REVIEW OF ECONOMIC AND FINANCIAL DEVELOPMENTS

DOMESTIC ECONOMIC DEVELOPMENTS

Indications are that the strengthening in the Bahamian economy observed in the first half of the year was maintained during the third quarter, reinforced by a continuation of strong consumer demand. Construction output also expanded as bank lending supported increased housing investments; however, weakness in both air and sea arrivals suggested a softening in tourism output. In the fiscal sector, extraordinary gains in tax revenues supported a turnaround in the overall balance, to a modest surplus for the first guarter of FY2006/07. Monetary developments featured sustained expansion in credit and a concomitant tightening in bank liquidity and decline in external reserves. On the external side, the estimated current account deficit widened, mainly linked to a decline in tourism inflows; however, the capital and financial account surplus improved, on account of increased funding of tourism related investments by overseas and domestic sources.

Reflecting the strong pace of credit expansion, net free cash balances of the banking system contracted by 7.4% to \$171.2 million during the third quarter, which represented a smaller 3.6% share of Bahamian dollar deposit liabilities compared to 6.4% last year. Broader surplus liquid assets also narrowed by 15.1% to \$163.8 million, for a reduction in the excess over the statutory minimum, to 20.5% from 33.1% a year-earlier. The weighted average interest rates for deposits and loans were only marginally higher at 3.31% and 9.93%, respectively, resulting in a slight up-tick in the average loan-to-deposit rate spread to 6.62%. Meanwhile, the 90-day Treasury bill rate and benchmark rates—Central Bank's Discount rate and commercial banks' Prime—were all unchanged at 0.69%, 5.25% and 5.50%, respectively.

The overall money supply (M3) contracted at a slower pace of 1.5% compared to 2.1% in 2005, placing the overall stock at \$5,078.6 million. Developments included a 16.2% decline in residents' foreign currency deposits, consequent on public sector withdrawals to meet operational expenses, and a 7.8% fall-off in demand

deposits. In contrast, currency in active circulation, fixed and savings deposits rose by 0.4%, 1.2% and 1.0%, respectively.

Buoyed by healthy economic conditions and a relatively low interest rate environment, domestic credit expansion was sustained during the review quarter. Total claims outstanding firmed by 3.6% to \$6,525.0 million, compared to modest growth of 0.8% last year. The uptrend was associated with extended gains in private sector credit of 4.4% relative to 2.6% a year ago. The Bahamian dollar component increased by 4.6%, up from 3.8% in 2005, and private sector foreign currency credit by 1.9%, in contrast to a 7.5% contraction a year-earlier. Residential mortgages, personal overdrafts and consumer credit rose by 4.7%, 6.6% and 3.9%, respectively. Conversely, claims on the public sector were marginally reduced by 0.2%, as the 0.9% decline in net credit to Government offset the 1.1% rebound in claims on the public corporations.

In the fiscal sector, preliminary estimates of Government's budgetary operations for the first quarter of FY2006/07 showed a surplus of \$3.7 million, a turnaround from a deficit of \$20.3 million in the previous year. Total revenue improved by 20.3% to \$326.9 million, as tax receipts gained 21.5% to \$305.8 million, supported by a 38.8% surge in non-financial stamp taxes associated with real estate transactions. Developments were reinforced by a 17.3% advance in non-tax earnings to \$21.1 million. Total expenditure expanded by 10.7% to \$323.3 million, explained by an 8.6% increase in current outlays to \$283.3 million, a 14.6% hike in capital investments to \$30.3 million and a more than doubling in net lending to public corporations to \$9.7 million. Budgetary financing for the first guarter of FY2006/07 included a \$100.0 million Registered Stock issue and short-term advances from the Central Bank of \$15.0 million. Borrowings, alongside total debt amortization of \$36.3 million, which was almost entirely denominated in Bahamian dollars. resulted in a 3.5% quarterly rise in the Direct Charge on Government to \$2,396.7 million. Inclusive of a 2.0% (\$10.2 million) reduction in guaranteed borrowings of the public corporations, the National Debt expanded by an

estimated \$70.1 million (2.5%), placing the outstanding stock at \$2,893.1 million.

Tourism developments during the review quarter were marked by a 8.5% downturn in visitor arrivals to 1.04 million, which reversed last year's growth of 3.5%. In particular, air traffic fell by 7.0% to 333,737 vis-à-vis a 12.8% gain in 2005; and sea arrivals, which accounted for 67.8% of visitors, decreased by 9.2% to 702,789. Port of entry data revealed that New Providence, which received 60.3% of the quarter's arrivals, recorded a fall-off of 9.4%, as air and sea visitors declined by 7.1% and 10.7%, respectively. A similar pattern was observed in Grand Bahama, where traffic was reduced by 24.5%, based on downturns in both air and sea arrivals, of 9.5% and 30.5%, respectively. Benefiting from an upswing in sea traffic, visitors to the Family Islands rebounded by 2.9% from last year's 0.5% downturn.

