate remained at their respective July 1999 levels of $6.00 \%$ and 5.75\%.

## Bank Profitability

More expansionary credit conditions, improved asset quality and abated operating cost pressures supported marginal improvements in domestic banks' earnings indicators.

For the quarter ended March 2004, the latest period for which data are available, profits recovered by $\$ 5.1$ million ( $15.1 \%$ ) to $\$ 38.7$ million, following a $\$ 2.5$ million (6.8\%) decline over the same period in 2003. As interest income paced moderately ahead of interest expenses, the net interest margin improved by $6.9 \%$ to $\$ 71.1$ million. When combined with a one-fourth gain in commission and foreign exchange income, this extended the resulting gross earnings margin by $8.3 \%$ to $\$ 78.5$ million. The net earnings margin also strengthened by $27.2 \%$ after operating costs fell by $2.5 \%$ to $\$ 45.2$ million, as a result of reduced staff expenditures-owing to a more rationalized labour force. Partly offsetting, the net contribution from other income sources was reduced, by $27.9 \%$ to $\$ 5.4$ million, as increased depreciation costs exceeded the reduced offset from bad debt expenses.

Profitability ratios relative to average domestic assets were also improved compared to the first quarter of 2003. The ratio for the net interest margin firmed incrementally by 1 basis point to $4.71 \%$, while the comparative ratio for commission and foreign exchange income ratio rose by 7 basis points to $0.49 \%$. Efficiency gains, represented by the 28 basis points reduction in operating costs as a percentage of average assets to $2.99 \%$, placed the earnings margin 36 basis points higher at $2.21 \%$. Nevertheless, a 17 basis points reduction in the net contribution from other income sources resulted in a more modest 19
basis points increase in the net income (return on assets) ratio to $2.56 \%$.

## Captial Markets Developments

Activity in the domestic capital markets increased steadily during the second quarter, amid signs of some upturn in earnings indicators within the private sector and a sizable sale of Government equity holdings. While no new capital was raised during the second quarter, both the Government and private sectors tapped the market during July and August.

In the second quarter, the Bahamas International Securities Exchange (BISX) All Share Price Index rallied by $5.6 \%$ to 973.2 points, extending the first quarter's $5.8 \%$ gain. For the first six months of the year the Index was up by $12.1 \%$, in contrast to a cumulative decline of $6.2 \%$ during 2003. Compared to the first half of 2003, trading volume rebounded to 2.25 million from 0.69 million shares, valued considerably higher at $\$ 12.8$ million from $\$ 2.3$ million. Although the sale of 1 million Cable Bahamas shares held by the Government to the National Insurance Board (NIB) accounted for more than half of the value exchanged, other private sector transactions were also significantly elevated.

Fidelity Capital Market Limited's broader Findex weighted share price index, which also includes equities traded over-the-counter, rose by $3.7 \%$ to 403.6 points during the second quarter, compared to a decline of $2.8 \%$ in the same period last year. On a year-to-date basis, Findex gained 7.8\% in contrast to a loss of $5.4 \%$ in 2003. Government transactions also dominated over-thecounter trading, with 1 million shares of Bank of The Bahamas sold to NIB.

## INternational Trade and Payments

Based on preliminary estimates for the second quarter of 2004, the current account deficit narrowed to $\$ 68.7$ million from $\$ 83.3$ million over the same period last year. In particular, the expansion in net merchandise imports was countered by a widening in net tourism inflows
combined with modestly improved goods exports, and reduced net factor income remittances.

The merchandise trade deficit rose by $8.6 \%$ to an estimated $\$ 334.5$ million. While export receipts increased by $\$ 8.1$ million ( $9.0 \%$ ) to $\$ 98.1$ million, non-oil imports were higher by $\$ 17.2$ million ( $6.7 \%$ ) at $\$ 273.7$ million, amid continued firming in domestic demand. Outflows for oil imports also advanced by $18.7 \%$ to $\$ 86.3$ million, as pressures from higher global prices outweighed the reduction in the domestic quantity consumed. Compared to the second quarter of 2003, the average per barrel cost of gas oil rose by $27.3 \%$ to $\$ 40.23$; jet fuel, by $33.5 \%$ to $\$ 45.35$; motor gas, by $41.3 \%$ to $\$ 57.45$ million and avia-tion-gas, by $20.2 \%$ to $\$ 98.67$. Conversely, the average per barrel price of propane and bunker ' $c$ ' fuel decreased by $40.7 \%$ and $32.0 \%$ to $\$ 18.38$ and $\$ 23.28$, respectively.

