## REVIEW OF ECONOMIC AND FINANCIAL DEVELOPMENTS

## Domestic Economic Developments

Preliminary data suggest mild growth conditions in the Bahamian economy during the review period, as healthy gains in tourism output and a slightly lower pace of consumer demand moderated the weakness in foreigninvestment led construction activity. Persistent strengthening in global oil and other commodity values continued to exert significant upward pressure on domestic prices. Preliminary data for the third quarter of FY2007/2008, showed a significant improvement in the fiscal deficit, buoyed by revenue gains and a modest reduction in expenditure. On the monetary front, the slowdown in economic activity restrained the growth in bank liquidity which, alongside slackened private sector credit expansion, supported accretions to external reserves. In the external sector, the estimated current account deficit improved, supported by tourism income gains, lower net construction payments, and contracted net imports. However, the capital account surplus declined, owing to significantly tapered direct investment net inflows.

Amid less buoyant economic conditions, net free cash reserves of the banking system expanded by $\$ 34.4$ million ( $18.1 \%$ ) to $\$ 224.5$ million, substantially below the $\$ 81.1$ million increase in 2007, but representing a slightly higher percentage of Bahamian dollar deposits at $4.1 \%$. Similarly, accretions to the broader surplus liquid assets were $\$ 39.7$ million ( $26.2 \%$ ) higher at $\$ 191.6$ million, for a steadied $21.7 \%$ excess over the statutory minimum. With regard to loan costs, the weighted average interest rate on deposits widened by 22 basis points to $4.02 \%$, with the corresponding loan rate rising by 28 basis points to $11.0 \%$. Consequently, the interest rate spread advanced by 6 basis points to $6.98 \%$. Treasury bill rates declined, on average, by 14 basis points to $2.69 \%$; while the benchmark rates-the Central Bank's Discount Rate and the Commercial Banks' Prime-were unchanged at $5.25 \%$ and $5.50 \%$, respectively.

Reflecting mild real sector developments, money supply (M3) growth slackened to $2.6 \%$ from $3.4 \%$ a year earlier. The expansion in both savings and fixed deposits
moderated to $1.7 \%$ and $3.2 \%$, respectively, and the $6.9 \%$ gain in currency in active circulation in the year-earlier period was reversed to a $4.2 \%$ decline. Some offset was provided by strengthened accretions to demand deposits of $1.6 \%$.

Domestic credit fell marginally by $\$ 1.0$ million ( $0.01 \%$ ), down from a $\$ 60.1$ million ( $0.9 \%$ ) hike a year earlier. The outcome featured a moderation in private sector credit alongside a decline in net claims on the public sector. Specifically, claims on the private sector advanced at a slower rate of $0.6 \%$ ( $\$ 34.5$ million) relative to $1.6 \%$ ( $\$ 90.1$ million), whereas the decrease in net credit to the public sector was slightly extended to $2.9 \%$ (\$35.5 million).

Preliminary estimates of fiscal operations for the January to March quarter of FY2007/2008 indicated a $61.4 \%$ contraction in the overall deficit to $\$ 9.8$ million, supported by a $3.6 \%$ hike in revenue collections and a $0.7 \%$ reduction in expenditures. In terms of earnings, tax receipts advanced by $3.9 \%$, explained partly by a timingrelated increase in business and professional license fees as well as higher revenues from international trade and transaction taxes, which outpaced the downturn in property and gaming revenues. In contrast, non-tax revenues were relatively unchanged at $\$ 37.0$ million. With regards to spending, current expenditure rose by $\$ 4.5$ million (1.3\%) to $\$ 339.0$ million, buoyed by heightened outlays for transfers as well as personal emoluments. However, capital spending was reduced by $9.1 \%$ to $\$ 32.8$ million, owing to declines in outlays for health and economic services; and net lending for budgetary assistance to public entities fell by $22.2 \%$ to $\$ 13.1$ million.

The Direct Charge on the Government receded by $0.4 \%$ to $\$ 2,621.3$ million and, inclusive of the $1.8 \%$ falloff in liabilities guaranteed by the Government for public corporations, the National Debt moved lower by $0.6 \%$ to $\$ 3,045.2$ million.

Developments in the tourism sector registered a $2.3 \%$ upturn in total visitor arrivals vis-à-vis the 0.9\% decline last year, benefitting from increased arrivals from Canada and Europe. In terms of cruise arrivals, the
sector benefitted from the return of several cruise vessels and increased load factors. Air visitors grew by $3.5 \%$, while sea passengers expanded by $1.8 \%$. By major destinations, arrivals to New Providence fell by $0.8 \%$, owing to a $4.8 \%$ decline in the more significant sea component which overshadowed the $6.1 \%$ improvement in the air segment. Arrivals to Grand Bahama contracted by $13.5 \%$, due to weakness in both air ( $6.4 \%$ ) and sea (16.9\%) visitors. In contrast, the Family Island destinations registered a gain of $15.5 \%$, as air and sea arrivals increased by $0.8 \%$ and $18.4 \%$, respectively.

Consumer price inflation, as measured by changes in the Average Retail Price Index, moderated to $2.5 \%$ over the quarter vis-à-vis the $3.1 \%$ expansion last year, mainly due to more moderate rate of increases in transport \& communication and other goods and services costs.

Activity in the construction sector was primarily supported by domestic demand over the first three months of 2008, with mortgage disbursements up by $9.9 \%$ to $\$ 147.1$ million. Information from banks, insurance companies and the Bahamas Mortgage Corporation showed a strengthening in the number and value of mortgage commitments by $20.9 \%$ and $62.0 \%$, respectively. In terms of rates, average borrowing costs eased by 2 basis points to $8.8 \%$ for commercial mortgages, while the residential component firmed by 1 basis point to $8.6 \%$.

In the external sector, the estimated current account deficit was approximately halved to $\$ 190.1$ million during the quarter, as a combination of improved tourism receipts, lower net imports, and reduced construction services payments underpinned an expansion in the surplus on the services account. The deficit on the income account also narrowed by $\$ 11.5$ million, owing largely to reduced remittance of private related investment income, however, net transfer outflows firmed by $\$ 3.9$ million.

Consistent with the slowdown in foreign investment activity, the surplus on the capital and financial account was reduced by $\$ 47.7$ million to $\$ 382.7$ million. In particular, net direct investment inflows contracted by $\$ 124.9$ million to $\$ 185.0$ million, outpacing the growth in projectrelated loan inflows of $\$ 62.4$ million to $\$ 204.1$ million.

## FISCAL OPERATIONS

## OVERVIEW

Preliminary data for the third quarter of FY2007/2008 indicated that the fiscal deficit contracted by $61.4 \%$ to $\$ 9.8$ million, in comparison to the $2.3 \%$ advance in the corresponding quarter of FY2006/2007. The outcome was buoyed by broad-based growth in revenue receipts and a slight reduction in expenditure, due to declines in the capital and net lending segments.

## Revenue

Total revenue advanced by $3.6 \%$ to $\$ 375.2$ million, following a $16.4 \%$ expansion in the previous year. Tax receipts, which accounted for an estimated $90.1 \%$ of the total, firmed by $3.9 \%$ ( $\$ 12.8$ million) to $\$ 338.2$ million. Reflecting timing-related factors associated with revenues received from international business companies, business and professional business transactions expanded by

$68.6 \%$ ( $\$ 12.2$ million) to $\$ 30.1$ million. Taxes on international trade and transactions, which comprise the bulk of revenues at $46.1 \%$, grew by $8.3 \%$ ( $\$ 13.2$ million) to $\$ 173.0$ million-supported by improvements in both import ( $\$ 10.3$ million) and associated stamp taxes ( $\$ 3.2$ million). Property tax collections contracted by $35.5 \%$ ( $\$ 11.6$ million) to $\$ 21.0$ million, and gaming taxes were halved to $\$ 2.1$ million. Smaller percentage declines were recorded for motor vehicle and other stamp taxes.

