## REVIEW OF ECONOMIC AND FINANCIAL DEVELOPMENTS

## Domestic Economic Developments

Preliminary indications suggest that the expansion in the Bahamian economy was sustained during the second quarter of 2005, benefiting from steady tourism and foreign investment inflows, and robust domestic housing activity. Although revenue performance was positive over the first eleven months of FY2004/05, fiscal operations resulted in a widened deficit due to growth in both recurrent and capital outlays. Monetary conditions supported moderately strong growth in the monetary aggregates and intensified expansion in domestic credit with the ongoing buoyancy in liquidity driving average interest rates broadly lower. On the external side, the hike in global oil prices contributed to a deterioration in the current account deficit which was mitigated by a widening surplus on capital and financial transactions, partly due to significant net short-term inflows through the banking sector and other private inflows.

Foreign currency inflows from the sale of properties connected with the Cable Beach redevelopment project contributed to a $25.8 \%$ expansion in net free cash balances of the banking system to $\$ 291.2$ million, which constituted a larger $6.6 \%$ share of Bahamian dollar deposit liabilities compared to $4.7 \%$ last year. The broader surplus liquid assets increased by $15.3 \%$ to $\$ 303.7$ million, with the excess over the statutory minimum advancing to $42.3 \%$ from $34.5 \%$. Reflecting these developments, the weighted average interest rate softened for both loans and deposits, by 61 and 35 basis points, to $10.03 \%$ and $3.09 \%$, respectively, for a 26 basis points reduction in the average spread to $6.94 \%$. The average 90-day Treasury bill rate also narrowed by 3 basis points to $0.15 \%$, while benchmark interest ratesCentral Bank's Discount Rate and commercial banks' Prime-remained unchanged at $5.25 \%$ and $5.50 \%$, respectively.

Growth in the monetary aggregates, although slowed from the comparative year-earlier period, continued to be underpinned by healthy foreign currency inflows, and an upsurge in residents' foreign currency
deposits. The overall money supply (M3) expanded by $3.4 \%$ relative to $4.1 \%$ last year, placing the stock at $\$ 4.77$ billion. Similarly, the expansion in broad money (M2) abated to $2.7 \%$ from $4.0 \%$, amid more modest gains in savings and fixed deposits. A decline in currency in active circulation alongside slowed accretions to demand deposits caused narrow money (M1) to post lower growth of $3.8 \%$ compared to $10.3 \%$ a year earlier.

Domestic credit expanded by $\$ 221.6$ million (4.1\%), up strongly from $\$ 99.8$ million ( $2.0 \%$ ) the previous year, for outstanding claims of $\$ 5.58$ billion. Underlying this development was a $\$ 248.8$ million ( $5.7 \%$ ) hike in credit to the private sector, as borrowings to support tourism sector developments boosted the foreign currency component. Residential mortgages and consumer credit also registered steady gains, and the increase for personal overdrafts more than doubled. Meanwhile, claims on the public corporations contracted by $2.3 \%$, extending the $5.1 \%$ decline of 2004.

On the fiscal front, preliminary estimates indicated that the deficit on the Government's operations rose to $\$ 137.2$ million for the first eleven months of FY2004/05 from $\$ 85.9$ million in FY2003/04. Improved revenue collection measures and favourable economic conditions supported total revenue growth of $4.9 \%$ to $\$ 910.4$ million, reflecting an $8.2 \%$ hike in tax receipts to $\$ 840.2$ million. On the other hand, total expenditure increased by $9.9 \%$ to $\$ 1,047.6$ million, inclusive of a $6.8 \%$ boost in current outlays to $\$ 927.3$ million. Dominated by outlays for land acquisition, capital expenditure also rose by $38.0 \%$ to $\$ 77.1$ million, while net lending to the public corporations was enlarged by $45.5 \%$ to $\$ 43.2$ million. Budgetary financing for the first eleven months through May 2005 was entirely from domestic sources, comprising bonds (\$200 million), Treasury bills (\$13.1 million) and advances from Central Bank ( $\$ 5.7$ million). Consequently, the Direct Charge on Government increased by 3.4\% to $\$ 2,173.1$ million and the National Debt was also 3.4\% higher at $\$ 2,662.2$ million at end-June 2005.

Despite ongoing weakness in Grand Bahama, linked to hurricane-related disruptions in supply, indications are that tourism output stabilized relative to the previous
quarter but remained below the pre-hurricane levels of 2004. Healthy gains in occupancy and average room rates in New Providence/Paradise Island sustained expenditure growth and helped offset an $8.3 \%$ reduction in overall visitor arrivals to $1,290,189$. Both air and sea arrivals contracted by $0.9 \%$ and $11.6 \%$, from year-earlier respective advances of $9.8 \%$ and $23.2 \%$. Weakness was mainly concentrated in Grand Bahama, where arrivals fell by $20.0 \%$-although visitors to New Providence and the Family Islands also declined by $8.1 \%$ and $2.0 \%$, respectively. The Ministry of Tourism's survey of large hotel properties indicated that average nightly room rate gains of $0.3 \%$ to $\$ 181.33$ for the six months to June was augmented by a $7.3 \%$ increase in nightly room sales, to secure estimated room revenue growth of $7.6 \%$ to $\$ 171.4$ million.

Construction sector output gained further momentum during the second quarter, as hurricane rebuilding efforts reinforced the ongoing rally in residential investments. Industry data confirmed the buoyancy in housing market activity as the number of residential mortgage commitments for new construction and repairs more than doubled, to 459 from 213, with the corresponding value also higher by $\$ 37.8$ million at $\$ 56.8$ million.

During the review quarter, consumer price inflation, measured by changes in the average Retail Price Index, firmed to $1.68 \%$ from $0.88 \%$ in the comparable 2004 period. Partly reflecting the pass through effects of higher oil prices, increases were recorded in average costs for food and beverages, housing, transport \& communication, as well as in education and 'other' goods \& services. For the 12 months through June 2005 however, average inflation narrowed to $1.03 \%$ from $1.84 \%$ in 2004, paced by decelerations in clothing \& footwear, furniture \& household operation and recreation \& entertainment services.

In the external sector, preliminary estimates for the June 2005 quarter indicate a significant widening of the current account deficit to $\$ 124.1$ million from $\$ 14.4$ million a year earlier. An appreciation in the oil import bill reinforced an increase in the merchandise trade deficit of $19.3 \%$ to $\$ 402.8$ million. Meanwhile, the services account surplus fell by $6.0 \%$ to $\$ 309.4$ million, partly due to a decline in net travel receipts of $\$ 50.8$ million (10.0\%) to $\$ 457.4$ million. Net foreign income outflows rose to $\$ 43.6$
million from \$32.2 million in the year-earlier period, mainly on account of stronger investment income oufflows. Net current transfer receipts slackened to $\$ 12.8$ million from $\$ 26.1$ million last year, which was attributed to general government activity.