In the construction sector, output continued to benefit from elevated residential mortgage lending activity. Data collected from banks, insurance companies and The Bahamas Mortgage Corporation revealed that the value of total mortgage disbursements for the third quarter increased by 11.3% to \$179.5 million. The bulk was earmarked for residential projects, which experienced an increase of 15.4% to \$165.6 million, while commercial activities fell by 21.9% to \$13.9 million. The number of mortgage commitments for new construction and repairs, a forward looking indicator, contracted by 36.9% to 335, with a corresponding 35.3% decrease in value to \$39.4 million. Residential loan approvals declined in number by 36.5% to 323, with a similar abatement in value to \$35.9 million, while commercial loan commitments fell in number by 45.5% to 12 and in value by 23.4% to \$3.4 million. Meanwhile, total outstanding mortgages advanced by 18.3% to \$2,432.8 million, with comparable percentage expansions in both the residential and commercial components. In terms of interest rates, average residential and commercial rates declined by 1 and 2 basis points, to 8.1% and 8.8%, respectively.

Fisheries data for the third quarter of the year featured a decline in export volumes of 35.0% to 1.0 million pounds, with a corresponding fall-off in earnings of 41.1% to \$16.8 million, when compared with the same period last year. Crawfish export receipts, which accounted for 97.0% of total sales, slackened by 40.9% to \$16.3 million, with a 33.9% drop in volume. A similar pattern was

observed for the first nine months of 2006, as fisheries export volumes decreased by 28.3% to 2.8 million pounds, while receipts were reduced by 31.7% to \$41.5 million.

During the review quarter, consumer price inflation, measured by changes in the average Retail Price Index, moderated to 2.11% from 2.29% in the comparable 2005 period, primarily influenced by decelerations in average costs of transport & communication and education services. For the twelve-months through September, inflation also narrowed to 1.59% from 2.05%, attributed to declines in average prices for transport & communication and recreation & entertainment services.

In the external sector, the current account deficit widened by \$160.8 million to \$425.2 million in the third quarter of 2006. Weakness in tourism receipts, combined with increased outflows for other services, construction, insurance and government services, led to a contraction in the services account surplus by 59.0% to \$89.7 million. Also, the merchandise trade deficit deteriorated by 8.5% to \$486.6 million alongside the 30.4% decline in inflows from net current transfers to \$6.3 million, which offset the 20.7% reduction in net foreign income remittances to \$34.6 million.

The capital and financial account's estimated surplus expanded to \$244.0 million from \$147.6 million in 2005, mainly reflecting domestic banks' funding of tourism related projects and other net foreign investment inflows. However, net direct investment inflows (net equity and net real estate inflows) were reduced by \$51.7 million to \$139.8 million. Portfolio investment net outflows amounted to \$6.3 million, compared to a negligible balance a year ago.

FISCAL OPERATIONS

OVERVIEW

Preliminary estimates of the fiscal situation for the first quarter of FY2006/07 revealed an improvement in Government's overall position, to a surplus of \$3.7 million from a deficit of \$20.3 million a year-earlier. Growth in imports combined with significant stamp tax receipts, elevated revenues by 20.3% to \$326.9 million, offsetting a 10.7% hike in total expenditure to \$323.3 million.

Compared to budgetary estimates, revenues approximated 24.4% and outlays, 22.1%.

RFVFNUF

Tax collections, which constitute the bulk of receipts (93.5%), rose by 21.5% to \$305.8 million. Underlying this outcome was a 14.8% hike in taxes on international trade and transactions to \$155.3 million, associated with increases in import duties (13.5%) and related stamp taxes (21.9%). Import duties also accounted for the majority of the 60.0% hike in vet "unclassified" receipts to \$60.6 million, while realty-related transactions boosted other stamp tax receipts by 38.8% to \$50.6 million. Collections of business and professional licence fees advanced by 12.6% to \$9.4 million, and property taxes, by 5.5% to \$7.1 million. However, revenue declines were registered for selective taxes on tourism services (9.5% to \$4.8 million)—inclusive of a timing-related 84.7% reduction in hotel occupancy tax proceeds; departure taxes (10.3% to \$15.0 million) and motor vehicle taxes (3.9% to \$3.3 million).

Non-tax revenues at 6.5% of total receipts were higher by 17.3% at \$21.1 million, mainly due to a 19.8% gain in fines, forfeitures and administration fees to \$18.9 million. Income from public enterprises and other sources was relatively unchanged at \$2.1 million; and no capital revenues were recorded in the review quarter, compared to \$2.1 million in the previous year.

EXPENDITURE

Recurrent outlays, which accounted for 87.6% of total spending, registered growth of 8.6% to \$283.3 million. Similarly, capital expenditure, at 9.4% of the total, rose by 14.6% to \$30.3 million, while net lending to public corporations more than doubled to \$9.7 million for a 3.0% share.

By economic classification, growth in recurrent expenditure was led by an 11.5% rise in Government consumption to \$180.7 million, which included a 12.1% advance in personal emoluments and a 9.9% rise in purchases of goods and services. Transfer payments also grew by 3.8% to \$102.6 million, with the 10.0% falloff in interest expenses on Government debt offset by an 8.6% advance in subsidies and other payments. The higher level of subsidies reflected increased provisions to

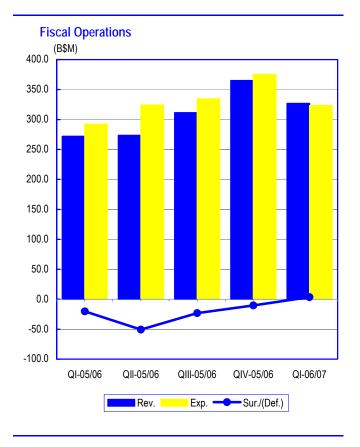

The College of The Bahamas (35.3%) and the Public Hospitals Authority (11.4%), which boosted general subsidies by 14.6%. Transfers abroad moved higher by 13.3%; those to households, by 4.4% and to non-profit institutions, by 1.3%.