Non-tax revenue, at 9.9\% of total receipts, remained relatively flat at $\$ 37.0$ million. The dominant category, fines, forfeits and administrative fees, rose by $3.5 \%$ to $\$ 20.8$ million and receipts from the sale of Government property advanced from less than $\$ 0.2$ million to $\$ 3.2$ million. However, income from other sources, consisting of dividends and rental income receipts, contracted by $19.9 \%$ ( $\$ 3.2$ million) to $\$ 13.0$ million.

## EXPENDITURE

Total expenditure fell marginally by $0.7 \%$ to $\$ 385.0$ million, in contrast to a $15.3 \%$ expansion in the corresponding period of 2007. The falloff was occasioned by a $\$ 3.3$ million ( $9.1 \%$ ) drop in capital spending ( $8.5 \%$ of the total), and a $\$ 3.7$ million ( $22.2 \%$ ) contraction in net lending. In contrast, current expenditure ( $88.1 \%$ of the total) rose by $\$ 4.5$ million ( $1.3 \%$ ) to $\$ 339.0$ million.

Growth in current outlays was largely explained by a $\$ 13.8$ million (12.1\%) hike in transfer payments to $\$ 127.7$ million. Consistent with the recent increments to Bahamian dollar debt, interest payments increased by 13.9\% to $\$ 35.7$ million. Subsidies \& other transfers also rose by $11.4 \%$ to $\$ 92.0$ million, with amounts earmarked for the Public Hospital Authority boosting subsidies by $15.6 \%$ and scholarship, pensions and gratuity payments elevating transfers to households by 44.5\%. Conversely, declines were posted for transfers to non-profit institutions (22.5\%), public corporations (6.2\%) and abroad $(37.3 \%)$. Meanwhile, the goods and services bill was lower by $\$ 9.9$ million ( $11.5 \%$ ) at $\$ 76.0$ million, reflecting a reduction in payments for contractual services; whereas, outlays for salaries and wages expanded marginally by $\$ 0.6$ million ( $0.4 \%$ ) to $\$ 135.3$ million.

By functional classification, expenditure on public services, which accounted for $28.1 \%$ of recurrent spending, tapered by $8.5 \%$ to $\$ 95.1$ million. Higher spending was posted for education ( $8.3 \%$ to $\$ 65.8$ million), health ( $13.5 \%$ to $\$ 60.1$ million), and defense ( $13.6 \%$ to $\$ 10.5$ million). The combined spending for social benefits and services also grew by $27.6 \%$ to $\$ 27.0$ million, mainly as a result of increased outlays for old age, disability \& services and other public assistance programmes. Expenditures for economic services, at $11.9 \%$ of current outlays, fell by $19.8 \%$ to $\$ 40.3$ million, primarily reflecting contractions in the tourism (15.7\%) and air transportation (56.2\%) areas.

The $9.1 \%$ fall-off in capital spending to $\$ 32.8$ million was primarily associated with a decline in asset acquisitions, particularly land, by $23.4 \%$ to $\$ 9.6$ million. Expenditures on infrastructure projects also softened by $2.2 \%$ to $\$ 22.0$ million.

## FINANCING AND NATIONAL DEBT

During the review quarter, the Direct Charge on Government declined from the previous quarter, by $\$ 11.3$ million ( $0.4 \%$ ) to $\$ 2,621.3$ million, but exceeded the yearearlier level by $\$ 193.8$ million (8.0\%). Bahamian dollar denominated debt constituted $88.9 \%$ of the total, being held by private and institutional investors (31.5\%), public corporations (31.3\%), commercial banks (23.3\%), the Central Bank ( $13.8 \%$ ) and other local financial institutions (0.1\%). By security type, Government long-term bonds represented the largest portion of the debt (86.8\%), bearing an average maturity of 11.8 years. Next were Treasury bills, at $9.9 \%$, with loans and advances from commercial banks and the Central Bank for the remainder, at 3.3\%.

Government's contingent liabilities, being debt guaranteed for public corporations and the private sector, fell by $1.8 \%$ to $\$ 423.9$ million. As a result, the National Debt was $0.6 \%$ below the previous quarter at $\$ 3,045.2$ million, but surpassed the March 2007 level by $\$ 124.0$ million (4.2\%).

## Public Sector Foreign Currency Debt

Preliminary data on the public sector's foreign currency debt for the March quarter indicated a $6.2 \%$ expansion in debt obligations to $\$ 680.5$ million, as new drawings of $\$ 50.0$ million outdistanced the $\$ 10.1$ million in amortization payments. Public corporations held $\$ 389.1$ million of the total ( $57.2 \%$ ), and Government, the remaining $\$ 291.4$ million (42.8\%).

By creditor profile, commercial banks continued to hold the majority of foreign currency debt (53.8\%), followed by private capital markets (29.4\%), multilateral institutions (15.5\%), other agencies (0.8\%) and bilateral institutions (0.5\%).

The public sector's foreign currency debt service payments fell by $18.0 \%$ to $\$ 14.0$ million, in comparison to the corresponding quarter last year, as interest outlays declined by $23.9 \%$ to $\$ 4.0$ million and amortization payments contracted by $15.5 \%$ to $\$ 10.1$ million. Debt service represented $1.5 \%$ of exports of good and non-factor services, while the ratio of debt service to total revenue rose marginally to $0.5 \%$.

## Real Sector

TOURISM
Although expenditure data are not yet available, other indications of tourism activity, especially trends in banks' purchases of foreign currency from customers suggest a positive outturn for the first quarter of 2008.

Supportive of this outcome, preliminary data indicate a rebound in total visitor arrivals of $2.3 \%$ to $1,303,601$ vis-à-vis a $0.9 \%$ decline to $1,274,045$ a year earlier. Air arrivals grew by $3.5 \%$ to 403,333, a reversal from the 5\% contraction a year ago; and sea traffic, which accounted for $69.1 \%$ of the total, firmed by a slightly higher $1.8 \%$ to 900,268 , reflecting the return of a few cruise vessels as well as increased load factors. An analysis of stopover visitors by country of origin revealed strengthened gains in Canadian and European traffic of $25.8 \%$ and $9.5 \%$, respectively, reflecting the appreciation of their currencies vis-à-vis the US dollar; whereas longer stay visitors from the US market, at $79 \%$ of the total, was relatively flat.

Among the main domestic destinations, arrivals to New Providence contracted, by $0.8 \%$ to $\$ 0.7$ million, as the $6.1 \%$ gain in air travelers was overshadowed by the 4.8\% fall in the larger sea segment. Visitors to Grand Bahama also fell by $13.5 \%$, extending the $8.1 \%$ downturn in the first quarter of 2007 and reflecting decreases in both air (6.4\%) and sea (16.9\%) visitors. In contrast, growth in arrivals to the Family Islands strengthened to 15.5\% from 8.0\% a year earlier, largely on account of an $18.4 \%$ gain in the sea component.