Developments on the capital and financial account more than compensated for the growing current account deficit, as the surplus strengthened to $\$ 123.3$ million from $\$ 24.2$ million in 2004. Other investments switched from a net outflow of $\$ 28.5$ million in the year-earlier period to a net inflow of $\$ 90.3$ million. In particular, net short-term inflows through the banking system at $\$ 68.5$ million, contrasted with a net outflow of $\$ 40.0$ million last year, and captured funding associated with the Cable Beach redevelopment project. Other private loan net inflows also increased, to $\$ 24.0$ million from $\$ 13.0$ million, and there was a modest rise in the public sector's net external debt repayment to $\$ 2.2$ million.

## FISCAL OPERATIONS

## OVERVIEW

Provisional estimates on the Government's budgetary operations for the first eleven months of FY2004/05 indicate an expansion in the overall deficit to $\$ 137.2$ million from $\$ 85.9$ million in the year-earlier period. Strengthened revenue growth of $4.9 \%$ to $\$ 910.4$ million was outpaced by a $9.9 \%$ hike in expenditures to $\$ 1,047.6$ million, which featured a significant upturn in capital outlays and net lending.

## REVENUE

Revenue collection for the first 11 months of FY2004/05 advanced by $\$ 42.8$ million (4.9\%), following a $\$ 44.1$ million ( $5.4 \%$ ) rise the previous year. The tax component increased by $\$ 63.6$ million ( $8.2 \%$ ) to $\$ 840.2$ million, and accounted for $92.3 \%$ of total receipts, while non-tax revenue, with a share of $6.6 \%$, fell by $\$ 16.0$ million ( $21.0 \%$ ) to $\$ 60.0$ million. Capital revenue, representing the remaining $1.1 \%$, was reduced by one-third to $\$ 10.2$ million and was generated largely from the sale of a hotel property.

| Government Revenue By Source YTD May |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | FY03/04 | FY04/05 |  |  |
|  | B\$M | \% | B\$M | \% |
| Property Tax | 36.0 | 4.1 | 52.3 | 5.7 |
| Selective Services Tax | 27.5 | 3.2 | 42.7 | 4.7 |
| Busines. \& Prof Lic. Fees | 50.6 | 5.8 | 55.7 | 6.1 |
| Motor Vehicle Tax | 10.7 | 1.2 | 15.2 | 1.7 |
| Departure Tax | 56.0 | 6.5 | 58.1 | 6.4 |
| Import Duties | 327.1 | 37.7 | 360.0 | 39.5 |
| Stamp Tax from Imports | 80.7 | 9.3 | 97.7 | 10.7 |
| Export Tax | 12 | 1.4 | 11.5 | 1.3 |
| Stamp Tax from Exports | 0.1 | -- | -- | -- |
| Other Stamp Tax | 77.9 | 9.0 | 117.1 | 12.9 |
| Other Tax Revenue | 104.0 | 12.0 | 44.5 | 4.9 |
| Fines, Forfeits, etc. | 51.6 | 5.9 | 47.6 | 5.2 |
| Sales of Govt. Property | 0.5 | 0.1 | 1.8 | 0.2 |
| Income | 23.9 | 2.8 | 10.6 | 1.2 |
| Other Non-Tax Rev. | -- | -- | -- | -- |
| Capital Revenue | 15.0 | 1.7 | 10.2 | 1.1 |
| Grants | -- | -- | -- | -- |
| Less:Refunds | 6.0 | 0.7 | 14.6 | 1.6 |
| Total | 867.6 | 100.0 | 910.4 | 100.0 |

Tax revenue performance included gains in tourism tax receipts of $\$ 15.2$ million ( $55.4 \%$ ) to $\$ 42.7$ million, boosted by the settlement of gaming tax arrears. New commercial assessments, combined with payments of arrears, largely explained the $\$ 16.3$ million ( $45.2 \%$ ) hike in property taxes to $\$ 52.3$ million. Departure taxes also increased by $\$ 2.0$ million ( $3.6 \%$ ) to $\$ 58.1$ million. International trade taxes grew by $\$ 49.4$ million (11.8\%) to $\$ 469.3$ million, comprising a boost in import duties of $\$ 32.9$ million ( $10.1 \%$ ) to $\$ 360.0$ million, and in associated stamp taxes of $\$ 16.9$ million ( $21.0 \%$ ) to $\$ 97.7$ million. Gains were also posted for business and professional license taxes, of $\$ 5.0$ million ( $10.0 \%$ ) to $\$ 55.7$ million, motor vehicle taxes, $\$ 4.5$ million ( $41.9 \%$ ) to $\$ 15.2$ million, and other stamp taxes, $\$ 39.2$ million ( $50.4 \%$ ) to $\$ 117.1$ million. These increases, however, should be considered within the context of a $57.2 \%$ drop in undistributed taxes to $\$ 44.5$ million which suggests that a more timely recording of revenue to respective categories occurred in
the current period. Meanwhile, a moderate contraction (3.4\%) was registered for export taxes, to $\$ 11.5$ million.

## EXPENDITURE

Of the $9.9 \%$ increase in total expenditure, recurrent spending rose by $\$ 59.3$ million ( $6.8 \%$ ) to $\$ 927.3$ million for the first 11 months of FY2004/05 vis-à-vis $\$ 58.2$ million (7.2\%) a year earlier. Capital outlays were elevated by $\$ 21.3$ million ( $38.0 \%$ ) to $\$ 77.1$ million, and net lending to support the budgetary operations of the public corporations was some $45.5 \%$ higher at $\$ 43.2$ million. On a proportional basis, recurrent expenditures accounted for $88.5 \%$ of total expenditure, capital outlays $7.4 \%$ and net lending, 4.1\%.

Under non-tax collections, the significant reduction in income from other sources of $\$ 12.8$ million ( $58.7 \%$ ) to $\$ 9.0$ million reflected a timing difference in the receipt of annual rental income for seabed leases rather than an actual decline. Less significant reductions were posted for fines, forfeitures and administrative fees, of $\$ 3.9$ million (7.6\%) to $\$ 47.6$ million, and income from public enterprises, of $\$ 0.4$ million ( $21.9 \%$ ) to $\$ 1.6$ million, whereas revenue from the sale of government property increased more than threefold to $\$ 1.7$ million.