On a functional basis, recurrent spending on general public services advanced by 7.1% to \$89.2 million. Notable hikes were also recorded for education (17.9%), health (15.0%) and defense (6.9%). Spending on social benefits and services was higher by 10.3% at \$17.5 million, while expenditures on economic services, of which 33.7% represented tourism-related outlays, gained 3.1% to \$32.2 million.

The 14.6% expansion in capital spending to \$30.3 million was mainly associated with increased outlays for education (\$7.5 million), health (\$1.8 million) and general public service (\$0.8 million) projects. Expenditure on economic services declined by \$4.8 million to \$8.9 million,

as major public works and water supply outlays neared completion.

FINANCING AND NATIONAL DEBT

Budgetary financing during the review quarter was obtained mainly from domestic sources and included a \$100 million Registered Stock issue in September, Central Bank advances (\$15.0 million), and external borrowings (\$1.0 million). Debt amortization totaled \$36.3 million, the majority of which (\$35.0 million) went towards retiring Bahamian dollar obligations. As a consequence, the Direct Charge on Government rose by \$80.3 million (3.5%) to \$2,396.7 million, on pace with the \$74.3 million (3.4%) increase to \$2,242.5 million in the corresponding quarter last year. Bahamian dollar denominated debt, which constituted 88.0% of the total, continued to be largely held by public corporations (35.5%), followed by private and institutional investors (32.6%), commercial banks (22.3%), the Central Bank (9.4%) and Other Local Financial Institutions (0.2%). Long-term government securities remained the largest component of Bahamian dollar debt (86.8%), with an average term to maturity of 12 years; next were Treasury bills (9.1%), advances (3.7%) and loans (0.4%).

During the quarter, Government's contingent liabilities contracted by \$10.3 million (2.0%) to \$496.4 million, while the National Debt advanced by 2.5% to \$2,893.1 million—5.5% above the end-September 2005 level.

PUBLIC SECTOR FOREIGN CURRENCY DEBT

Public sector foreign currency debt was reduced by 1.3% to \$582.2 million during the third quarter, with new drawings and principal repayments contracting by \$1.0 million and \$8.9 million, respectively. Government borrowed a net of \$0.3 million, while the public corporations repaid a net of \$8.2 million. At end-September, Government's outstanding debt stock stood at \$288.6 million (49.6% of the total), while public corporations accounted for the remaining \$293.6 million (50.4%).

By creditor profile, commercial banks held the largest share of foreign currency debt (43.3%), followed by private capital market investors (38.6%) and multilateral institutions and other entities (18.1%). In terms of currency composition, more than 97% of outstanding obligations were denominated in United States dollars, with an average maturity of approximately 13 years.

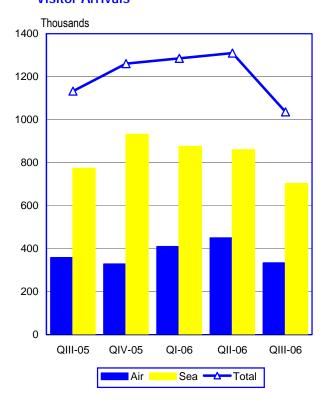

Foreign currency debt servicing contracted by \$2.0 million (12.9%) to \$13.4 million compared to the same period of 2005, as the \$1.2 million rise in interest charges was overshadowed by the \$3.2 million decline in amortization payments. Debt service as a proportion of estimated exports of goods and non-factor services decreased to 1.9% from 2.1% last year. Similarly, the ratio of Government's foreign currency debt service to total revenue decreased marginally to 0.3%.

REAL SECTOR

TOURISM

Preliminary data suggests a comparatively weakened tourism performance during the September quarter, occasioned by downturns in both air and sea visitors. Following a 3.5% advance in 2005, total visitor arrivals declined by 8.5% to 1.0 million. Air arrivals, at 32.2% of total visitors, fell by 7.0% in contrast with last year's 12.8% increase; and the extended decline in sea visitors to 9.2% from 0.3% was primarily explained by a combination of fewer passengers aboard cruise liners and reduced cruise calls.

Visitor Arrivals

Port of entry data revealed that the weakness was concentrated in Grand Bahama, where the decline in arrivals increased more than threefold to 24.5% for 0.12 million visitors and comprised contractions in both the air (9.5%) and sea (30.5%) segments. Similarly, the 9.4% reduction in total arrivals to New Providence, to 0.63 million, was due to a downswing in air (7.1%) and sea (10.7%) traffic. In contrast, visitors to the Family Islands exhibited a modest 2.9% upturn, as the 4.2% improvement in sea tourists offset the 3.4% decrease in air arrivals.