## Construction

Despite indications of slackened foreign investmentrelated construction activity, preliminary evidence suggests that domestic investments, alongside smaller scaled resort developments continued to support mild gains in the sector during the review quarter. On the domestic side, mortgage disbursements for new construction and repairs rose by $4.2 \%$ ( $\$ 2.9$ million) to $\$ 71.4$ million, owing to a more than $50 \%$ increase in the commercial component to $\$ 7.9$ million, while the residential segment firmed marginally by $0.1 \%$ to $\$ 63.6$ million.

Similarly, mortgage commitments for new construction and repairs-a leading indicator of future construction activity-firmed in number by $20.9 \%$ to 312 and in value by $62.0 \%$ to $\$ 49.1$ million. Residential commitments led the increase, rising by $21.5 \%$ in number to 300 and by $67.4 \%$ in value to $\$ 46.7$ million. For the commer-
cial segment, the number of commitments edged up by 1 to 12 , with the value unchanged at $\$ 2.4$ million.

Marginal changes were recorded for borrowing costs during the review period, as the average interest rate on commercial mortgages fell by 2 basis points, on a year-on-year basis, to $8.8 \%$ at end-March, vis-à-vis a 1 basis point increase to $9.0 \%$ over the same period in 2007. In contrast, lending rates for residential mortgages rose by 1 basis point to $8.6 \%$, in line with the expansion posted a year earlier.

## Prices

Following on increased global fuel and commodity price pressures, domestic consumer prices rose by $2.5 \%$ during the first quarter of 2008, albeit lower than the 3.1\% gain noted a year earlier. The easing in inflationary rates mainly reflected moderations in the rate of price increases for transportation \& communication and other goods \& services components, by 2.5 and 7.1 percentage points to $2.5 \%$ and $0.8 \%$, respectively; while average costs for recreation, entertainment \& services contracted by $2.1 \%$, compared to a $7.2 \%$ gain a year earlier. However, accelerated price increases were registered for housing, the largest component of the Index, by 0.6 percentage points to $1.5 \%$; medical care \& health, by 2.0 percentage points to $5.6 \%$; food \& beverages, by 0.8 percentage points to $4.2 \%$ and clothing \& footwear, by 0.8 percentage points to $1.5 \%$.

For the 12-months to March, average consumer price inflation was 0.1 percentage points higher at $2.4 \%$, reflecting broad-based gains in the major categories. The largest price accelerations were recorded for furniture and household consumption (6.6\%), medical care \& health $(3.5 \%)$, transport \& communication (3.1\%), education ( $2.5 \%$ ), and more modest price appreciations were registered for food and beverages ( $3.8 \%$ ), recreation \& entertainment services $(1.5 \%)$, clothing \& footwear and other goods \& services ( $1.1 \%$ ) each and housing ( $0.6 \%$ ).

The surge in global oil prices elevated average domestic expenditures for fuel and electricity charges. The average cost of gasoline firmed by $2.8 \%$ to $\$ 4.63$ per gallon, and the price of diesel rose by $8.6 \%$ to $\$ 4.34$ per gallon. The Bahamas Electricity Corporation hiked its fuel surcharge, from $13.27 \phi$ to $15.95 \phi$ per KWH, an upward adjustment of $20.1 \%$ from end-2007.

Money, Credit and Interest Rates

## Overview

During the first quarter of 2008, monetary conditions featured a moderation in private sector credit expansion, which alongside healthy real sector related foreign currency inflows supported an improvement in liquidity and external reserves, and a reduction in banks' net foreign liabilities. In this context, the interest rate spread widened, as the weighted average loan rate firmed more than the corresponding deposit rate.

Data for the fourth quarter of 2007 indicated that banks' profitability ratios moderated, as net income fell due to increased costs for several major categories. In addition, asset quality indicators for the first three months of 2008 signaled some deterioration in banks' long-term credit conditions, as the proportion of non-performing loans to total loans rose marginally.

## Liquidity

Supported by seasonal foreign currency inflows, net free cash reserves of the banking system advanced by $\$ 34.4$ million ( $18.1 \%$ ) to $\$ 224.5$ million, although below the $\$ 81.1$ million ( $69.2 \%$ ) gain to $\$ 198.3$ million posted

over the same period of 2007. Banks' free cash balances represented an enlarged $4.1 \%$ of total Bahamian dollar deposits, relative to $3.9 \%$ a year ago. Similarly, the broader surplus liquid assets grew by a lesser $\$ 39.7$ million (26.2\%) to $\$ 191.6$ million, vis-à-vis $\$ 112.3$ million a year earlier, and was largely concentrated in increased Treasury bill holdings. Nonetheless, the excess over statutory minimum of $21.7 \%$ was relatively unchanged from 2007's level.

## Deposits and Money

The expansion in the monetary aggregates tapered to $2.6 \%$ from $3.4 \%$ in 2007, occasioned by a decelerated buildup in private sector deposits and a contraction in currency in active circulation. Growth in narrow money (M1) slackened to $0.6 \%$ from $1.3 \%$ a year earlier, underpinned by a $4.2 \%$ reduction in currency in active circulation, in contrast to last year's $6.9 \%$ upturn. Conversely, demand deposit gains strengthened by $1.6 \%$ from $0.3 \%$ a year ago.

Advances in broad money (M2) narrowed to 2.3\% from $3.5 \%$ in 2007, as savings deposit growth was nearly halved to $1.7 \%$ and gains in fixed deposits slackened to
3.2\% from 4.5\%. However, the expansion in residents' foreign currency deposits quickened to $9.5 \%$ from $0.8 \%$. Consequently, overall money (M3) growth receded to $\$ 145.2$ million ( $2.6 \%$ ), for an end-quarter stock of $\$ 5,782.5$ million, representing a slowdown from the $\$ 176.8$ million (3.4\%) expansion a year ago.

By composition, Bahamian dollar fixed deposits maintained the largest component ( $56.1 \%$ ) of the money stock, followed by demand ( $18.9 \%$ ) and savings (17.5\%) balances; while residents' foreign currency deposits and currency in active circulation comprised $3.8 \%$ and $3.7 \%$, respectively.

## Domestic Credit

Occasioned by a substantial contraction in credit to the public sector, combined with an easing in consumer demand, net domestic credit declined marginally by $\$ 1.0$ million $(0.01 \%)$ during the review quarter, contrasting with an increase of $\$ 60.1$ million ( $0.9 \%$ ) a year earlier. Growth in the Bahamian dollar component, which comprised $90.8 \%$ of the total, receded to $\$ 48.7$ million ( $0.7 \%$ ) from $\$ 141.5$ million ( $2.4 \%$ ), due to a slowing in private sector credit expansion and a turnaround in public sector net balances. Reflecting loan repayments by hotels and the public sector, foreign currency credit contracted by $\$ 49.8$ million (6.8\%), following a fall of $\$ 81.3$ million ( $10.0 \%$ ) in 2007.

Net claims on the public sector fell at a comparable rate of $2.9 \%$ ( $\$ 35.5$ million) vis-a-vis the corresponding year-earlier period. Higher deposit holdings facilitated a strengthened $\$ 26.7$ million ( $3.1 \%$ ) reduction in net credit to Government, relative to $\$ 12.8$ million (1.9\%) in 2007; whereas the decline in claims on the rest of the public sector was lower at $\$ 8.8$ million (2.5\%) from $\$ 17.1$ million (4.3\%) a year ago.

In line with the moderation in economic growth, accretions to private sector credit receded to $\$ 34.5$ million ( $0.6 \%$ ) from $\$ 90.1$ million (1.6\%). Growth in the Bahamian dollar component was curtailed to $\$ 69.9$ million (1.2\%) from $\$ 88.2$ million (1.7\%), and there was a $\$ 35.4$ million (7.1\%) net repayment in the foreign currency portion in contrast to a modest accumulation of $\$ 1.9$ million (0.4\%) a year ago.