An analysis of current spending by economic classification indicated a $\$ 32.6$ million ( $5.9 \%$ ) upswing in government consumption to $\$ 585.8$ million. Purchases of goods and services were higher by $\$ 9.2$ million ( $5.5 \%$ ) at $\$ 175.9$ million, and personal emoluments, which constituted almost $70 \%$ of the total at $\$ 410.0$ million, rose strongly by $\$ 23.4$ million ( $6.1 \%$ )-being explained primarily by salary increases for the uniformed branch of Government and outlays for new recruits. The $\$ 26.6$ million ( $8.5 \%$ ) hike in transfer payments was entirely attributed to growth in subsidies and other transfer payments. Of the $\$ 27.4$ million ( $13.1 \%$ ) increase to $\$ 236.4$ million, nearly $60 \%$ went to households in the form of various hurricane disaster relief assistance. Transfers to non-profit institutions also rose by $\$ 3.7$ million (16.2\%), while interest payments declined by less than $1 \%$ to $\$ 105.0$ million.

From a functional perspective, expenditures on general public services rose by $\$ 29.3$ million ( $12.2 \%$ ) to $\$ 268.8$ million, accounting for the largest share (29.0\%) of recurrent spending. Spending on housing, was up by $32.3 \%$ to $\$ 4.8$ million; social benefits \& services, by $5.3 \%$
to $\$ 57.3$ million; health, by $8.3 \%$ to $\$ 157.3$ million; education, by $3.1 \%$ to $\$ 176.6$ million; economic services, by $4.4 \%$ to $\$ 121.1$ million and defence, by $15.5 \%$ to $\$ 29.0$ million.

Growth in capital outlays was mainly due to the Government's acquisition of the Clifton Cay property as reflected in the $\$ 18.8$ million rise in outlays for land purchases to $\$ 22.1$ million, and the corresponding boost in general administration expenditures from $\$ 4.7$ million to $\$ 26.0$ million. However, the effect of this transaction was dampened by comparatively lower spending on economic services, air transportation, and general transportation.

## FINANCING AND NATIONAL DEBT

Budgetary financing for the first eleven months of the year featured a $\$ 13.1$ million increase in treasury bills outstanding, $\$ 5.7$ million in advances from the Central Bank and $\$ 200$ million in domestic bonds. Debt amortization comprised $\$ 67.6$ million in Bahamian dollars and $\$ 5.6$ million in foreign currency.

Based on net financing activities, the Direct Charge on government rose by $\$ 71.4$ million (3.4\%) to $\$ 2,173.1$ million. Bahamian dollar debt accounted for $86.7 \%$ of the total, with the majority held by public corporations (36.1\%), followed by other institutions (26.6\%), commercial banks ( $25.6 \%$ ), the Central Bank (11.5\%) and other local financial institutions ( $0.2 \%$ ). Bonds continued to be the largest component of the Bahamian dollar debt ( $85.2 \%$ ), with an average maturity of 10.3 years. Next were Treasury bills ( $10.2 \%$ ) and loans and advances from the Central Bank (4.6\%). Contingent liabilities grew by $\$ 15.6$ million ( $3.3 \%$ ) to $\$ 489.1$ million during the quarter to culminate in an $\$ 87.0$ million (3.4\%) increase in National Debt to $\$ 2,662.2$ million, which contrasted with a decline of $\$ 14.8$ million ( $0.6 \%$ ) to $\$ 2,386.7$ million in the comparative year-earlier period.

## PUBLIC SECTOR FOREIGN CURRENCY DEBT

During the June quarter, public sector foreign currency debt fell by $\$ 4.0$ million ( $0.7 \%$ ) to $\$ 554.9$ million. Government's drawings of $\$ 1.1$ million netted out against amortizations, while public corporations had a net repayment of $\$ 4.0$ million. Government's obligations were therefore unchanged at $\$ 289.4$ million, accounting for ( $51.8 \%$ ) of the stock, with the public corporation's balance declining to $\$ 269.5$ million, for the remaining 48.2\%.

By creditor profile, the largest share of foreign currency debt was held by private capital markets (40.6\%), followed by commercial banks (38.8\%), multilateral institutions (20.2\%) and others ( $0.4 \%$ ). Outstanding debt was denominated in United States Dollars, and the average term to maturity was approximately twenty-two (22) years.

Debt service for the quarter was approximately halved to $\$ 9.9$ million, and constituted an estimated 1.4\% of exports of goods and non-factor services--a decline from 3.9\% a year ago.

## 2005/2006 BUDGET HIGHLIGHTS

The budget for FY2005/06 was presented to Parliament on May 25, 2005 and approved in June 2005. The budget signalled greater efforts towards fiscal consolidation, targeting a reduction in the GFS deficit to $2.8 \%$ of GDP from $2.9 \%$, and seeking an improvement in the debt to GDP ratio which currently stands at $38.0 \%$.

Budget projections envisaged an overall deficit for FY2005/06 of $\$ 177.4$ million, which represented $2.8 \%$ of GDP, and was $\$ 14.0$ million ( $8.6 \%$ ) above FY2004/05 projections. The Budget did not include any new revenue measures but provided for ongoing review and upgrade of revenue administration systems, with such improvements expected to produce an additional $\$ 28.4$ million in collections for the fiscal year. This, combined with a more favourable economic climate, is expected to secure growth in revenue collections of $\$ 81.2$ million ( $7.7 \%$ ) to $\$ 1,132.8$ million. Budgetary outlays were placed at $\$ 1,310.2$ million, a gain of $\$ 95.1$ million ( $7.8 \%$ ) over FY2004/05.

Tourism taxes are anticipated to increase by $8.0 \%$ to $\$ 48.0$ million, and property and motor vehicle taxes, by $2.8 \%$ to $\$ 64.6$ million and $4.0 \%$ to $\$ 22.8$ million, respectively. The yield from taxes on international trade and transactions are also expected to grow by $\$ 48.0$ million ( $8.3 \%$ ) to $\$ 627.5$ million, with some $78.0 \%$ representing import related taxes. Stamp taxes on financial and other transactions and business and professional license fees are expected to increase by $18.8 \%$ to $\$ 99.0$ million and $1.8 \%$ to $\$ 70.7$ million, respectively.

Non-tax revenue is projected to rise by $\$ 6.6$ million ( $6.8 \%$ ) to $\$ 104.2$ million, supported by an anticipated $\$ 7.5$ million $(11.6 \%)$ hike in fee and service charges. The yield from other sources, which incorporates property income, is expected to decline by $\$ 0.9$ million ( $2.7 \%$ ) to $\$ 30.8$ million.