For the first nine months of 2006, total arrivals fell by 3.8%, led by a 5.8% drop in sea arrivals to 2.4 million which eclipsed the 0.7% rise in air arrivals to 1.19 million. This broader pattern was evidenced through the major ports of entry. In particular, in Grand Bahama, the mod-

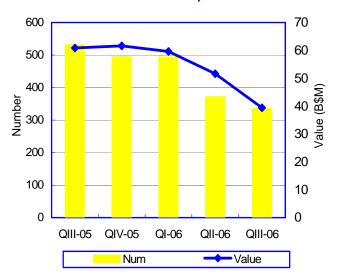

est recovery in sea arrivals was not sufficient to offset the protracted downturn in air visitors, as total arrivals fell by 0.8%. A 0.9% gain in air tourists to New Providence was countered by the 8.7% downturn in sea visitors while the Family Islands contended with a 3.5% decline in sea arrivals which outpaced the 2.8% increase in air visitors.

CONSTRUCTION

Indications are that construction activity continued to expand during the third quarter, buoyed by growth in both tourism-related and residential investments. Mortgage data from banking institutions, insurance companies and the Bahamas Mortgage Corporation, showed an increase in residential and commercial mortgage lending for the period under review.

The total value of mortgages outstanding expanded by 18.3% to \$2,432.8 million during the quarter, with a comparable rise in residential mortgages which accounted for 91.1% of the total. In terms of major lenders, domestic banks comprised the largest portion of the market (87.5%), followed by insurance companies (7.7%) and the Bahamas Mortgage Corporation (4.8%).

Mortgage Commitments: New Construction and Repairs

For the review quarter, the number of mortgage commitments for new construction and repairs declined by 36.9% to 335, vis-à-vis the corresponding period in

2005. Both the residential and commercial components registered reductions in excess of 35%, to 323 at \$35.9 million and 12 at \$3.4 million, respectively. Total loan disbursements were higher by 11.3% at \$179.5 million, as the 15.4% broadening in the residential component offset the 21.9% drop in commercial disbursements.

In interest rate developments, the average rate for commercial loans moderated by 2 basis points to 8.8% compared to a 6 basis point decline to 9.0% in 2005, while average residential loan rates fell by 1 basis point to 8.1%, vis-à-vis a 6 basis point decrease to 8.2% for the third quarter a year earlier.

PRICES

During the third quarter, consumer price inflation, as measured by variations in the average Retail Price Index, slowed to 2.1% from 2.3% in the corresponding period of 2005—notwithstanding price gains for other goods & services (8.7%); food & beverages (4.9%); medical care & health (2.6%); furniture & household operation (1.8%); housing, the most heavily weighted category, (1.5%); clothing & footwear (1.0%) and recreation & entertainment services (0.6%) categories. Some offset was provided by average cost declines for transport & communication (1.3%) and education 1.0%.

Similar trends were noted for the twelve-months to September, as the rate of inflation softened to 1.6% from 2.1% in the comparable period. Price increases were posted for other goods & services (5.4%); food & beverages (4.5%); housing (2.4%); furniture & household operation (2.1%); medical care & health (1.2%); clothing & footwear (0.4%) and education (0.2%). Conversely, average cost decreases were recorded for transport & communication (2.1%) as well as recreation & entertainment services (1.8%).

Developments in the oil market indicated an increase in fuel prices for New Providence. Data available to end-August, showed that over the two-month period, gas and diesel prices at the pump firmed by 5.6% and 5.7% to \$4.49 and \$3.53 per gallon—bringing the annual (point-to-point) gains to 21.8% and 17.8%, respectively. Regarding electricity generation, the fuel surcharge added by The Bahamas Electricity Corporation (BEC)

grew by 4.4%, over the review period, from 10.36ϕ in June to 10.82ϕ in September.

FISHERIES

Third quarter data from the Department of Fisheries indicated a reduction in both the volume (35.0%) and value (41.1%) of fisheries exports, to 1.0 million pounds valued at \$16.8 million. Crawfish exports, which comprised over 90% of both volume and value, contracted by 33.9% to \$16.3 million; while conch exports, the second largest category, declined by 60.8% to \$0.2 million. Other "miscellaneous" fisheries exports decreased in value by 22.3% to \$0.28 million.

For the first nine months of the year, total fisheries exports fell by 28.3% to 2.8 million pounds, and earnings deteriorated by 31.7% to \$41.5 million. Underlying this outturn was a 31.7% fall in the volume of crawfish exports (84.6% of total exports) to 2.3 million, and a corresponding 33.1% (\$19.1 million) in value to \$38.6 million. Conch exports (6.4% of total exports) waned by 41.6% to 0.2 million pounds with a 42.6% reduction in revenue to \$1.1 million. In contrast, the volume of other "miscellaneous" fish export categories nearly doubled to 0.3 million, corresponding to a 49.5% (\$0.6 million) rise in earnings to \$1.9 million.

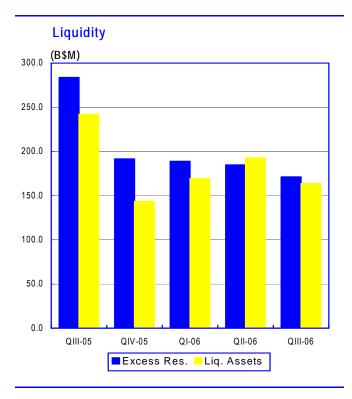

Money, Credit and Interest Rates

OVERVIEW

During the review quarter, money and credit trends were characterized by tightened liquidity conditions, in the context of strong private sector credit expansion for both mortgages and consumer loans. As a consequence, external reserves declined but the weighted average interest rate spread remained relatively unchanged. Preliminary estimates for the second quarter, the latest period for which data are available, showed strengthening in banks' earnings indicators as the expansion in the net interest margin surpassed growth in operating and bad debt expenses. Asset quality indicators for the third quarter showed marginal increases in bad debt provisions and arrears rates over the previous quarter.