Private sector lending continued to be concentrated in personal loans ( $75.0 \%$ ), which registered a lower rate of expansion at $\$ 51.8$ million (1.1\%) relative to $\$ 76.7$ million (1.9\%) in the previous period. Accretions to residential mortgages moderated to $2.7 \%$ ( $\$ 62.5$ million) from $3.3 \%$ ( $\$ 66.9$ million), and consumer credit growth was more than halved to $0.8 \%$ ( $\$ 17.6$ million) from $1.9 \%$ ( $\$ 35.9$ million) a year-earlier. However, personal overdraft balances declined by $9.8 \%$ ( $\$ 11.7$ million), a turnaround from last year's $7.8 \%$ ( $\$ 6.0$ million) increase.

A disaggregation of consumer credit showed notable increases in loans for debt consolidation ( $\$ 8.7$ million), land purchases ( $\$ 5.7$ million), miscellaneous credit ( $\$ 3.4$ million), home improvements ( $\$ 1.9$ million), credit cards ( $\$ 1.3$ million) and medical ( $\$ 0.5$ million) purposes. Conversely, net repayments were recorded for travel ( $\$ 2.5$ million), education ( $\$ 0.8$ million) and private cars ( $\$ 0.7$ million).

Among the other private sector credit categories, gains in bank lending were registered for miscellaneous purposes ( $\$ 27.4$ million), transport ( $\$ 19.1$ million), distribution ( $\$ 2.9$ million), entertainment \& catering (\$2.3
million), professional \& other services ( $\$ 2.2$ million), agriculture ( $\$ 0.6$ million) and manufacturing ( $\$ 0.2$ million). Some offset was provided from net repayments for construction ( $\$ 54.1$ million), tourism ( $\$ 14.3$ million), fisheries ( $\$ 2.2$ million), mining \& quarrying ( $\$ 0.9$ million) and private financial institutions ( $\$ 0.7$ million).

## Mortgages

Total Bahamian dollar mortgages outstanding expanded by $1.8 \%$ ( $\$ 52.0$ million) to $\$ 2,864.5$ million, which was below the $2.4 \%$ ( $\$ 60.5$ million) pace last year. The residential segment-which comprised $92.1 \%$ of the total, grew by $2.1 \%$ to $\$ 2,636.9$ million. In contrast, commercial mortgages declined marginally by $0.9 \%$, following a 3.0\% reduction a year ago. At end-March, 2008 commercial banks maintained the majority of outstanding mortgages ( $89.3 \%$ ), followed by insurance companies (6.6\%) and the Bahamas Mortgage Corporation (4.1\%).

## The Central Bank

Lower holdings of Treasury bills, combined with a buildup in Government's deposits, occasioned a reduction
in the Central Bank's net claims on Government, by $\$ 37.3$ million ( $11.2 \%$ ) to $\$ 295.0$ million during the quarter, a reversal from last year's $\$ 11.7$ million ( $6.4 \%$ ) expansion to $\$ 194.2$ million. Net liabilities to the rest of the public sector increased by $\$ 7.8$ million to $\$ 10.7$ million and were mainly in the form of higher deposit balances.

Given the slowdown in consumer demand, combined with tourism-related inflows, external reserves improved by $\$ 85.3$ million ( $18.8 \%$ ) to $\$ 539.6$ million at end-March-although below the $\$ 123.9$ million ( $24.8 \%$ ) rise in the corresponding period last year.

At end-March, the stock of external reserves was equivalent to an approximated 12.2 weeks of non-oil merchandise imports, compared to 14.0 weeks for the previous year. When adjusted for the statutory required $50 \%$ of demand liabilities, which have to be supported by the external balances, "useable" reserves, or Central Bank liquidity, stood lower at $\$ 160.9$ million compared to $\$ 259.3$ million in 2007.

Based on foreign currency transactions-which underpinned the external reserve growth, the Central Bank's net foreign currency purchase was lower at $\$ 81.3$ million from $\$ 117.5$ million last year. Underlying this out- come was a surge in total sales by $\$ 72.2$ million ( $52.7 \%$ ) to
\$209.3 million, which offset the $\$ 36.0$ million ( $14.1 \%$ ) growth in total purchases to $\$ 290.5$ million. The net inflow from the Government firmed by $\$ 60.4$ million to $\$ 69.2$ million, partly due to receipts from the seabed lease agreement. However, net sales to the rest of the public sector rose by $\$ 4.5$ million to $\$ 74.5$ million, and the net purchase from commercial banks contracted by more than half to $\$ 86.5$ million.

## Domestic Banks

Underpinned by foreign currency inflows and a moderation in domestic credit growth, banks' deposit liabilities increased during the review period. Private sector credit expansion of $\$ 34.5$ million ( $0.6 \%$ ) trailed the $\$ 137.9$ million (2.8\%) gain in deposit liabilities. Increased holdings of Treasury bills and short-term lending boosted banks' net claims on Government, by $\$ 10.6$ million (2.0\%), a reversal of the previous year's contraction of $\$ 24.5$ million (5.0\%). Following last year's $\$ 17.0$ million (4.4\%) decline, net claims on the rest of the public sector fell by a reduced $\$ 8.7$ million ( $2.5 \%$ ). Partly reflecting comparatively less foreign investment-related inflows, the expansion in banks' claims on the Central Bank slackened to $\$ 49.3$ million (10.9\%), significantly below the $\$ 113.3$ million strengthening last year. Banks' accumulation of capital and surplus resources, associated with profits and retained earnings, rose by $\$ 52.5$ million, while their net foreign liabilities fell by $\$ 72.5$ million ( $10.9 \%$ ).

Domestic banks' aggregate deposit liabilities, including balances owed to Government, totaled \$5,676.5 million, the bulk ( $96.1 \%$ ) of which was in Bahamian dollars. The largest share was held by private individuals ( $58.1 \%$ ), followed by business firms (23.9\%), the public sector ( $9.9 \%$ ), other depositors ( $4.8 \%$ ) and private financial institutions (3.3\%). Fixed deposits accounted for $61.0 \%$ of the total, with demand and savings balances at $20.5 \%$ and $18.5 \%$, respectively.

An analysis of Bahamian dollar accounts by number and range of value show the majority of deposits ( $90.1 \%$ ) being concentrated in the up to $\$ 10,000$ range, although corresponding to a mere $7.5 \%$ of the total value. Balances between $\$ 10,000$ and $\$ 50,000$ represented $6.8 \%$ of total contracts and $12.8 \%$ of aggregate value. Conversely, individual balances exceeding $\$ 50,000$ comprised $3.1 \%$ of accounts and constituted $79.7 \%$ of total value.

Adjusted for goodwill, banks' Bahamian dollar capital and surplus position grew at a quarterly rate of $3.6 \%$ to $\$ 1,562.4$ million compared to a $2.0 \%$ gain a year earlier. Profits and retained earnings corresponded to an elevated $58.0 \%$ of capital and surplus, relative to $52.0 \%$ in the same period last year, as general and specific reserves against loan losses narrowed to 8.6\% from 10.4\% of the total. Total reserves and provisions, as a percentage of the private sector's loan portfolio, stood slightly lower at $2.3 \%$ at end-March.