On the expenditure side, recurrent allocations were higher by $\$ 78.4$ million ( $7.3 \%$ ) at $\$ 1,145.7$ million. Provisions for net lending to public corporations rose by $\$ 1.1$ million $(3.6 \%)$ to $\$ 31.6$ million. The capital budget at $\$ 132.9$ million represented an addition allocation of $\$ 15.6$ million (13.3\%), earmarked mainly for the acquisition, construction and maintenance of assets.

By economic classification, the budget allotment for consumption rose by $7.7 \%$, with an equivalent increase in both personal emoluments and purchases of goods and services to $\$ 505.5$ million and $\$ 243.8$ million, respectively.

Transfer payments are budgeted $6.8 \%$ higher at $\$ 396.4$ million, comprising an increase of $8.2 \%$ in interest payments and $6.1 \%$ in subsidies and other transfer payments. Included in the latter, were higher allotments
for subsidies to the Public Hospitals Authority and transfers to non-profit institutions.

According to the functional breakdown of recurrent expenditures, the budget for general public services enlarged by $15.1 \%$ to $\$ 353.5$ million, accounting for $27.0 \%$ of total expenditure. Higher allocations were also posted for education, up $2.6 \%$ to $\$ 213.5$ million; health, by $5.5 \%$ to $\$ 184.6$ million; economic services, by $3.4 \%$ to $\$ 144.1$ million; housing, by $27.5 \%$ to $\$ 7.0$ million; social benefits \& services, by $1.4 \%$ to $\$ 66.5$ million and defense, by $3.4 \%$ to $\$ 34.2$ million. A $14.1 \%$ decline to $\$ 8.8$ million was recorded for other community \& social services.

On the capital side, allocations for public works and water supply increased by $7.9 \%$ to total $\$ 55.7$ million, as was the case with education, up $11.5 \%$ to $\$ 19.5$ million; health, up by $11.4 \%$ to $\$ 13.2$ million, and general public services, up by $26.5 \%$ to $\$ 22.6$ million.

## Real Sector

## Tourism

Preliminary estimates of tourism performance for the June quarter indicate continued recovery in tourism output from the fall-off experienced after last year's hurricanes, supported by increased occupancy levels and gains in room rates, which have combined to mitigate declines in overall arrivals. Activity remained favourable, supported by traffic from US markets, where consumer confidence and household spending held steady, despite higher energy prices.

Second quarter visitor arrivals declined by $8.3 \%$ to 1.3 million compared to an $18.7 \%$ increase to 1.4 million in 2004. Air passengers, which accounted for $33.5 \%$ of arrivals, declined by $0.9 \%$, following a $9.8 \%$ gain last year. Sea arrivals, at $66.5 \%$ of the total, contracted by $11.6 \%$, relative to the $23.2 \%$ hike in the corresponding quarter of 2004.

Port of entry data revealed that arrivals to New Providence fell by $8.1 \%$ in contrast to the cruise-led boost of $21.5 \%$ for 2004. Arrivals to Grand Bahama contracted by $20.0 \%$ from a similar increase in the corresponding
quarter of 2004, while arrivals to the Family Island eased by $2.0 \%$ behind a $10.0 \%$ growth last year.

Preliminary tourism expenditure figures for the largest New Providence properties indicate continued growth in room revenues, occupancy rates, as well as average daily rates. The total number of available rooms sold in the six months to June rose by $1.3 \%$, with occupancy rates increasing to $80.6 \%$ from $76.1 \%$. Average daily room rates were relatively stable at $\$ 181.33$, and the revenue per available room improved to $\$ 146.2$ from $\$ 137.59$. Consequently, total room revenues advanced by $7.6 \%$ to $\$ 171.4$ million.

## Construction

Construction activity continued to be reinforced by large scale foreign investment projects combined with strong support from residential investments.

An analysis of second quarter data from banks, insurance companies and the Bahamas Mortgage Corporation indicated a doubling in the number of residential
mortgage commitments for new construction and building repairs, to 459, with a similar hike in value to $\$ 56.8$ million. Commercial mortgage commitments totaled 15 at a value of $\$ 3.3$ million compared to 6 projects valued at $\$ 1.5$ million for the corresponding period of 2004. Actual residential disbursements against approved financing strengthened to $\$ 106.2$ million, from a $10.7 \%$ fall-off to $\$ 61.5$ million in 2004. However, commercial drawdowns were reduced by nearly $60 \%$ to $\$ 5.7$ million.

Residential mortgages registered a quarterly increase of $\$ 214.0$ million ( $13.4 \%$ ) to $\$ 1,811.7$ million at end-June compared to commercial loans which grew by $\$ 20.1$ million ( $12.5 \%$ ) to $\$ 181.5$ million. Of the total mortgage loan market, the largest share was accounted for by banks ( $86.4 \%$ ), followed by insurance companies (9.0\%), and the Bahamas Mortgage Corporation (4.6\%). The average interest rate was unchanged for commercial mortgages at $9.4 \%$, but softened by 4 basis points for residential mortgages to $8.4 \%$.

## Prices

Consumer price inflation, as measured by the average retail price index, firmed to $1.7 \%$ from $0.9 \%$ in the corresponding quarter of 2004, mainly on account of the hike in global oil prices. The most heavily weighted
housing component advanced by $2.3 \%$ from an unchanged level during the corresponding quarter of 2004. Average cost increases were also recorded for transportation \& communications ( $3.7 \%$ ), medical care and health (2.7\%), food \& beverages (2.6\%), education (2.1\%), and other goods \& services (1.3\%). Significant offsets were provided by average declines in clothing \& footwear (2.6\%), recreation and entertainment services (1.5\%), and household (0.7\%) costs.

| Average Retail Price Index <br> (Annual \% Changes) <br> June |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 2004 |  | 2005 |  |
| Items | Weight | Index | \% | Index | \% |
| Food \& Beverages | 138.3 | 116.2 | 3\% | 119.5 | 3\% |
| Clothing \& Footwear | 58.9 | 107.7 | 0\% | 105.2 | -2\% |
| Housing | 328.2 | 103.8 | 0\% | 106.5 | 3\% |
| Furn. \& Household | 88.7 | 119.3 | 0\% | 118.6 | -1\% |
| Med. Care \& Health | 44.1 | 131.1 | 10\% | 135.1 | 3\% |
| Trans. \& Comm. | 148.4 | 107.9 | 2\% | 112.1 | 4\% |
| Rec., Enter. \& Svcs. | 48.7 | 121.2 | -5\% | 119.3 | -2\% |
| Education | 53.1 | 164.8 | 2\% | 168.3 | 2\% |
| Other Goods \& Svcs. | 91.6 | 122.3 | -1\% | 124.0 | 1\% |
| ALL ITEMS | 1000 | 114.7 | 1\% | 116.8 | 2\% |

The impact of the oil price increases was less evident in price development for the twelve months ending June 2005. Average inflation slackened to $1.0 \%$ from $1.8 \%$ in the corresponding period, with reductions recorded in the recreation entertainment \& services (1.8\%), clothing \& footwear ( $1.2 \%$ ), and the furniture \& household operation ( $0.2 \%$ ) indices. However, more significant price increases were posted for medical care \& health (3.7\%), food \& beverage ( $2.7 \%$ ), transportation \& communication (2.6\%) and education (1.5\%) costs.

