1.0 Purpose

Central Bank of The Bahamas (CBOB) is constructing its new premises on the former Royal Victoria site between East Street and Parliament Street, south of Shirley Street, and north of East Hill Street in the city of Nassau, on New Providence Island, The Bahamas. This is a prominent and auspicious venture. The iconic premises will reflect the nationally eminent status of the Central Bank and serve as a pivot point and key directional influence for the revitalization and future development of Downtown Nassau. The new premises are expected to present a source of national, regional, and international pride; and to project the operations of the Central Bank while protecting its staff and the public that rely on its services.

To assist the project, CBOB engaged numerous service providers and experts; and continues to add to the team. The Central Bank retained Architekton Design Studio Bahamas Ltd. (ADSBL) to provide architectural services for the design of the new Central Bank of The Bahamas (the Project). Adamson Associates, Inc. will be assisting ADSBL. Graphite Engineering Ltd. formulates a team of varied specialists that are assisting CBOB as the owner's representative and project oversight group. The selected bidder resulting from this RFP process will work within the ambit of the architects and with members of the overall project team that also work with the architects under the auspices of the owner and the owner's representative group.

The new Central Bank of The Bahamas (the "Project") consists of a 5 story headquarters building (3 floor plates of +/- 17,000 gross square feet (gsf) and one of +/- 10,500 gsf) raised above a plaza level that will have the main entry/lobby with small public library and security offices totaling +/- 5,600 gsf, a multi- purpose/performing arts theater (+/-9,000 gsf) and art gallery (+/-3,000 gsf), above a 2 level below grade parking garage as outlined in the owner's Program, see the attached "Exhibit X". The performing arts theater will have tiered seating for 250 people which is connected to the main office building via the art gallery and will accommodate lectures / speaking events with a small proscenium stage that will allow for a variety of performance types. The overall area of the building including the office space, performing arts theater, cafeteria with indoor /outdoor dining and conference/training rooms, is 88,000 gsf measured with Building Owners and Managers Association (BOMA) standards.

The 2 level 250 to 280 automobile parking garage will be an additional 120,000 gsf. Included in the garage will be 20,000 gsf of area for a staff cafeteria, gym and shower/changing facilities, art storage, building security command center, back-of-house storage that will serve the building engineer, catering, housekeeping, and small staff facilities with gym & lockers.

The Project consists of a standard BOMA Core and Shell project and the interior architecture for the public areas, open office areas, enclosed offices, conference rooms, and finishes for all spaces in the building including the architectural interiors of the performing arts theater and cafeteria. All interior design related to art installations, furniture, fixtures, and equipment, the furniture test fits / layouts and furniture space planning / layouts, along with all documents required to procure and install the furniture will be provided by a separate Owner's consultant.

The site is approximately 3.05 acres and bound by Shirley Street to the North, Parliament and East Streets to the west & east and East Hill Street to the south (note: the Zion Baptist Church located at the northeast corner of this block is not part of the Project site).

There is a historic tree in the center of the site that is currently earmarked to remain in place and shall be accommodated in the project design. Two existing buildings on site will remain and renovated in separate design packages to be added to the project at a date in the future when the scope and program for the renovation is defined. Services related to any demolition of items that exist on the site is not part of the project.