Asset quality measures for the first quarter of 2008 indicate that banks adopted a conservative posture against credit risks, incrementing their Bahamian dollar loan loss provisions to $2.3 \%$ of the total private sector portfolio, from $2.2 \%$ at end-December 2007 and $2.1 \%$ at end-March of the same year. However, compared to the previous quarter, the ratio of provisions to total nonperforming loans was stable at $47.9 \%$, although below the $51.1 \%$ recorded at end-March 2007. In terms of the various components, the arrears rate for consumer loans rose over the quarter and year, by 0.5 and 1.6 percentage points, respectively. The total arrears rate for loans with payments past due decreased to $9.1 \%$ of out-
standing private balances from 9.4\% at end-December, but remained above the $7.7 \%$ posted in the comparative 2007 period. Similarly, although the level of delinquency for residential mortgages receded to $9.9 \%$ from $10.4 \%$ at end-December 2007, it was still higher than the $7.3 \%$ registered in the same quarter last year. The commercial mortgages arrears rate was reduced to $8.4 \%$ from $9.3 \%$ at the end of the previous quarter and $10.0 \%$ at endMarch 2007.

Total non-performing loans, represented by accounts with past due payments of at least three (3) months, on which banks stopped accruing interest, firmed slightly to $4.7 \%$ of outstanding claims, from $4.5 \%$ at the end of the previous quarter and $4.1 \%$ a year-earlier.

## Bank Profitability

For the quarter ended December 2007, the latest quarter for which data is available, domestic banks' earnings indicators moderated, with estimated net income lower at $\$ 68.1$ million from $\$ 71.2$ million ( $4.3 \%$ ) in the corresponding 2007 period. The gross earnings margin

Domestic Banks' Profitability

fell by $3.2 \%$ to $\$ 120.4$ million, as a $4.0 \%$ rise in interest income was overshadowed by a $10.5 \%$ hike in interest expense and a $47.3 \%$ reduction in commission and foreign exchange income. Banks also registered a 6.7\% increase in non-interest operating costs, to $\$ 61.3$ million, inclusive of higher occupancy ( $18.5 \%$ ) and other operating (18.4\%) expenses. Meanwhile, 'other' income rose more than two-fold to $\$ 9.0$ million, as a $40.4 \%$ decrease in bad debt expenses offset the $10.0 \%$ drop in other income and the $4.7 \%$ firming in depreciation costs.

These developments were correspondingly reflected in a softening in profitability ratios relative to average domestic assets. The net interest margin ratio narrowed by 46 basis points to $5.51 \%$, and relative flows from commission and foreign exchange income declined by 23 basis points to $0.22 \%$ of average assets. Similarly, the operating cost ratio contracted by 5 basis points to $2.92 \%$, and the net income (return on assets) softened by 44 basis points to $3.24 \%$.

## Interest Rates

Interest rate trends featured a broadening in commercial banks' average interest rate spread on loans and deposits, by 6 basis points to $6.98 \%$. The weighted average loan rate firmed by 28 basis points to $11.00 \%$, while the corresponding deposit rate widened by 22 basis points to $4.02 \%$.

On the deposit side, the average interest rate on fixed maturities fluctuated within a higher band of $3.74 \%$ $5.05 \%$ vis-à-vis $3.58 \%-4.71 \%$ in the previous quarter, signaling increased competition for longer-term placements. For savings, the average rate offered rose by 6 basis points to $2.30 \%$, but held steady at $1.41 \%$ for demand deposits.

In terms of loans, the average interest rate on consumer loans and commercial mortgages narrowed by 5 basis points to $13.00 \%$ and 61 basis points to $8.62 \%$, respectively. The average rate on overdrafts, which constitute $12.7 \%$ of the loan portfolio, firmed by 47 basis points to 11.34\%; the residential mortgage lending rate increased by 7 basis points to $8.36 \%$, while the "other" local loan rate advanced, on average, by 19 basis points to $8.16 \%$.

| Banking Sector Interest Rates Period Average (\%) |  |  |  |

| Weighted Avg Loan Rate | 10.35 | 10.72 | 11.00 |

The average 90-day Treasury bill rate trended lower by 14 basis points to $2.69 \%$; however, the benchmark rates-Central Bank's Discount Rate and Commercial Banks' Prime-were unchanged at $5.25 \%$ and $5.50 \%$, respectively.

## Capital Markets Developments

During the first quarter of 2008, domestic capital market activities remained relatively positive, despite a subdued economic environment. Increased investor activity resulted in the trading volume rising to 1.2 million shares valued at $\$ 7.5$ million, compared to 0.8 million shares at $\$ 5.1$ million in the same quarter last year. However, reflective of a contraction in the share prices of a number of companies, the Bahamas International Securities Exchange (BISX) All Share Price Index fell by $5.0 \%$ to $1,963.40$ points, in contrast to the last quarter's gain of $8.2 \%$ and a $6.2 \%$ increase in the first quarter of 2007. As a consequence, market capitalization on BISX declined by an estimated $6.8 \%$ to $\$ 3.1$ billion. On the
fixed income side, there were no new Bahamas Government Registered Stock issues during the quarter.

Fidelity Capital Market Limited's share price index (Findex)-which captures over-the-counter tradingdecreased by $1.6 \%$ to 938.3 points during the review quarter, compared to a $6.1 \%$ appreciation in the first quarter of 2007.

## International Trade and Payments

Provisional data for the first quarter of 2008 indicate a near halving in the current account deficit to $\$ 190.1$ million over the same period last year. Gains in travel receipts combined with a reduction in foreign investmentrelated construction payments boosted the surplus on the services account, and a contraction in imports contributed to a narrowing of the goods deficit. On the capital and financial account side, the reduced surplus position was mainly on account of decreased direct investments via domestic equity and real estate acquisitions by foreigners, which outpaced growth in other sources of private investments.

The estimated merchandise trade deficit fell by $3.1 \%$ ( $\$ 19.0$ million) to $\$ 600.6$ million vis-à-vis a year ago. Continued firming in global oil prices resulted in a 59.9\% ( $\$ 91.2$ million) surge in oil imports to $\$ 243.5$ million, which countered the $23.6 \%$ ( $\$ 110.2$ million) reduction in the non-oil import bill to $\$ 357.0$ million. The increase in oil imports was broadly based, reflecting significant cost per barrel gains for propane (44.4\%), motor gas (49.0\%), jet fuel ( $60.1 \%$ ), bunker ' C ' ( $70.6 \%$ ), and gas oil ( $71.7 \%$ ).

The services account surplus improved by an estimated $56.4 \%$ ( $\$ 120.0$ million) to $\$ 332.7$ million. Gains in visitor arrivals combined with higher room rates boosted net travel receipts by $2.2 \%$ ( $\$ 10.9$ million) to $\$ 506.5$ million, and net outflows for construction services declined by $82.0 \%$ ( $\$ 62.6$ million) to $\$ 13.7$ million, amid retrenched tourism related investment activities. Similarly, net outflows for the other "miscellaneous" services and Government services narrowed by 19.0\% (\$23.9 million) to $\$ 102.1$ million and $62.8 \%$ ( $\$ 10.9$ million) to $\$ 6.4$ million, respectively.

The deficit on the income account moved lower by an estimated $25.2 \%$ ( $\$ 11.5$ million) to $\$ 34.1$ million, explained by contractions in both net labour income payments ( $\$ 1.5$ million) and net investment outflows ( $\$ 10.0$ million). The latter included a $46.1 \%$ improvement in commercial banks' net factor income receipts to $\$ 11.2$ million, and a reduction in remittances by other private companies of $18.1 \%$ to $\$ 34.2$ million. In contrast, net official inflows decreased by $21.0 \%$ ( $\$ 1.2$ million) to $\$ 4.3$ million.