## Money, Credit and Interest Rates

## Overview

Growth in the monetary aggregates was dampened somewhat, amid a slowdown in the net foreign assets of the banking system, and a strong pickup in domestic credit fuelled by private sector foreign currency borrowing and buoyant activity in the housing market. Interest rate conditions remained supportive of the expansion as the loan-to-deposit rate spread narrowed further.

As regards profit and balance sheet developments of domestic banks, data for the first quarter of 2005 suggested some upturn in earnings indicators, owing to a combination of efficiency gains, reduced provisions for bad debt and depreciation costs. The previous quarter's improvement in asset quality indicators was extended as the proportion of loan arrears in the aggregate loan portfolio was reduced.

## LIQUIDITY

During the review quarter, net free cash reserves of the banking system rose by $\$ 59.8$ million ( $25.8 \%$ ) to $\$ 291.2$ million-equivalent to an enlarged $6.6 \%$ of banks' Bahamian dollar deposit liabilities, relative to $4.7 \%$ in the comparable period last year. The broader surplus liquid assets rose by $15.3 \%$ to $\$ 303.7$ million at end-June, which exceeded the minimum requirement by $42.3 \%$ vis-à-vis a lesser 34.5\% for June 2004.

## Deposits and Money

Monetary growth slowed during the quarter, with overall money (M3) expanding by $3.4 \%$ to $\$ 4,774.6$ million compared with $4.1 \%$ in the comparative yearearlier period. Portfolio shifts into alternative assets such as Government bonds, which lessened accretions to public corporations' balances, contributed to a slowdown in demand deposit growth to $4.9 \%$ from $11.3 \%$ and a corresponding deceleration in narrow money (M1) advance to $3.8 \%$ from $10.3 \%$. Another key factor was the $3.3 \%$ reduction in currency in active circulation which contrasted with the $4.8 \%$ upturn recorded a year earlier.

Amid fairly stable savings deposit growth of $4.6 \%$, and a marginally higher rise in fixed deposits of $1.5 \%$, broad money (M2) expansion slackened to $2.7 \%$ from 4.0\%. Residents' foreign currency deposits were boosted by $28.6 \%$, surpassing last year's growth of $5.7 \%$.

Bahamian dollar deposits constituted $96.5 \%$ of money, with fixed balances accounting for the largest share ( $51.6 \%$ ), followed by demand ( $23.5 \%$ ) and savings deposits (17.8\%), and lesser shares in currency in active circulation ( $3.6 \%$ ) and residents' foreign currency deposits (3.5\%).

## Domestic Credit

Favourable economic conditions, together with a lower interest rate environment, reinforced growth in domestic credit by $\$ 221.6$ million or $4.1 \%$ in the second quarter of 2005 compared with $\$ 99.8$ million ( $2.0 \%$ ) in 2004. Growth in the foreign currency component advanced strongly by $17.8 \%$ relative to a $2.4 \%$ rise in the more dominant Bahamian dollar claims.

Changes in Credit

Claims on the public sector declined by $2.8 \%$, reversing a $1.7 \%$ expansion in 2004 . This was led by a $3.0 \%$ decrease in net credit to Government of $\$ 19.4$ million vis-à-vis a $\$ 34.3$ million ( $6.3 \%$ ) gain last year; and the contraction in claims on the public corporations moderated to 2.3\% from 5.1\%.

Private sector credit growth firmed by $5.7 \%$ to $\$ 248.8$ million, with the Bahamian dollar component expanding by $\$ 121.1$ million ( $3.0 \%$ ), although the foreign currency portion rose more strongly by $\$ 127.7$ million (34.3\%), largely on account of funding associated with the Cable Beach Redevelopment project.

The bulk of private sector lending was concentrated in personal loans (70.4\%), which grew by $4.2 \%$ from $2.6 \%$ last year. Growth in residential mortgages was higher at 4.2\%, more than doubled for overdrafts to $\$ 54.3$ million, and was a modest $1.8 \%$ for consumer credit.

Increases under consumer credit were distributed among debt consolidation ( $\$ 10.7$ million), home improvement ( $\$ 7.2$ million), land purchases ( $\$ 5.9$ million), miscellaneous purposes ( $\$ 1.7$ million), credit cards ( $\$ 0.8$
million) and loans for furnishings \& domestic appliances (\$0.7 million). By contrast, a net repayment was posted for education loans (\$0.7 million).

| Distribution of Bank Credit By Sector End-June |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 2004 |  | 2005 |  |
|  | B\$M | \% | B\$M | \% |
| Agriculture | 9.5 | 0.2 | 10.1 | 0.2 |
| Fisheries | 10.2 | 0.2 | 13.6 | 0.3 |
| Mining \& Quarry | 19.4 | 0.4 | 17.4 | 0.3 |
| Manufacturing | 75.9 | 1.6 | 54.5 | 1.1 |
| Distribution | 208.2 | 4.5 | 202.1 | 4.1 |
| Tourism | 172.4 | 3.7 | 268.1 | 5.4 |
| Enter. \& Catering | 33.4 | 0.7 | 61.2 | 1.2 |
| Transport | 45.8 | 1.0 | 26.0 | 0.5 |
| Public Corps. | 317.9 | 6.9 | 302.0 | 6.1 |
| Construction | 245.6 | 5.3 | 290.7 | 5.8 |
| Government | 111.2 | 2.4 | 80.5 | 1.6 |
| Private Financial | 29.3 | 0.6 | 20.8 | 0.4 |
| Prof. \& Other Ser. | 123.2 | 2.7 | 120.8 | 2.4 |
| Personal | 2949.9 | 63.7 | 3239.0 | 65.0 |
| Miscellaneous | 280.6 | 6.1 | 275.5 | 5.5 |
| TOTAL | 4632.5 | 100.0 | 4982.3 | 100.0 |

Among the remaining private sector credit components, net gains were recorded for tourism ( $\$ 90.0$ million), entertainment \& catering ( $\$ 15.7$ million), construction ( $\$ 14.3$ million), distribution, and professional \& other services ( $\$ 4.7$ million each), agriculture \& fisheries (\$0.3 million) and mining \& quarrying ( $\$ 0.1$ million). Significant offsets however, were provided by net repayments for miscellaneous ( $\$ 17.7$ million), manufacturing ( $\$ 2.1$ million) and for transport ( $\$ 5.4$ million) activities.