LIQUIDITY

Amid tightened liquidity conditions, net free cash reserves of the banking system contracted by \$13.7 million (7.4%) to \$171.2 million, extending last year's \$7.5 million

(2.6%) fall to \$283.7 million, and representing a reduced 3.6% of Bahamian dollar deposit liabilities relative to 6.4%

in 2005. Similarly, the surplus on the broader liquid assets fell by \$29.1 million (15.1%) to \$163.8 million and exceeded the statutory minimum by a lesser 20.5% compared to the 33.1% in the same month last year.

DEPOSITS AND MONEY

Total money supply (M3) contracted by 1.5%, following a reduction of 2.1% in the previous year, and largely reflected utilization of foreign currency deposits by public corporations. The decline in narrow money (M1) was marginally lower at 6.6% versus 8.3% in the same period last year, and included a substantial slowing in accretions to currency in active circulation to 0.4% from 11.2% in 2005, alongside a public sector led reduction in demand balances of 7.8% vis-à-vis 11.2% in 2005.

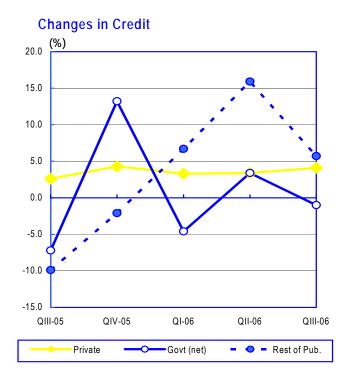

Modest gains in savings (1.0%) and fixed deposits (1.2%) moderated the contraction in broad money (M2) to 0.9% from 1.2% a year ago. Taking into account the 16.2% falloff in residents' foreign currency deposits, overall money (M3) decreased by \$76.6 million (1.5%) to an end-September stock of \$5,078.6 million.

On a proportional basis, Bahamian dollar fixed deposits remained the largest component of money (53.6%), followed by demand deposits (21.0%), savings (18.5%), currency in circulation (3.9%), and foreign currency balances (3.0%).

DOMESTIC CREDIT

Favorable credit conditions and sustained consumer demand underpinned a strengthening of domestic credit expansion to \$229.7 million (3.6%) during the third quarter, ahead of the \$42.8 million (0.8%) advance in the corresponding 2005 period. By currency, growth in the Bahamian dollar component accelerated to \$205.1 million (3.7%) from \$77.2 million (1.6%), and foreign currency credit rebounded by \$24.6 million (3.3%), from last year's \$34.5 million (4.9%) contraction.

The banking system's net claims on the public sector grew by \$71.1 million (7.6%), reversing 2005's decline of 2.8%. In a turnaround from the previous year's 2.3% reduction, public corporations' liabilities rose by 15.9%. Meanwhile, banks' higher holdings of Government securities elevated net claims on Government by 3.4%, in contrast to 2005's 3.0% contraction.

As foreign currency credit levelled off, private sector credit expansion moderated to \$172.8 million (3.4%) from \$248.8 million (5.7%) in 2005. Dominated by Bahamian dollar credit (3.7%), lending was concentrated in personal loans (71.5%), which had moderated growth of \$129.8 million (3.6%). The outturn reflected extended gains in consumer credit of \$55.8 million (3.3%), and residential mortgages of \$70.4 million (3.9%). Personal overdraft balances also recorded a \$7.3 million (12.0%) accretion.

The \$68.4 million rise in consumer credit reflected increased lending for miscellaneous purposes (\$25.3 million), credit cards (\$13.6 million) and to a lesser extent debt consolidation (\$7.5 million). Gains were also recorded for travel (\$4.8 million), education (\$4.7 million), land purchases (\$4.5 million), private cars (\$3.6 million), and home improvements (\$3.3 million).

Across the other categories of private sector credit, net increases in bank lending were evident for distribution (\$38.3 million), construction (\$8.6 million) and agriculture & fisheries (\$6.7 million), miscellaneous (\$6.0 million), tourism (\$5.5 million) and private financial institutions (\$5.2 million). Smaller upturns were registered for professional & other services (\$3.0 million), transport (\$2.0

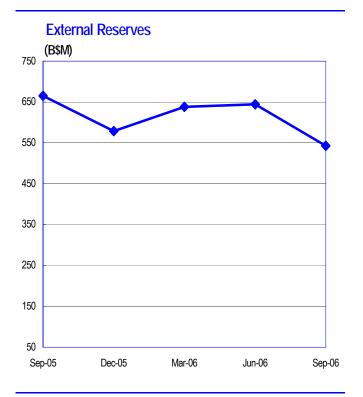

million), and entertainment & catering (\$1.6 million); while net repayments were recorded for manufacturing and mining & quarrying of \$1.9 million and \$1.8 million, respectively.