Net current transfers advanced by $36.2 \%$ ( $\$ 3.9$ million) to $\$ 14.7$ million, reflecting a $\$ 4.6$ million gain in inflows to the Government to $\$ 17.3$ million, which offset the $\$ 0.7$ million increase in outflows for workers' remittances to $\$ 2.6$ million.

Preliminary data suggest that the surplus on the capital and financial account narrowed by $\$ 47.7$ million to $\$ 382.7$ million, led by a $12.7 \%$ ( $\$ 57.4$ million) decline to $\$ 394.3$ million in the financial account surplus, which overshadowed sharply recessed capital transfers of \$11.6 million. With regards to the financial account, net direct investment inflows fell by 40.3\% (\$124.9 million) to $\$ 185.0$ million, as net equity and foreign real estate inflows receded by $8.7 \%$ to $\$ 130.4$ million and $67.3 \%$ to
$\$ 54.7$ million, respectively. Other net inward investments registered a $\$ 62.4$ million gain to $\$ 204.1$ million, led by a $68.8 \%$ ( $\$ 113.6$ million) expansion in net private sector borrowings related to foreign investment financing. In contrast, domestic banks recorded a net repayment of $\$ 72.5$ million, more than double last year's $\$ 26.4$ million,
as a number of hotel properties reduced their outstanding liabilities. Net transactions with the Central Government were reversed to a $\$ 0.8$ million outflow from a $\$ 4.3$ million inflow a year earlier; and outward portfolio investments were $\$ 5.1$ million at end-March, compared to a nil position a year ago.

After adjusting for possible net errors and omissions, the surplus on the overall balance, which reflects the change in the Central Bank's external reserves, moderated to $\$ 85.6$ million vis-à-vis $\$ 123.9$ million a year ago.

## INTERNATIONAL ECONOMIC DEVELOPMENTS

During the March quarter, international developments were squarely focused on the adverse impact of the United States housing and credit crisis. Amid the resulting turmoil in the global financial sector, the United States Federal Reserve, along with other major central banks, implemented measures geared at preventing the crisis from spreading rapidly to other sectors of their economies.

Despite the actions of the central banks, major concerns over the depth and duration of the financial down-turn-which culminated in the collapse of a major investment bank in the United States-contributed to significant declines in equity indices worldwide, and led to further erosion in the value of the US dollar. Increased demand among emerging markets combined with supply constraints underpinned a significant firming in the prices of several major commodities, providing further impetus to inflation, which rose to elevated levels in a number of countries.

Reflecting continued weakness in the housing and financial sectors, economic output remained moribund in the United States, as the economy expanded marginally by $0.9 \%$, following growth of $0.6 \%$ in the same period of 2007. The outcome was attributed to increased personal expenditures for services, exports of goods and services
and federal government spending, which overshadowed declines in residential fixed investment, and personal consumption expenditure for durable goods. Despite the $3.8 \%$ expansion in business and financial services, a 4.5\% decline in mining and quarrying output resulted in the UK's GDP growth slowing by 0.4 percentage points to $2.5 \%$ on an annual basis, compared to the first quarter of 2007. Buoyed by the $1.5 \%$ upturn in the German economy, real GDP in the euro zone firmed by $0.8 \%$ in the first quarter of 2008, on par with the increase recorded in the same period of 2007. Economic output among the Asian economies rose at a reduced rate. China's GDP expanded on a year-on-year basis by $10.6 \%$ in the first quarter, down from the $11.7 \%$ recorded in 2007, as severe weather conditions reduced domestic activity and contributed to a fall in exports. Amid firming in import growth, accretions to real GDP in Japan softened to 4.0\% compared to a rate of $4.5 \%$ last year.

Buoyed by contractions in the construction and financial services sectors, the unemployment rate in the United States firmed by 0.1 percentage points to $5.1 \%$ at end-March. In the United Kingdom, the jobless rate remained unchanged at $5.2 \%$ compared to the previous quarter, but fell by 0.3 percentage points over the year. Supported by improvements in the unemployment rates in Germany and France, by 0.4 and 0.1 percentage points to $7.4 \%$ and $7.8 \%$, respectively, the unemployment rate in the euro zone declined marginally by 0.1 percentage points to $7.1 \%$. Amid the improving economic situation, Japan's jobless rate moved lower to 3.8\%.

Given the increased uncertainty regarding the United States economy, the dollar continued its fall against most of the major currencies during the review period. The dollar weakened on a quarterly basis against the Yen, by $10.8 \%$ to $¥ 99.69$, against the yuan, by $3.9 \%$ to RMB 7.0120 and vis-à-vis the euro, by $7.6 \%$ to $€ 0.63$. Conversely, in light of the challenges faced by the financial sector in the United Kingdom, the dollar maintained its value against the Pound Sterling of $£ 0.50$.

Equity markets worldwide suffered significant losses during the quarter, amid the heightened uncertainty caused by the adverse effects of the global financial sector crisis. In the US, the Dow Jones Industrial Aver-
age declined by $7.6 \%$ to $12,262.9$ points, as weakness in the financial sector dampened investors' confidence. Likewise, the Standard \& Poor's 500 Index (S\&P 500) had its worst quarterly performance in five years, contracting by $10.4 \%$ to 1,324 points. The European markets also reacted negatively to the economic uncertainty, with the major equity indices declining over the period. The UK's FTSE 100 decreased by $11.7 \%$, and Germany's DAX and France's CAC 40 moved lower by 19.0\% and $16.2 \%$, respectively. With regards to Asia, Japan's Nikkei 225 recorded its worse quarterly performance in 18 years, falling by $18.2 \%$, and China's Shanghai Composite index slumped by $34.0 \%$, after surging by $145.2 \%$ in the same period of 2007.

In commodity markets, crude oil prices registered exceptional volatility and price appreciation, driven by a number of factors, including the instability in the financial markets, the depreciation of the US dollar and the slowdown in the US economy, alongside increased recourse to hedging strategies. Oil prices were at $\$ 92.39$ at endJanuary, and rose to the $\$ 100$ mark by mid-March. At end-March, oil prices had risen to \$104.17, a 9.7\% hike over the end-December 2007 level. Similar developments were noted in other commodity markets, as gold prices rose by $9.9 \%$ to $\$ 916.88$ per ounce, and silver firmed by $16.6 \%$ to $\$ 17.24$ per ounce.

As the outlook for the housing and financial sectors worsened in the United States, the Federal Reserve rapidly increased the level of monetary accommodation by lowering the primary credit and federal funds rates, on three occasions, during the quarter. Consequently, the primary credit rate was reduced by 2.25 percentage points to $2.50 \%$ and the federal funds rate moved lower by 2.0 percentage points to $2.25 \%$. The Federal Reserve also injected additional liquidity into the banking sector and allowed investment banks to borrow directly from its discount window. In an effort to stimulate activity in the credit market and lower borrowing costs, the Bank of England cut its targeted rate twice, by a total of 0.50 percentage points to $5.00 \%$, to prevent the economy from going into a recession. In contrast, the European Central Bank maintained its marginal lending and deposits rates at $5.00 \%$ and $3.00 \%$, respectively, although inflation remained above the Bank's $2.0 \%$ target rate, due to higher food and energy prices. With inflation relatively benign and economic output expanding at a modest
pace, the Bank of Japan held its overnight call and basic loan rates at 0.50\% and 0.75\%, respectively. The People's Bank of China maintained its restrictive monetary policy stance, as rapid increases in business investment led to a surge in average consumer prices. As a result, the Bank hiked the reserve requirement ratio by 0.5 percentage points to $15.5 \%$.