## The Central Bank

The Central Bank's net claim on Government rose by $\$ 26.1$ million ( $18.5 \%$ ) to $\$ 167.5$ million during the first quarter, based on higher holdings of bonds. Net liabilities to the rest of the public sector declined by $\$ 10.7$ million (6.9\%) to $\$ 144.9$ million, as balances shifted into interest
bearing investments. Amid stronger domestic demand, seasonal growth in external reserves slackened to $\$ 42.5$ million ( $5.9 \%$ ) from $\$ 59.3$ million ( $10.0 \%$ ) in 2004, for an end-June stock of $\$ 761.1$ million vis-à-vis $\$ 652.5$ million in 2004.

Underlying the slowdown in reserves growth was a reduction in net foreign currency purchases to $\$ 32.1$ million from $\$ 54.6$ million last year. The net intake from commercial banks fell to $\$ 62.0$ million from $\$ 79.5$ million, while the net outflow via the public sector was $\$ 5.0$ million higher at $\$ 29.9$ million. Total purchases advanced by $\$ 19.6$ million ( $10.0 \%$ ) to $\$ 215.2$ million as compared to a $\$ 42.0$ million ( $29.8 \%$ ) hike in total sales to $\$ 183.1$ million.

At end-June 2005, the stock of reserves was equivalent to an estimated 25 weeks of non-oil merchandise imports, which was substantially unchanged from the 2004 period. Adjusted for the statutory foreign balances requirement-equivalent to at least $50 \%$ of the Bank's Bahamian dollar liabilities-useable reserves, or the Central Bank's liquidity, stood higher at $\$ 315.7$ million compared to $\$ 308.7$ million in 2004.

## Domestic Banks

During the review quarter, absolute growth in domestic banks' deposit liabilities to the private sector advanced to $\$ 145.3$ million ( $3.6 \%$ ) from $\$ 136.6$ million $(3.7 \%)$ in 2004 , which trailed the $\$ 248.8$ million ( $5.7 \%$ ) upswing in total credit to the private sector. By contrast, net claims on Government fell by $9.1 \%$, amid declines in overdrafts and stable bond holdings. Public corporations had a lower net repayment, while their deposit liabilities firmed by $12.1 \%$ and banks recorded a steady $1.0 \%$ net accumulation of capital resources from profits, retained earnings and loan loss reserves.

Banks' total deposit liabilities, including balances owed to Government, amounted to $\$ 4,556.6$ million, with the majority ( $96.3 \%$ ) in Bahamian dollars. Private individuals made up the largest concentration of depositors ( $55.5 \%$ ), followed by business firms (28.6\%), public sector (8.4\%), institutional \& other investors (3.8\%) and private financial companies (3.7\%).

A breakdown of Bahamian dollar deposits by range of value and number of accounts indicated that the majority of accounts (89.9\%) were under $\$ 10,000$, but constituted only $8.5 \%$ of the aggregate value. In contrast, individual deposits over $\$ 50,000$ comprised fewer accounts ( $3.1 \%$ ), albeit $77.6 \%$ of the total value. In addition, some $7.0 \%$ of accounts, between $\$ 10,000$ to $\$ 50,000$, represented $13.9 \%$ of the total value.

Adjusted for goodwill, banks' Bahamian dollar capital and surplus position rose at a reduced quarterly pace of $1.4 \%$ to $\$ 970.4$ million, relative to a $4.0 \%$ rise in 2004 occasioned by healthy profitability gains. Nevertheless, profit and retained earnings represented a higher 47.6\% of capital and surplus relative to $45.4 \%$ last year, as general and specific reserves against loan losses were reduced to $11.9 \%$ of the total from $12.4 \%$ the previous year. Correspondingly, total reserves and provisions, as a percentage of the private sector loan portfolio, stood at $2.8 \%$ at end-June compared to $2.9 \%$ in 2004.

The Central Bank's latest survey signalled improvements in asset quality during the second quarter of 2005. The arrears rate for loans with payments 30 days past due further softened to $8.0 \%$ of outstanding private balances, from $8.5 \%$ at end-March and $8.7 \%$ at end-June 2004. The residential mortgage portfolio featured a further decline in the arrears rate to $8.9 \%$ from $9.4 \%$ at
end-March 2005 and $9.9 \%$ from a year earlier. Conversely, the arrears rate on commercial loans firmed marginally to $8.2 \%$, but was below the $9.3 \%$ registered 12 -months earlier. With the negative effects of the hurricanes stabilizing, especially in the Northern Bahamas, the arrears rate on consumer loans declined to $7.3 \%$ from $8.7 \%$ at end-March 2005 and $7.9 \%$ last year. Nonperforming loans, identified as loan balances with past due payments of at least 3 months and on which banks have stopped accruing interest, were lower at $4.6 \%$ of outstanding claims, compared to $4.9 \%$ in the previous quarter and a year earlier.

Compared to the previous quarter, banks' average provisioning levels for losses against Bahamian dollar loans was stable at $2.2 \%$. Provisions corresponded to $47.0 \%$ of total non-performing loans, increasing progressively from the $45.1 \%$ registered in March 2005, and $40.5 \%$ at end-June 2004.

## Bank Profitability

For the March 2005 quarter, the latest period for which data is available, domestic banks' net income grew by $\$ 11.3$ million ( $29.1 \%$ ) to $\$ 50.0$ million, relative to the same period in 2004. In particular, the gross earnings margin rose by $4.9 \%$ to $\$ 82.4$ million, reflecting a $7.7 \%$ increase in net interest income, only partly offset by a 22.0\% fall in commission and foreign exchange income. Despite a $9.8 \%$ rise in staff costs, total operating cost registered a $2.6 \%$ decline to $\$ 44.0$ million, benefiting from a softening in depreciation and bad debt expenses which resulted in a more than doubling of other net income to $\$ 11.6$ million.