THE CENTRAL BANK

During the review period, the Central Bank's net claims on Government rose by \$52.4 million (40.3%) to \$182.3 million, reflecting a combination of new advances to Government and seasonally higher holdings of government paper, which exceeded the increase in deposits held for the Government. Net liabilities to the rest of the public sector declined by \$65.8 million to \$4.2 million, as deposits were shifted to the banking sector.

As a consequence of heightened imports, weakness in the tourism sector, as well as the funding of extraordinary transactions, external reserves contracted by \$101.5 million (15.8%) to \$542.7 million. At end-September, the stock of reserves was equivalent to an estimated 14.8 weeks of non-oil merchandise imports, compared with 20.8 weeks last year. After adjusting for the statutory required 50% of the Bank's Bahamian dollar demand

liabilities, which have to be supported by the external balances, useable reserves stood at \$219.6 million, relative to \$299.5 million in September 2005.

Foreign exchange transactions underlying the external reserves outcome featured a reduced overall net sale of \$107.4 million relative to \$132.9 million in the corresponding 2005 quarter. The Bank's net sale to the public sector was lower by 39.7% at \$44.0 million but increased for commercial banks, by 5.8% to \$63.4 million. Correspondingly, commercial banks' total sales to their customers rose by 28.8% to \$939.7 million, while total purchases increased by a lesser 26.3% to \$849.4 million.

Domestic Banks

Domestic banks' deposit liabilities to the private sector fell by \$16.5 million (0.4%), and contrasted with the \$231.9 million (4.4%) hike in total credit to the private sector. Net claims on the Government contracted by 11.4%, as banks significantly reduced their Treasury bill holdings and other short-term advances to the Government. With regards to the rest of the public sector, their net liabilities fell as a \$5.2 million (1.4%) firming in deposit liabilities surpassed the \$4.0 million (1.1%) hike in funding. In this context, the net foreign liabilities of banks expanded by \$73.2 million (11.3%) to \$723.8 million,

reflecting funding of various domestic investment projects.

Inclusive of Government's balances, banks' total deposit liabilities amounted to \$4,966.4 million, with the majority (96.9%) denominated in Bahamian dollars, and spread over private individuals (57.2%), business firms (25.7%), the public sector (9.6%), institutional and other depositors (4.3%), and private financial institutions (3.2%). By contractual categories, fixed deposits maintained the largest share (56.0%), followed by demand (24.9%) and savings (19.1%) balances.

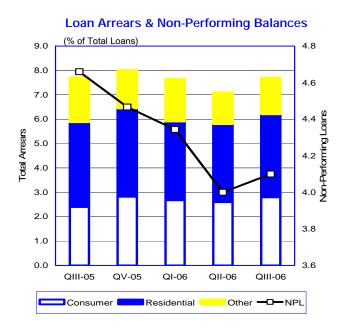

An analysis of Bahamian dollar deposits by range of value and number indicated that accounts with balances of less than \$10,000 comprised 90.2% of the contracts and 8.2% of the total value. Accounts with balances between \$10,000 and \$50,000 represented 13.5% of the total value and 6.7% of the total contracts, while balances exceeding \$50,000 represented 3.1% of accounts and 78.3% of total value.

Adjusted for goodwill, banks' Bahamian dollar capital and surplus position improved further by 10.9% over the quarter, to \$1.26 billion. Profit and retained earnings represented 51.1% of capital and surplus compared to 48.4% in the previous year, as general and specific reserves against loan losses fell to 10.3% from 11.7% of the total. Total reserves and provisions represented a relatively stable 2.6% of private sector loans.

At end-September, the arrears rate for balances with payment past due 30 days or more was higher at 7.6% of all outstanding balances, compared to 7.0% at end-June, although remaining below end-December's level of 8.0%. Total arrears for residential mortgages moved up to 7.9% from 7.5% at end-June 2006, but represented an improvement over the end-2005 level of 8.8%. A similar pattern was evident with consumer and commercial loan arrears, which advanced to 7.8% and 6.9% from 7.4% and 6.1%, respectively. Non-performing loans, defined as loans with past due payments of at least three months, and on which banks had stopped accruing interest, increased by 1 percentage point to 4.1% of outstanding claims.

Banks' average provisioning levels for Bahamian dollar loans rose to 2.3% of the total private sector portfolio from 2.1% at end-September 2005, but were unchanged from the June position. Total provisions repre-

sented a higher 56.5% of non-performing loans relative to 46.0% at end-September 2005, albeit 1.2 percentage points lower than the June 2006 level.

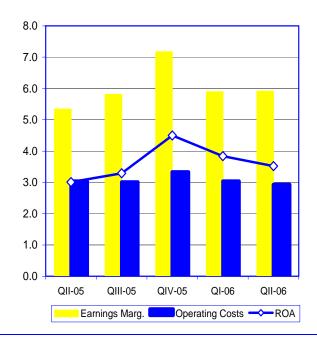

BANK PROFITABILITY

Banks' earnings indicators improved during the second quarter, the latest period for which data were available. Estimated net income grew by 29.8% to \$65.4 million, versus the comparable quarter in 2005. Underlying this development was a 23.7% increase in interest income, which outpaced the 22.9% expansion in interest expense and led to a 24.1% hike in net interest margin to \$102.8 million. In addition, contributions from commission and foreign exchange income advanced by 3.1% to \$7.0 million. Operating costs were comparatively higher by 6.7% at \$54.3 million, while net income from other sources fell by a further 15.3% to \$9.9 million, following higher provisions for bad debt and other income.