In the external sector, the United States' deficit on goods and services increased by $\$ 263$ million to $\$ 178.9$ billion during the first quarter compared to the same period of the previous year, reflecting an expansion in the goods deficit, which outpaced the improvement in the surplus on the services account. The euro zone's trade
deficit grew significantly, by $€ 10.9$ billion to $€ 12.2$ billion, as the region's fuel imports appreciated considerably through the opening two months of the year. Similarly, the United Kingdom's trade and services deficit increased to $£ 13.4$ billion, reflecting a weakening in the services account surplus in addition to the deterioration in the goods deficit. For the first quarter of 2008, Japan's current account surplus decreased by $4.3 \%$ to $¥ 6.6$ trillion. The surplus on the trade account in China contracted, as a weakening in demand from the United States and severe winter weather hampered its exports. For the first quarter, its trade surplus narrowed to US\$41.4 billion, compared to US\$46.3 billion in the same period of 2007.

## Gross Economic Contribution of the Financial Sector in The Bahamas (2007)

## Introduction

The 2007 survey of the gross economic contribution of the financial sector, with a data pool spanning almost 35 years, highlights the sector's continuing significance to the local economy-estimated at an average $15 \%-20 \%$ of the country's gross domestic product (GDP). While the analysis of bank and trust operations remains the key focus of this exercise, recent attempts to both enhance and broaden the scope of survey information entailed greater emphasis on the contribution of other financial services, including credit unions, insurance companies and investment funds.

Generally, banking sector activities during 2007 pointed to increased outlays for both domestic and international segments, alongside employment gains. Similar trends were noted for other non-bank financial sector institutions. Regulatory and legislative efforts continued to be geared towards increasing the sector's competitiveness and soundness by ensuring compliance with international standards and best practices.

## Banking Sector

The banking sector in The Bahamas represents one of the most important pillars within the local economy. Based on the results of the 2007 survey conducted by the Central Bank, the sector's performance featured sustained employment and spending growth, combined with increased capital investments. The total number of banks and trusts companies licensed to operate from or within The Bahamas decreased by 3 to 245 over the previous year, following the cessation of business by 8 licensees and the issuance of 5 new licenses. Of the 245 licensees, more than three quarters (214) had a physical presence in the jurisdiction, a decline of one from the previous year's total; and the remaining 31, which are mainly G-8 branches, operated under managed arrangements approved by the Central Bank, and consistent with international best practices. The number of public banks and trust companies tapered by 5 to 138, while restricted and non-active entities increased marginally by 2 to 107. Among the public banks and trusts, Bahamian incorporated companies fell by 3 to 87 ; euro-currency operations declined by 1 to 30; whereas, the surrender of an
authorized dealer and agent designation decreased the number of domestic banks to 22.

In line with the overall growth in the sector, the asset holdings of international banks and trust companies maintained an upward trajectory. For the period ending June 2007, the total asset base of these entities firmed by $1.1 \%$ ( $\$ 3.7$ billion) to $\$ 351.2$ billion. On the domestic side, banks' assets strengthened by $\$ 692.7$ million (8.9\%) to $\$ 8.4$ billion, with the average return on asset ratio steady at $3.7 \%$ in 2007, and profits higher by $10.3 \%$. In contrast, due to reductions in deposit balances as well as investments in capital market instruments, the total value of fiduciary assets under management contracted by an estimated 11.6\% ( $\$ 33.2$ billion) to $\$ 254.1$ billion, following gains of $26.0 \%$ ( $\$ 59.3$ billion) a year earlier.

Since the coming into force of the new legislation on Private Trust Companies, the Central Bank approved two (2) Financial and Corporate Service providers to act as Registered Representatives of Private Trust Companies and seven (7) Private Trust Companies were certified to be exempted from having to obtain a trust licence, as mandated by the Banks and Trust Companies Regulation Act, 2000, while five (5) of the Bank's licensees indicated that they planned to act as Registered Representatives for Private Trust Companies.

## Employment

Buoyed by sustained growth in the financial sector, the banking industry's workforce grew by $5.6 \%$ (261) to 4,923 . The $5.4 \%$ (238) increase in the number of Bahamians employed to 4,606, outpaced the year earlier $3.8 \%$ gain, and the $0.8 \%$ average expansion for the five year period ending 2006. Following a $22.0 \%$ spike a year earlier, aligned with the servicing of new business demands, growth in the number of expatriate workers slackened to $7.8 \%$ (23) to 317 at the end of 2007although exceeding the $1.0 \%$ average gain for the previous five years. The share of expatriate and Bahamian workers within the total workforce stabilized at $6.4 \%$ and $93.6 \%$, respectively.

## EXPENDITURE

Despite a slight reduction in the number of branches, by 3 to 108, higher operational and capital expenses elevated banks' total expenditures by $2.2 \%$ ( $\$ 10.2$ million) to $\$ 478.3$ million, although below the $9.9 \%$ upturn in the previous period and the average 4.2\% increase noted from 2002-2006.

Operational expenditures, which accounted for approximately $94.5 \%$ of total spending, rose by a reduced $2.1 \%$ ( $\$ 9.4$ million) to $\$ 451.9$ million, compared to the $8.4 \%$ and $4.1 \%$ respective gains registered in 2006 and over the five years to 2006. In particular, outlays for Government fees, which were stable in 2006, advanced by $3.5 \%$ to $\$ 18.7$ million, attributed primarily to gains in licensing expenses (16.1\%), stamp duties (106.6\%) and real property taxes (32.3\%), which offset cumulative declines (16.8\%) in other fees incurred. The category Other Administrative Costs also declined by $2.9 \%$, in contrast to a $12.3 \%$ advance in 2006.

Staff related expenditures trended higher, as salaries firmed by $6.3 \%$ to $\$ 237.5$ million, extending the previous year's $5.8 \%$ growth and pacing above the $2.5 \%$
average increase for the five year period through 2006. The average annual salary paid to employees was slightly higher by $0.7 \%$ at $\$ 48,250$ building on the gains registered during 2006 and over the last five years, of $1.0 \%$ and $1.6 \%$, respectively. The improvement was solely in the non-Bahamians component, whose average salary level grew by $5.8 \%$ to $\$ 107,959$; whereas Bahamian employees registered a modest fall-off of $0.3 \%$ to $\$ 44,141$. Indications are that training outlays grew by $11.2 \%$ to a six year high of $\$ 3.1$ million.

Following a $45.0 \%$ surge in 2006, accretions to capital expenses moderated by $3.4 \%$ to $\$ 26.4$ million. Investments were primarily focused on renovations to existing premises, which at $\$ 6.9$ million, almost doubled the previous year's outlays. Capital spending on new premises advanced by $13.2 \%$ to $\$ 1.3$ million; with spending for office equipment and furniture increased marginally to $\$ 14.9$ million while land purchases declined by almost $50 \%$ to $\$ 3.3$ million.

## Domestic versus International Banking

Reflecting growth in local banking activities, employment in the domestic banking sector, where the focus is predominantly on retail services strengthened by $5.9 \%$ (209 persons) to 3,766 persons at end-2007. Employment for the offshore institutions, which typically require a higher degree of technical and multilingual skills to assist in the provision of wealth management-oriented services and products, rose by $4.7 \%$ ( 52 persons) to 1,157. Consequently, the proportion of total employment accounted for by domestic entities rose only marginally to $76.5 \%$.