These developments were also reflected in elevated profitability ratios relative to average domestic assets. The ratio for the net interest margin rose marginally by 2 basis points to $4.73 \%$ and commissions and foreign exchange income were lower by 13 basis points at $0.36 \%$ of average assets. The operating costs ratio was also reduced by 27 basis points to $2.72 \%$. Within this context, the net income (return on assets) ratio rose to $3.08 \%$ from $2.56 \%$ in the corresponding 2004 period.

## Interest Rates

Generally buoyant liquidity conditions exerted a downward influence on interest rates in general. The 26
basis points drop in the weighted average spread to $6.94 \%$ was led by a 61 basis points drop in the weighted average loan rate, and reinforced by the 35 basis points decline in the weighted average deposit rate to $3.09 \%$.

| Banking Sector Interest Rates Period Average (\%) |  |  |  |
| :---: | :---: | :---: | :---: |
|  | Qtr. II | Qtr. I | Qtr. II |
|  | $\underline{2004}$ | $\underline{2005}$ | $\underline{2005}$ |
| Deposit rates |  |  |  |
| Demand Deposits | 2.54 | 2.12 | 2.10 |
| Savings Deposits | 2.55 | 2.59 | 2.26 |
| Fixed Deposits |  |  |  |
| Up to 3 months | 3.73 | 3.39 | 3.06 |
| Up to 6 months | 4.94 | 3.62 | 3.19 |
| Up to 12 months | 4.21 | 3.70 | 3.25 |
| Over 12 months | 4.14 | 3.71 | 3.47 |
| Weighted Avg Deposit Rate | 3.85 | 3.44 | 3.09 |
| Lending rates |  |  |  |
| Residential mortgages | 8.84 | 8.50 | 8.02 |
| Commercial mortgages | 8.86 | 8.18 | 8.13 |
| Consumer loans | 13.08 | 12.42 | 11.81 |
| Overdrafts | 11.40 | 11.00 | 11.14 |
| Weighted Avg Loan Rate | 11.28 | 10.64 | 10.03 |

On the deposit side, rate easing was broadly based across all fixed maturities, with the average band decreasing to $3.06 \%-3.47 \%$ from $3.39 \%-3.71 \%$. Average rates offered on demand and savings deposits were also lower, by 2 and 33 basis points to $2.10 \%$ and $2.26 \%$, respectively.

Movements in average loan rates included a softening in commercial and residential loan rates, by 48 and 5 basis points to $8.02 \%$ and $8.13 \%$, respectively. The average rate on consumer loans and other local loans also fell by 61 and 70 basis points to $11.81 \%$ and $7.41 \%$, respectively. In contrast, the average rate on overdrafts firmed by 14 basis points to $11.14 \%$.

While the average 90 -day Treasury bill rate fell by 3 basis points to $0.15 \%$, benchmark rates, the Central

Bank's Discount Rate and commercial banks' Prime, were unchanged at $5.25 \%$ and $5.50 \%$.

## Captial Markets Developments

During the second quarter of 2005, there were no new listings on the Bahamas International Securities Exchange (BISX), where equity valuations, dominated by strong profit growth in the banking sector, held steady. Regarding fixed income issues, the newly established Clifton Heritage Authority, floated a $\$ 24$ million Government guaranteed bond comprised of three tranches ranging from 20 to 30 years with interest rates at $1 / 2 \%$ to $3 / 4 \%$ above Prime. The issue was fully subscribed, with the Central Bank of The Bahamas appointed as the Registrar and Transfer Agent.

BISX All Share Price Index rallied by 76.93 points (7.0\%) to 1,174.01 in the second quarter, closing the half year 13.0\% above its December 2004 value. Despite a $38 \%$ increase in the volume of shares traded in the second quarter of 2005 to 797,048 , the value of such shares was $12.8 \%$ lower at $\$ 2.3$ million.

## International Trade and Payments

Provisional estimates for the second quarter of 2005 suggested a significant widening in the current account deficit, to $\$ 124.1$ million from $\$ 14.4$ million last year. This reflected a combination of a larger merchandise trade gap, higher net income outflows and a contraction in net travel receipts.

The merchandise trade deficit broadened to an estimated $\$ 402.8$ million from $\$ 337.5$ million in 2004 . Increased domestic demand pushed non-oil merchandise imports higher by $14.9 \%$ to $\$ 397.4$ million, surpassing estimated exports growth of $6.8 \%$ to $\$ 73.7$ million, and rising oil prices was a key factor behind the $31.5 \%$ hike in the oil bill firming to $\$ 113.5$ million. The average per barrel cost of gas oil rose by $60.4 \%$ to $\$ 64.51$; jet fuel, by $42.5 \%$ to $\$ 64.62$; motor gas, by $17.1 \%$ to $\$ 67.31$; avia-tion-gas, by $27.7 \%$ to $\$ 126.0$ and propane, by $128.9 \%$ to $\$ 42.06$. In contrast, the price of bunker ' C ' fuel was marginally lower by $0.2 \%$ at $\$ 23.23$ per barrel.

The estimated surplus on services trade narrowed by $\$ 19.8$ million ( $6.0 \%$ ) to $\$ 309.4$ million, led by a $10.0 \%$ fall in net travel receipts to $\$ 457.4$ million. Also significant was the net increase in transportation outflows of $10.4 \%$ to $\$ 79.3$ million and government services more than doubled to $\$ 23.2$ million. These were mitigated by a halving in net outflows under other services to $\$ 49.8$ million.

Under the income account, net external remittances increased to $\$ 43.6$ million from $\$ 32.2$ million in 2004. This was primarily explained by a $76.5 \%$ upturn in net private profit remittances to $\$ 30.0$ million. Also, net official interest receipts grew to $\$ 5.3$ million; reversing a $\$ 3.4$ million net outflow recorded last year and net current transfer receipts were halved to $\$ 12.8$ million, as general government net inflows decreased to $\$ 14.9$ million from $\$ 27.0$ million.

Compared to the June quarter of 2004, the surplus on the capital and financial account rose substantially to $\$ 123.3$ million from $\$ 24.2$ million. Developments were driven by the $\$ 68.5$ million in short-term capital inflow through the banking system associated with the financing
of the Cable Beach Redevelopment project, relative to a $\$ 40.0$ million outflow in 2004. While net outflows due to migrant workers remittances rose by $40.2 \%$ to $\$ 13.6$ million, the financial account registered a more than three-fold increase in net outflows to $\$ 137.0$ million. In contrast, net private sector direct investment inflows nearly doubled to $\$ 24.0$ million, while the net equity surplus contracted by $17.3 \%$ to $\$ 47.4$ million and real estate transactions resulted in a $\$ 0.8$ million outflow, reversing a $\$ 5.1$ million inflow registered in 2004.