Profitability ratios, relative to average domestic assets, also strengthened during the second quarter. The net interest margin ratio widened by 60 basis points to 5.54 percentage points, coupled with a 57 basis point increase in the gross earnings margin to 5.91%. An 11 basis point drop in the operating costs ratio to 2.93% suggests some improvement in banking sector productivity.

Domestic Banks' Profitability

Interest Rates

During the review quarter, domestic banks' average interest rate spread on loans and deposits was slightly higher by 2 basis points at 6.62 percentage points, as the weighted average loan rate firmed by 3 basis points and the deposit rate moved marginally higher by 1 basis point, to 9.93% and 3.31%, respectively.

Compared to the preceding quarter, the average rate on fixed deposits fluctuated within a higher range of 3.16% - 4.15% compared to 3.13% - 4.10% in the previous period. The average savings rate rose by 3 basis points to 2.16%, while the demand deposit rate narrowed by 11 basis points to 2.21%. With regards to lending, the average rate on commercial mortgages and other local loans softened by 12 and 23 basis points to 8.30% and 7.41%, respectively. Conversely, the average residential mortgage and overdraft rates firmed by 2 and 6 basis points to 7.84% and 10.44%, respectively, and consumer loans, by 13 basis points to 12.10%.

With regards to benchmark rates, the average 90-day Treasury bill rate, the Central Bank's Discount and the Commercial Banks' Prime, were unchanged at 0.69%, 5.25% and 5.50%, respectively.

CAPITAL MARKETS DEVELOPMENTS

During the quarter, the fixed income market registered increased activity as the Government raised \$100 million in a registered public bond issue in September. The issue was fully subscribed and was mainly taken up by Bahamian owned private and institutional entities.

On the equity side, there were no new initial public offerings and the number of listed securities fell by one to 19 as one tourism related company's outstanding Bahamian Depository Shares (BDRs) were repurchased at \$8.09 per BDR share, versus an initial listing price of \$5.14 per share. Overall, the BISX All Share Index moved higher to 1,630.05 points from 1,519.11 at end-June, which is a 20.68% appreciation on a year-to-date basis. The biggest gainers were in the banking and industrial sectors, while the wholesale & retail and utilities sectors registered the highest percentage point losses. In addition, the broader Findex Index, which also includes three over-the-counter traded securities, registered a 7.1% gain to close the quarter at 715.99 points.

INTERNATIONAL TRADE AND PAYMENTS

Provisional data for the third quarter highlighted a deterioration in the current account deficit, by \$160.8 million to \$425.2 million, attributed primarily to a narrowing in the surplus on the services account, as net travel receipts declined and other service outflows expanded. Additionally, net income outflows tapered while current transfers' inflows were reduced and the merchandise trade deficit deteriorated as the firming in imports eclipsed the growth in exports.

During the review period, the merchandise trade deficit expanded by \$38.0 million (8.5%) to \$486.6 million. Payments for fuel imports advanced by 39.0% to \$209.3 million; however, non-oil imports fell moderately by 1.5% to \$446.3 million and exports rose by 9.1% to \$169.9 million. Increases in fuel costs were broadly based across the various oil products; the average per barrel cost of gas oil rose by \$10.30 (13.0%) to \$89.51; jet fuel, by \$9.74 (12.0%) to \$91.15; motor gas, by \$9.95 (11.3%) to \$98.35 and propane, by \$10.16 (19.5%) to \$62.40.

Developments on the services account point to an estimated 59.0% contraction in the surplus to \$89.7

million, led by a \$59.6 million (15.8%) reduction in net travel receipts to \$318.8 million as tourism activity weakened. Concurrently, net payments for other services and construction services expanded by \$37.7 million and \$32.7 million to \$116.4 million and \$43.0 million, respectively. Higher net payments were also registered for Government (41.6% to \$11.0 million) and insurance (52.3% to \$34.3 million) services and, to a lesser extent, for offshore companies local expenses (5.0% to \$45.6 million). These were partially mitigated by reduced net outflows related to transportation services (16.5%) and royalties and license fees (17.5%).

Data for the income account showed a reduction in the net outflow of \$9.0 million (20.7%) to \$34.6 million, due mainly to a \$9.5 million (34.2%) decline in investment income outflows by banks and other private companies. Net remittance of labour income rose marginally by 2.9% to \$16.3 million. Net current transfer receipts were reduced by \$2.8 million (30.4%) to \$6.3 million, led by a \$3.0 million fall in transfers to the general government to \$9.0 million. Net transfers of workers remittance were marginally lower by \$0.2 million.

The capital and financial account surplus broadened sharply during the quarter, by \$96.5 million to \$244.0 million. On the financial account, the turnaround in other investments, to a net inflow of \$132.3 million from a net outflow of \$21.6 million, reflected a higher level of loan funding for ongoing foreign investment projects by domestic banks and overseas entities. In particular, shortterm capital transactions, through the domestic banking system, reversed to a net inflow of \$40.5 million from a net outflow of \$12.5 million a year ago, and the net borrowing from external entities was \$92.5 million vis-àvis a net repayment of \$5.2 million last year. Under direct investments, net equity inflows fell marginally to \$98.0 million and net real estate purchases declined by 54.2% to \$41.8 million. Further, the public sector's debt repayment was lower by \$3.2 million to \$1.1 million, while net portfolio investment outflows were comparatively higher at \$6.3 million.