There was a slight firming in the ratio of Bahamian to non-Bahamians employed by domestic banks, to $61: 1$ from 60:1 in 2006, as the growth in Bahamian workers of 207 to 3,706 , surpassed the gain in the expatriate component of 2 to 60 . Offshore banks increased Bahamian hires by 31 ( $3.6 \%$ ) to 900 persons and non-Bahamians, by $21(8.9 \%)$ to 257 -with the ratio of Bahamians to nonBahamians stable at 3:1.

With regards to expenditure, domestic banks' total outlays rose marginally by $2.1 \%$ ( $\$ 6.2$ million) to $\$ 297.1$ million, trailing 2006's $9.3 \%$ upswing to $\$ 290.9$ million and the $4.6 \%$ average growth of $\$ 46.8$ million achieved between 2002 and 2006, which was supported by capital investments. The $1.5 \%$ ( $\$ 4.1$ million) gain in spending for operational activities included a firming in wages \& sala-
ries of $4.3 \%$ ( $\$ 6.5$ million); in fees paid to the Government, of $5.3 \%$ to $\$ 9.3$ million and a $42.9 \%$ hike in staff training costs to $\$ 2.1$ million. Other administrative outlays contracted by $3.1 \%$ to approximately $\$ 110.8$ million. Capital spending grew by $12.7 \%$ ( $\$ 2.0$ million), based on elevated expenditures for the renovation of existing premises, the acquisition of new premises as well as for office furniture and equipment purchases, which contrasted with reduced land investments.

Offshore banks and trust companies increased their expenditures by $2.3 \%$ to $\$ 181.2$ million, which was below the previous year's 10.9\% capital-led upturn. Operational expenses were extended by $3.1 \%$ to $\$ 173.2$ million, in comparison with a more robust $8.7 \%$ gain in 2006. Salary-related costs, at $44.7 \%$ of the total, advanced by $10.3 \%$, followed by a more moderate $1.8 \%$ gain in payments for Government fees. Capital spending tapered off significantly, by $13.2 \%$, following the previous year's broad-based expansion of $80.1 \%$.

The survey results also indicated that the average salary dispersion between employees of international banks and trust companies vis-à-vis those of domestic operations widened, as the remuneration of employees in the offshore sector advanced by $5.4 \%$ to $\$ 70,031$ per annum, while domestic salaries declined by $1.4 \%$ to \$41,562 per year.

## Other Financial Sector Activities

Indications are that the non-bank financial sector maintained its growth momentum during 2007, buoyed by continued expansions in household and business incomes, improved technology, further staff training and new financial product offerings.

## Insurance Sector

The latest information available for the insurance industry suggest that the total expenditure level increased by $11.5 \%$ to $\$ 129.9$ million, following a $4.2 \%$ contraction in 2006. Provisional data from the Central Bank's annual survey showed that employment in the sector firmed, on a yearly basis, by 83 persons to 1,474 , with the Bahamian component increasing by 80 to 1,447 , for approximately $98.2 \%$ of overall employment. Non-Bahamian workers in the sector rose marginally by 3 to 27 .

In line with the increased employment, salaries expanded by an estimated $8.7 \%$ to $\$ 67.2$ million in 2007. Buoyed by increased gross premium collections and higher stamp duty payments, Government fees firmed by $20.9 \%$ to $\$ 14.8$ million. In addition, office space renovation costs surged three-fold to $\$ 2.8$ million; other administrative expenses rose by $12.9 \%$ to $\$ 30.2$ million, and outlays for staff training expanded by $17.1 \%$ to $\$ 0.4$ million. In contrast, other capital expenditures fell by $5.8 \%$, due mainly to a reduction in office equipment and furniture purchases.

## Credit Unions

Preliminary results from the Central Bank's 2007 survey on credit unions confirmed the continued importance of these activities in providing alternative financial services, with assets gaining $\$ 20$ million to $\$ 236.0$ million in 2007. Overall outlays firmed by $7.1 \%$ to $\$ 6.6$ million, inclusive of salaries, which accounted for $44.2 \%$ of the total at $\$ 2.9$ million. Moderate increases were registered for administrative related expenses ( $\$ 0.7$ million), fees for renovation expenses ( $\$ 0.03$ million), and public utilities ( $\$ 0.04$ million). In contrast, other "miscellaneous" capital expenditures fell by $\$ 0.2$ million ( $33.7 \%$ ) to $\$ 0.4$ million, as no land acquisitions were made in 2007, compared to net purchases of $\$ 0.3$ million in the previous year. Payments of Government fees also fell marginally by $\$ 0.01$ million ( $19.7 \%$ ) to $\$ 0.06$ million.

Employment increased marginally by 4 (3.8\%) to 110 persons, bringing the average annual growth rate to $2.76 \%$ over the past five years. Average salaries for the industry were estimated at $\$ 26,555$ per worker.

## Investment Funds Industry

The Securities Commission of The Bahamas compilation of investment funds data for 2007 showed that the number of active mutual funds under management grew by 59 ( $8.2 \%$ ) over the year to 782 . Growth in assets under management surged by US $\$ 92.9$ billion to $\$ 297.6$ billion. By end-2007, the number of investment fund administrators had increased by 2 to 65 .

## Capital Markets Developments

The end of year statistics on trade and index performance for the Bahamas International Securities Exchange (BISX) indicated an overall improvement in share values, as the BISX All Share Index rose by $23.2 \%$ to $2,066.75$ points in 2007 , trending in line with the $24.1 \%$ increase in 2006. The Fidelity Capital Market Index (FINDEX), which reports on the over-the-counter market trading, was boosted by $26.4 \%$ to 938.3 points, although slowing from 2006's $34.5 \%$ expansion to 742.2 points. However, the $24.3 \%$ gain in market capitalization to $\$ 3.9$ billion surpassed the $20.8 \%$ year-earlier advance. Meanwhile, the trading volume of shares declined by $9.2 \%$ to 4.8 million, and the value fell by $1.6 \%$ to $\$ 28.3$ million; whereas the number of publicly traded companies remained at 19.

In other capital market developments, two new Bahamas Depository Receipt (BDR) products were offered to the public, following from the Central Bank's Exchange Control liberalization measures, which came into effect in January 2006. Under the current BDR programme, BISX registered broker dealers are allowed to purchase a portion of the Central Bank's foreign exchange reserves under a specific formula, which is then utilized to purchase foreign assets. The assets are subsequently packaged into BDR products, which have been approved by the Securities Commission, and offered for sale to resident investors. One BDR offering totaled \$10.0 million, and the other amounted to $\$ 100,010$ divided into $10,000,000$ non-voting Class ' $A$ ' shares, with a par value
of $\$ 0.01$ per share and 10,000 voting Class ' $B$ ' shares with a par value of $\$ 0.001$ per share, respectively.

## Recent Regulatory Developments

Regulatory initiatives continued to support The Bahamas' goal of maintaining a robust and progressive regulatory regime. In this regard, amendments were proposed to the Central Bank's two primary acts, the Central Bank of The Bahamas (Amendment) Act, 2007 and the Banks and Trust Companies Regulation (Amendment) Act, $2007^{1}$ to allow, for the sharing of information with other domestic regulatory authoritiesconsidered important to the proper functioning of the financial sector.

Other notable proposals included legislative changes to the existing Banks and Trust Companies Regulation Act, 2000: to bring the supervision of nonbank money transmission businesses under the authority of the Central Bank; to clearly define the rights and duties of the auditors of licensees in reporting significant information to the Inspector of Banks and Trust Companies; and to modify the documentary requirements for applicants, specifically as it relates to net worth and character references requirements.