The estimated surplus on the services account widened by $\$ 33.3$ million ( $13.5 \%$ ) to $\$ 280.0$ million, associated largely with the $15.3 \%$ rise in net travel receipts as the sector's recovery strengthened. Also noteworthy was the more than halving in net outflows for various government services to $\$ 8.2$ million, while inflows from offshore companies' local expenses increased by $2.3 \%$ to $\$ 20.5$
million. Conversely, net external payments for "other" services rose strongly by $\$ 31.5$ million (39.2\%) to $\$ 111.9$ million, attributed largely to higher external expenses of the public corporations, and net insurance remittances rose by $4.2 \%$ to $\$ 26.1$ million.

Net income outflows narrowed by $\$ 6.3$ million (15.8\%) to $\$ 33.7$ million, as banks and other private sector net repatriation of investment income were more than halved to $\$ 13.3$ million. In a partial offset, net labour income remittances rose by $29.9 \%$ to $\$ 17.0$ million, and official transactions were reversed to a net interest payment of $\$ 3.3$ million from a net receipt of $\$ 2.2$ million in 2003.

Net current transfer receipts fell by $7.4 \%$ to $\$ 19.5$ million, with general government net inflows lower by $\$ 0.7$ million (3.7\%) at $\$ 20.5$ million. This exceeded the reduction in net private transfer payments of $\$ 0.6$ million ( $40.3 \%$ ) to $\$ 0.9$ million, which was explained by a decrease in workers' net remittances.

The capital and financial account recorded a smaller surplus of $\$ 4.1$ million, compared to $\$ 41.9$ million in 2003. Outward migrants' net transfers rose to $\$ 9.7$ million from $\$ 7.4$ million, while net financial inflows narrowed to $\$ 13.8$ million from the year-earlier $\$ 49.2$ million. Underlying this outcome was the reduced net private foreign investments of $\$ 57.5$ million compared to $\$ 111.9$ million last year, mainly corresponding to a net loan repayment of $\$ 0.8$ million as opposed to a net financing of $\$ 69.6$ million in 2003. Likewise, the net real estate inflow decreased to $\$ 2.1$ million from $\$ 30.8$ million in 2003. However, signs of the anticipated recovery in foreign investment flows were suggested from the widening net direct equity inflows to $\$ 56.1$ million from $\$ 11.5$ million last year. Short-term capital outflows through the domestic banking system declined to $\$ 40.0$ million from $\$ 58.8$ million and the public sector's net external debt repayment decreased to $\$ 3.7$ million from $\$ 3.9$ million.

Consequent on these developments and after adjusting for possible errors and omissions, the overall balance recorded a larger surplus of $\$ 59.3$ million as compared to $\$ 27.8$ million in the year-earlier period.

## International Economic Developments

Export-led strengthening in output was more broadbased among major industrial countries during the second quarter of 2004, benefiting particularly from expenditures in the United States and China. Although marginally mixed during the quarter, labour market conditions stayed on an improving trend; however, increased consumer price pressures from higher fuel costs and demand pressures further tilted the monetary policy stance towards tightening in some major economies. Average equity prices continued to rally across major financial markets, in the context of upbeat economic expectations. External sector developments were characterized by improvements in most major countries' current account balances, due to increased exports. While the global recovery was expected to broaden over the remainder of 2004 and into 2005, the outlook was still hampered by unpredictable fuel prices.

Export growth and increasing internal demand supported stronger expansion in most major economies during the second quarter. However, while the United States' medium-term prospects remained strong, rising fuel costs slowed the second quarter uptrend to an annualized $3.0 \%$ from $4.5 \%$ in the first quarter. In particular, abated consumer spending and moderated inventory investments partly countered accelerated investments outlays on housing and business technology, and rising exports. China's annualized growth rate, which along with the United States provided a steady underpinning for global export demand, continued at a robust $9.6 \%$ during the second quarter, compared to $9.8 \%$ in the first quarter. Benefiting from this upturn, Japan, experienced a strengthened expansion of $4.4 \%$ relative to $1.6 \%$ in the first quarter, also supported by rising business and household demand. In the United Kingdom, real GDP gains firmed to $3.6 \%$ on an annualized basis from 2.8\% during the first quarter, with manufacturing registering the strongest quarterly increase since the third quarter of 1999, and services sector output rising at a steady pace. In the euro area, rising consumer confidence and exportled expansion in industrial production supported real output gains of $2.0 \%$ on a annualized basis, compared to $2.4 \%$ in the previous quarter, with Germany's growth firmed to $2.0 \%$ from $1.5 \%$, and the rate of economic
expansion for France exceeded the previous quarter's 2.0\%.

Despite incremental setbacks in some major economies, labour market conditions remained on an improving trend. In the United States, the average unemployment rate softened to $5.6 \%$ from $5.7 \%$ as the pace of business hiring increased. Similarly, with the improving situation in Japan, the second quarter jobless rate decreased marginally to $4.6 \%$ from $4.7 \%$ of the workforce. However, in the United Kingdom, average unemployment rose marginally to $4.8 \%$ from $4.7 \%$. The euro zone's annual growth rate firmed to $9.0 \%$ from $8.9 \%$, with the French and German estimates both marginally higher at $9.9 \%$ and $10.5 \%$, respectively.