As a result of these developments and after adjusting for possible errors and omissions, the deficit on the overall balance expanded to \$101.6 million from \$95.9 million a year ago.

INTERNATIONAL ECONOMIC DEVELOPMENTS

Indications are that global economic growth slowed in the third quarter, as the housing market downturn moderated US GDP expansion and efforts by the Chinese authorities to curb capital investment eased the rapid surge in that country's growth. Unemployment in the major economies remained relatively stable during the quarter and inflationary pressures subsided amid softening oil prices. Improved inflationary fundamentals contributed to the US Federal Reserve's decision to keep interest rates stable; however, several central banks raised short-term interest rates in a bid to contain future price pressures. In response to the positive outlook, the main stock indices posted quarterly gains, while the US dollar appreciated against the major currencies.

Real GDP growth in the United States slowed to an annual rate of 2.0% in the third guarter, from 2.6% in the previous quarter, due largely to the 18.7% retreat in residential investments and weakened net exports. The United Kingdom's economic expansion was maintained at 0.7% in the three months ending September, benefiting from a rise in the services sector and manufacturing output by 0.8% and 0.6%, respectively. Measures aimed at curbing capital investments dampened China's GDP growth to 10.4% on a year-on-year basis from 11.3% in the second guarter. In the Euro area, the economic expansion slowed marginally to 2.6%, when compared to the same period of 2005, and down from 2.7% in the previous quarter. Driven by firming non-residential investments and increased net exports, real GDP in Japan expanded at an annual rate of 2.0% from 1.0% in the June quarter.

The unemployment situation remained relatively unchanged in the major economies during the review period. In the United States, the unemployment rate stabilized at 4.7% in the third quarter, as expansions in service sector jobs counteracted declines in the manufacturing sector. The Euro area's seasonally adjusted unemployment rate steadied at 7.8% in September, with the unemployment rates in France and Germany at 8.9% and 8.7%, respectively. The United Kingdom's jobless rate rose marginally by 0.1 percentage points over the September quarter to 5.6%, whereas rates for Japan and China stabilized at 4.2% each.

Weakened fuel costs contributed to a deceleration in average consumer prices in all of the major economies. Consumer price inflation in the United States moderated slightly to 3.7% from 3.8% in the previous quarter. In the Euro area annual inflation slackened to 1.7% at end-September from 2.5% in June—moving below the authorities' target rate of 2.0% for the first time this year; and core annual inflation in the United Kingdom moderated by 0.1 percentage points to 2.4% in the third quarter.

In currency markets, the performance of the US dollar was mixed during the review period. The dollar gained most against the Yen, rising by 2.2% to ¥118.18 and advanced by 1.7% to CHF1.24 and by 0.9% to €0.78. However, the dollar weakened against the Pound Sterling and Chinese Renminbi, by 3.1% to £0.52 and by 1.1% to 7.90 Yuan, respectively.

Most major stock indices performed well during the third quarter, reflecting investors' improved confidence in the outlook for global economic growth. As inflation concerns diminished and the Federal Reserve paused its tightening cycle, the Dow Jones Industrial Average Index (DJIA) rallied by 5.4% to 11,679 points—the best gain in seven quarters, and the broader Standard and Poor's 500 Index, by 5.7% to 1345.4 points. In Europe, France's CAC 40 advanced by 5.7%, Germany's main index, the DAX, gained 5.7%, while the UK's FTSE 100 index ended higher by 2.2% at 5,961 points. Japan's Nikkei 225 Index also increased by 4.0% to 16,128 points.

In the commodities market, the easing of geopolitical tensions in the Middle East, combined with the build up of oil stockpiles and lower seasonal demand, led to a 13.6% decline in oil prices to \$62.57. OPEC's crude oil production also increased by 0.1 million barrels during the quarter to 29.7 million barrels per day. With regards to precious metals, the price of gold declined by 2.9% to \$598.30 a troy ounce; however, silver prices rose by 3.1% to \$11.44 per troy ounce.

Given the slowdown in the economy and the relatively benign inflation environment, the Federal Reserve kept the Primary Credit and Federal Funds rates at 6.25% and 5.25%, respectively. However, as inflation and money growth still remained above target, the European Central Bank continued to raise its key interest rates, by 25 basis points. Similarly, with inflation above the Bank of England's target, the authorities raised their key rate by 25 basis points to 4.75%, and the Bank of Japan ended its zero interest rate policy in July—raising the overnight call loan rate to 0.25 percent.

In the United States, the current account deficit expanded by \$8.5 billion to \$225.6 billion in the third quarter, reflecting deteriorations in the goods and income deficits, which offset gains in net services inflows. China's trade surplus for the July-September quarter widened to \$48.72 billion from \$37.98 billion in the previous period, while Japan's current account surplus rose on a quarterly basis by a third to ¥5,311.4 billion, due to improvements in the trade and income balances. Reflecting a reduction in net income receipts, the United Kingdom's current account deficit deteriorated by £1.1 billion to £9.4 billion; however, the Euro area's balance of payments deficit was halved to €0.5 billion from the previous three-month period.