After adjusting for possible errors and omissions, the overall payments surplus narrowed to $\$ 42.6$ million from $\$ 59.2$ million in the year-earlier period.

## INTERNATIONAL ECONOMIC DEVELOPMENTS

The world economy continued to expand at a healthy pace during the second quarter of 2005 , due to buoyant business investment and accommodative monetary policy. The momentum was stronger in the United States and developing Asia in contrast with ongoing weakness in Europe. Although oil prices remained elevated, so far the impact on consumer price inflation has been relatively moderate. Consistent with the overall pattern of economic expansion, global current account imbalances diverged for most major industrial economies.

Real output growth remained strong in the United States, although slowing to an annualized rate of $3.3 \%$ in the June quarter, compared with $3.8 \%$ in the first quarter of 2004. The outcome reflected robust contributions from consumer spending, business investments and net exports, partly offset by a rundown in business inventories. The pace of growth for the United Kingdom weakened to an annualized $1.7 \%$ from $3.6 \%$, as services growth abated and the manufacturing sector fell into recession. In Japan, higher levels of consumer and business investments, combined with improvements in the labour market and the healthier state of corporate balance sheets, suggested a more durable upswing in economic output to $1.5 \%$ from $1.2 \%$ in the March quarter. After increasing by $0.5 \%$ the first quarter, euro zone growth moderated to $0.3 \%$ as domestic demand failed to compensate for the weakening external impetus. German

GDP expansion was estimated to have more or less matched the $1.0 \%$ registered in the first quarter.

Labour market conditions in the major industrialized countries were generally favourable during the second quarter. In the United States, the average unemployment rate fell from $5.2 \%$ in the previous quarter to $5.0 \%$-the lowest rate since September 2001. Employment continued to expand at a moderate pace in Japan, with the jobless rate reduced to $4.2 \%$ from an estimated $4.5 \%$ in the preceding quarter and growth concentrated in full time positions for the first time in about ten years. Amid depressed business confidence, the euro zone average unemployment rate remained high at $8.7 \%$ vis-à-vis $8.8 \%$ in the March quarter, although Germany's unemployment rate improved to $11.7 \%$ from $12.0 \%$. Unemployment was comparatively lower in the United Kingdom, where the jobless rate edged up to $2.7 \%$ from $2.6 \%$ last quarter.

Average consumer price inflation among major industrial countries remained relatively contained, despite a rebound in oil prices. In the United States, annualized inflation softened to $2.5 \%$ from $3.1 \%$ in the previous quarter, as consumer spending, which posted strong gains during the first quarter of 2005, flattened out in the second quarter. Annualized inflation in the euro area was stable at $2.0 \%$, with the rate unchanged at $1.8 \%$ for Germany but declining to $1.8 \%$ from $2.1 \%$ for France. In the United Kingdom, average consumer prices trended upwards to $2.0 \%$ from $1.7 \%$ in the previous quarter, largely reflecting a strong contribution from increased petrol prices. Japan's consumer price deflation narrowed to $0.1 \%$ from $0.2 \%$, as the impact of crude oil price gains fed into domestic corporate goods prices.

Global foreign exchange markets were relatively quiet over the quarter. The United States dollar continued the appreciation that had commenced since the beginning of the year, reflecting the ongoing tightening of monetary policy and strong economic performance. The dollar strengthened by $7.1 \%$ against the euro to $€ 0.83$, by $3.5 \%$ relative to the Japanese yen to $¥ 110.92$, by $5.5 \%$ vis-à-vis the British pound to $£ 0.56$, by $1.2 \%$ against the Canadian dollar to $\mathrm{C} \$ 1.23$, and by $7.1 \%$ against the Swiss franc to CHF1.28.

Equity markets turned out a relatively lackluster performance during the second quarter of 2005. In the

United States, the Dow Jones Industrial Index (DJIA) decreased by $2.2 \%$ to 10,275 points, while the broader Standard and Poor's 500 Index gained $1.0 \%$ to 1,195.5 points. Positive results among the European bourses included the United Kingdom's FTSE 100 Index 4.5\% rise to $5,113.2$ points; Germany's DAX Index $5.5 \%$ appreciation to 4,586.3 points and France's CAC 40 Index 4.0\% gain to $4,229.4$ points. Conversely, the Japanese Nikkei 225 Index fell by $0.7 \%$ to $11,584.0$ points.

In commodities market, OPEC increased its daily production ceiling by 0.5 million ( $1.8 \%$ ) to 28.0 million barrels per day during the quarter. Nevertheless, the price per barrel of Brent North Sea crude oil advanced by $7.2 \%$ to $\$ 56.52$, reaching a new historical high at endJune, as an abrupt and active start to the hurricane season disrupted oil operations in the Gulf of Mexico and compounded fears of a shortfall in product and crude supplies. Meanwhile, precious metal prices trended upwards with the price for gold higher by $10.5 \%$ at $\$ 435.50$ per troy ounce, and silver price by $22.2 \%$ at $\$ 7.05$ per troy ounce.

On the monetary policy front, the stance remained accommodative during the second quarter, providing ongoing support to the economic expansion. The Bank of England held the repo unchanged at $4.75 \%$ since August 2004, as inflation remained broadly contained around the 2.0\% target, and the European Central Bank kept its refinancing rate steady at $2.00 \%$ because of much weaker economic performance. The United States Federal Reserve continued to use 'a measured pace' of interest rate tightening to support growth and price stability, lifting the primary credit and target funds interest rates by 25 basis points each, to $4.25 \%$ and $3.25 \%$, respectively in the second quarter-the ninth such increase since June 2004. Japan's zero rate interest policy was maintained, as improved conditions in the financial sector have eased concerns about a deflationary spiral. Authorities sought instead to boost the liquidity of the banking system by supplying excess reserves to the banks.

In external sector developments, indications are that global current account imbalances diverged during the second quarter, due to uneven growth, shifting terms of trade and exchange rate differences. For the second quarter, the United States current account deficit narrowed by $1.5 \%$ to $\$ 195.7$ billion from $\$ 198.7$ billion during
the first quarter. The United Kingdom's current account deficit improved as the trade deficit declined in the second quarter, to $£ 9.7$ billion from $£ 10.4$ billion in the first quarter. Further, the euro area recorded a decline in the current account surplus to $€ 15.5$ billion cumulative for the

12-month to June 2005, compared with $€ 34.3$ billion for the 12-month to March 2005, as the income and current transfer deficits exceeded the surplus in goods and services.