Rising oil prices produced intensified inflationary pressures in the major industrial countries during the second quarter, which could linger in the short-term as concerns persist about potential disruptions to supplies. In the United States, annualized inflation nearly doubled to $3.3 \%$ from $1.7 \%$ in the first quarter, with the respective advances in energy and food prices accelerated at 17.0\% and $3.7 \%$ from $0.4 \%$ and $3.2 \%$ in the previous quarter. In the euro area, annualized inflation rose to $2.4 \%$ from the previous quarter's $1.7 \%$, with estimates for Germany and France firming to $1.6 \%$ and $2.4 \%$, from $1.1 \%$ and $1.7 \%$, respectively. For the United Kingdom, the average retail price increase moved higher to $3.0 \%$ from $2.6 \%$ in the previous quarter, whereas Japan experienced additional deflation, with consumer prices further reduced by $0.4 \%$, in the second quarter, despite upward pressure from oil and non-food items.

In currency markets, the United States dollar continued to appreciate against major world currencies, responding to rising short-term interest rates and the relative strength of the US economic expansion. Consolidating its recovery from the two-year long slide, the dollar rose by $0.9 \%$ against the euro to $€ 0.82$; by $4.4 \%$ against the Japanese yen, to $¥ 108.77$; by $1.4 \%$ against the pound sterling to $£ 0.55$ and by $1.8 \%$ vis-à-vis the Canadian dollar to C\$1.33. Conversely, the dollar depreciated against the Swiss franc by $1.4 \%$ to CHF1.25.

Equity market valuations on the major bourses firmed moderately during the second quarter as investors responded to the improving global economic outlook. In the United States, the Dow Jones Industrial Index Aver-
age (DJIA) gained $0.8 \%$ to $10,435.5$ points and the broader Standard and Poor's 500 Index, 1.3\% to 1,140.8 points. Positive results among the European bourses included advances in the United Kingdom's FTSE 100 Index's by $1.8 \%$ to $4,464.1$ points; France's CAC 40 Index, by $3.0 \%$ to $3,733.0$ points and Germany's DAX Index, by $5.1 \%$ to 4,052.7 points. In Japan, the Nikkei 225 Index increased by $1.2 \%$ to $11,858.9$.

In commodity markets, ongoing concerns about output supply disruptions exerted upward pressure on oil prices during the second quarter and remained a key uncertainty in the global economic outlook. This deterioration occurred despite OPEC's June decision to raise its daily production ceiling by $8.5 \%$, with effect from the beginning of July 2004, and by another $3.9 \%$ to 26 million barrels, with effect from August 1st 2004. The per barrel price of Brent Sea crude oil rose by $3.7 \%$ to $\$ 33.45$ during the second quarter, well above OPEC's price band of $\$ 22-\$ 28$ per barrel. As some confidence returned to financial markets, precious metals functioned less as hedging alternatives, with the price for gold decreasing by $7.6 \%$ to $\$ 394.55$ per troy ounces and silver, by $27.1 \%$ to $\$ 5.77$ per troy ounce.

Amid strengthened growth prospects,, monetary policy in the United States and the United Kingdom was less accommodating and the respective central banks adopted a more defensive stance against inflation. In June, the United States' Federal Reserve approved 25 basis points increases for both the discount rate and target Federal funds rate, to $2.25 \%$ and $1.25 \%$, respectively. The Bank of England raised its repurchase rate
twice during the quarter, by 25 basis points to $4.25 \%$ in May and further to $4.50 \%$ in June, in a bid to keep inflation within the government's $2.0 \%$ target range. The policy stance elsewhere was unchanged, with the European Central Bank's refinancing rate remaining at $2.00 \%$, although with a more guarded view of rising liquidity in the financial markets. The Bank of Japan also kept its official discount rate at the historic low of $0.1 \%$ for the tenth consecutive quarter, while taking added steps to enhance liquidity by providing the markets with access to government securities held by the Bank.

In external sector developments, most major economies current account benefited from stronger net export demand, although this had the opposite effect in the United States and China, the two largest importing economies. Indications are that the United States recorded an $8.5 \%$ increase in the estimated trade deficit to a seasonally adjusted $\$ 163.6$ billion during the second quarter. In the United Kingdom, the seasonally adjusted estimated trade deficit was almost stable at $\$ 27.9$ billion, as demand for manufacturing continued to increase. Export demand sustained a sizeable euro area trade surplus of $\$ 30.6$ billion, well above the quarterly average of $\$ 20.4$ billion in 2003, led by a widening in Germany's second quarter trade surplus by an estimated $6.9 \%$, to a seasonally adjusted $\$ 52.4$ billion. In Japan, the seasonally trade surplus was only marginally reduced to $\$ 29.1$ million; although, still expanding relative to the quarterly average of $\$ 21.9$ billion in 2003.
